

MODPACKGROUP

Metal Design and
Fabrication

FROM CONCEPT TO READY-TO-USE EQUIPMENT

MODPACK SYSTEM offers a wide range of industrial enclosures designed for housing technological and electrical equipment, for product transfer and storage

Mechanical, electrical & piping design integrated

Steel structures built for transport & harsh environments

Containerized & modular equipment

In-house fabrication with precision & quality control

Do you have a project that requires expertise in industrial mechanical engineering and design?

MODPACKGROUP

Mechanical Engineering and Design

- 3D models and layouts ready for validation and production
- Optimized designs for strength, assembly and transport
- Complete documentation, drawings, BoM, CNC ready files
- Fast integration into your manufacturing workflow

Electrical Engineering and Design

- Low-voltage network design with clear, execution-ready documentation
- Customized electrical cabinets for power, control and safety
- Industrial lighting design for efficiency and safe operation
- Full integration with mechanical and automation systems

Piping Engineering and Design

- 3D piping layouts with clash detection and system integration
- Isometric drawings ready for fabrication and welding
- Clear installation plans with exact dimensions and positioning
- P&ID diagrams aligned with your process and automation

Industrial Tailored Products

- Cutting, bending and welding for complex assemblies
- Durable structures with certified corrosion protection
- Fabrication of containers, skids, structures and pipe modules
- Seamless transition from design to production

Containerized Equipment

Everything comes integrated and tested

What matters for you:

- 100% customized design based on your equipment and space
- Steel structures, built for transport and harsh environments
- Integrated electrical, control and automation systems
- Fast deployment, ready for immediate operation
