

Myco 4Pack

Sustainable packaging solution for your industry

- Complete **tailor-made** solution
- **Zero tooling** cost
- Suitable for **low-medium production series**
- **Resistant to price increases** of conventional materials
- ESG-compliant

reddot winner 2024

- Effective **shock and vibration absorption**
- **Easily adapts** to the product
- Can be used in **automatic lines**
- Packaging is **stackable**
- Easy packaging disposal

100% biodegradable

(does not contain harmful chemicals or microplastics)

Cradle-to-gate

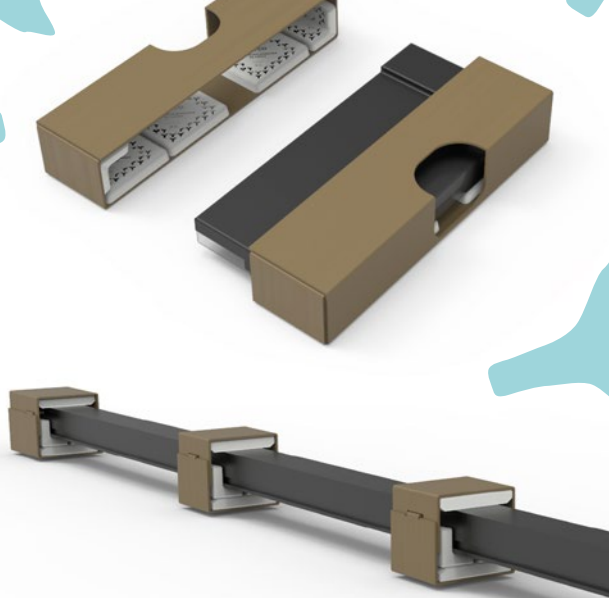

Produced from **local waste** materials (e.g. sawdust)

Low energy and water production requirements

0,2 kg CO₂ per 1 kg of material

The system is based on **paper capsules filled with Myco material (Myco SafePads)**, which absorb shocks. Combining SafePads with cardboard creates an efficient and environmentally friendly packaging option to protect the products being transported.

When ordering larger quantities, you can have **your own printing** on the protective cushions and use this space for marketing communication.

Helping to meet

SUSTAINABLE DEVELOPMENT GOALS
