How can we continue to provide people-centered care to the growing group of frail seniors with fewer caregivers?

Insights

Healthcare organizations often struggle with complexity, costs and point solutions when it comes to technology

Vulnerable seniors often struggle to adopt new technologies

Hi, I'm Lizz.
You look good today. How do you feel?

Goedemorgen meneer Janssen, hoe gaat het met u?

LizzHealth
A human touch to digital care

o Reduces the workload for caregivers
o Affordable, scalable and simple
o Increases the well-being and self-reliance of frail seniors

24/7 Social Robot & Ecosystem
(Device with application, informal care app & dashboard)

Already live at multiple healthcare institutions

Every frail senior a personal 'social robot' and a friend in care

Features on the roadmap, always in co-creation with care:

Facial expressions and hand gestures

Speaking and listening

Dashboard for caregivers
- Clear overview per patient
- Automated health reporting
- Easy to use

App for family and people involved
- Remote insight in current status
- Calendar overview
- Easy to use

Daily support

Daily structure, activation, planning and reminders

Motivation (get a boost)

Support for day-night rhythm

Friendship & fun

Personal attention and social contact

Dialogue based on AI language models (LLM)

Weather | News Quiz | Music

Natural interaction and social awareness (AI)

Therapy & training

How-to videos

Training with explanations (in word and writing)

Sensor integration (e.g., Garmin smartwatch)

Communication

Video calling

Monitoring, questionnaires and self-reporting
