

USER FRIENDLY

Easy Readable Measurements

EFFICIENT

5X Faster Than Traditional Method

MONEY SAVER

Reduce NFF and AOG Costs

SAFER

Limit Malfunction Risks

Easiest Solution to Detect, Identify and Locate from One End:

- ▶ Open Circuit (permanent intermittent)
- ▶ Short Circuit (permanent intermittent)
- ▶ Connector issues
- ▶ Shield Faults (E.G.: location of chafing)
- ▶ All faults resulting in local impedance variation

Aero Smart-R kit

MCTDR : Simple and Fast Technology Finding Wiring Issues

MCTDR combines the rapidity of the TDR and the accuracy of FDR

Unrivalled Advantages:

- ▶ Coverage up to 100 m (325 feet) of cable length
- ▶ Compliant with all aeronautic cables
- ▶ Pre-loaded & Customizable cable library
- ▶ Highly accurate and reliable digital technology
- ▶ No risks to damage wires under test

Designed To Be Your Best Ally:

- ▶ Quick and Accurate measurements
- ▶ Incomparable user friendly interface
- ▶ Build reports saving graphs, screenshots, photos...
