

MANUFACTURING OF METAL STRUCTURES

www.weldpro.lv/en

ABOUT

Weld Pro offers the full cycle of metalworking, including MIG / MAG / TIG welding and CNC plasma cutting.

The company has passed the quality certificate:
ISO 9001, EN 1090

OUR SERVICES

We manufacture various types of metal structures for the construction of hangars, warehouses, production facilities and premises. Production, design and assembly of specific constructions.

- **MIG / MAG / TIG welding**

We provide all types of welding services, both ferrous and non-ferrous.

- **Metalworking**

We perform armature bending, metal cutting, drilling, splicing, grinding, and powder coating.

- **CNC plasma cutting**

Cutting of metal parts (flanges), and brackets. From templates to individually drawn parts.

- **Metal structures**

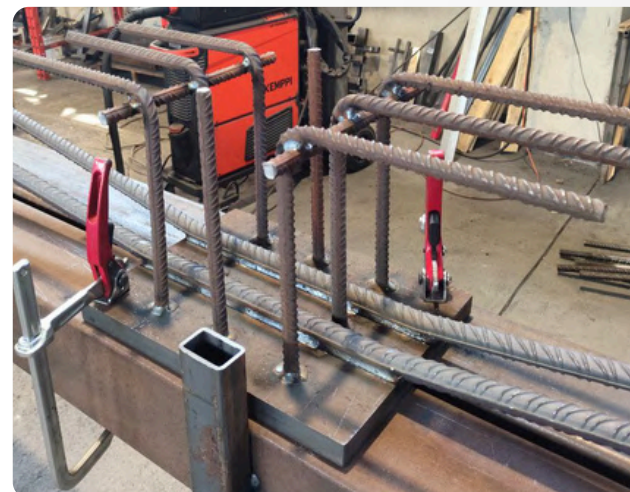

We make rebar meshes, bend rebars, custom metal parts and constructions.

OUR EXPERTISE

Load-bearing structures

Embedded parts

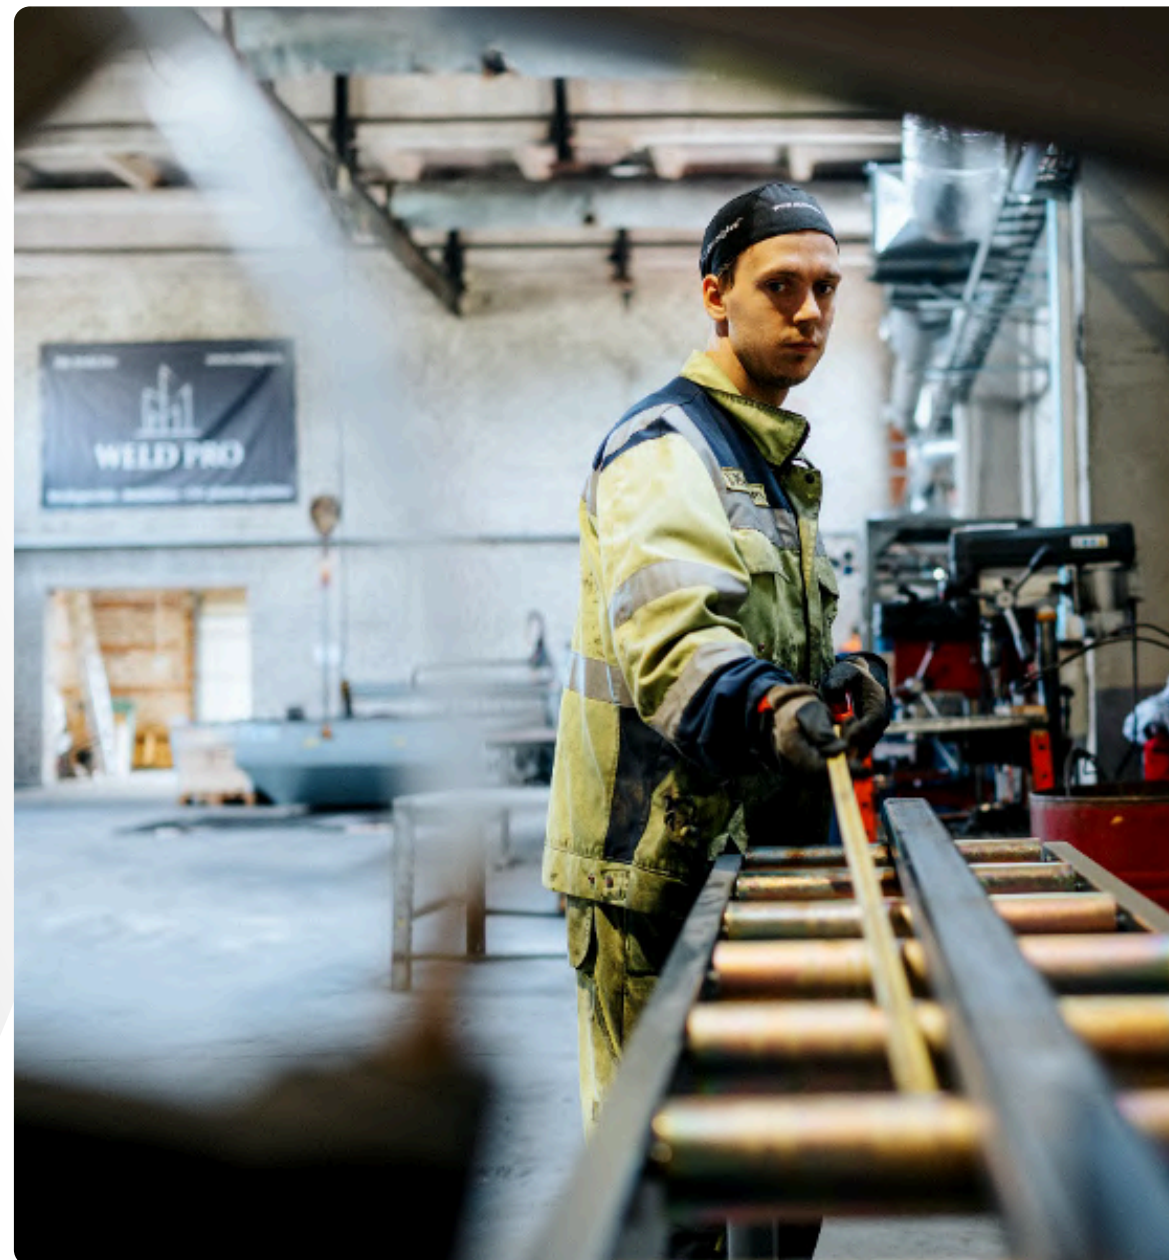

Metal structures
