Acquisition of various patents and certifications

Aug Oct

19 Founded Bokyong Manufacturing (based on patent registration) Mar Bokyong's company-affiliated research institute approved (KOITA Mar 20 2020111476) **APR** Certified as a venture (No. 20200401051) May Registered a plant (No. 282002020468097) Jun Obtained ISO certification for quality (Q309120) Jul Selected for the 7th Startup-Nest by Korea Credit Guarantee Fund Oct Attracted investment from Korea Venture Investment Corp. (investment linked to startup support) Oct Selected for Korea Institute of Industrial Technology's future mobility support project Dec Selected as one of the final 10 teams at Demo Day of Gyeonggido Business & Science Accelerator and received the excellence prize Feb Received the silver prize at the International Exhibition of Inventions of 21 Geneva, Switzerland Won the second prize at Sungkyunkwan University Startup Contest May Received the Governor's Award at the Regulation-free Special District Aug Won the second prize at Sports Up Demo Day hosted by the Ministry of Oct Culture, Sports and Tourism Oct Certified as an excellent sporting equipment producer Nov Selected as the best valuable SMEs in Gyeonggi province Obtained excellent patent-based innovative product certification 22 Jan Feb Moved into Seoul Startup Center Feb Relocated the company-affiliated research institute to Incheon Startup Park

Gyeonggi-do Province's Promising Small and Medium Businesses

Ministry of Culture, Sports and Tourism selected 1,000 innovative companies

Category	POP-CYCLE
Sortation	Folding Bike
Driving method	Manual driving / PAS
Wheel Size	14' (406.4mm)
Weight	14kg
Material/Production method	AL alloy / Diecasting
Folding efficiency	Approximately 70%
Price	USD 670\$
Battety	-
Recommended weight	100 kg ↓
Folding method	Possible
a lighting system	a front-rear reflector
a braking system	V-Brake
Transmission (transmission stage)	three-stage internal gear
purpose	For urban use (for daily use)

Category	POP-C	YCLE-E
Sortation	Folding	g E-Bike
Driving method	Manual dr	riving / PAS
Wheel Size	14' (40	6.4mm)
Weight	16	6kg
Material/Production method	AL alloy /	Diecasting
Folding efficiency	Approxim	nately 70%
Price	E-BIKE	USD 1250\$
Motor	36v 300w Front-wl	neel BLDC hub motor
Battery	Samsung SDI 18650 Lithium-lon Ba	ttery 8.7 Ah (Basic) + Auxiliary Battery
Recommended weight	100	kg↓
mileage/Charging time	70km / Char	ge for 4 hours
Driving speed	Maximur	m 25km/h
a lighting system	a front-re	ar reflector
a braking system	Disc	Brake
Transmission (transmission stage)	three-stage	internal gear
purpose	For urban use	e (for daily use)

Excellent folding rate & folding speed: campers, in-car sleepers, and bicycle commuters

Pop-cycle

Utilization

Category	Length(cm)	Height(cm)	Width(cm)	Volume(cm³)
Size	122	99.4	52.5	636
Shrinkage	85	79	16.6	112
Rate of shrinkage	30.30%	19.52%	68.40%	82.27%

Compatibility: From children to male adults

In a life cycle from child to adult, bikes are replaced more than 3 times

A product compatible with both children and adults

국가공인 KC인증 & ISO9001 & 기술임치 제품 KC Certification &ISO9001 &Technology Management Products

수상 및 인증 내역 Award and certification

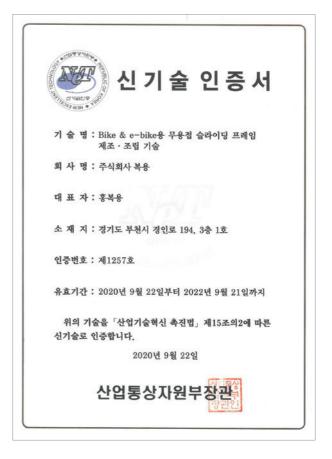

Status of subsidiary projects

원터치 탈착 배터리

One-touch Detachable battery

공유 자전거 Kiosk

A share bike kiosk

BOKYONG Co., Ltd

Big data, personal mobility, esg manufacturing, bilke sharing, last mile mobility

Company Overview

Year Established: 2019

City / Country: Bucheon / Republic Korea

Business Category: Manufacturing

CEO: Hong BOK YONG
Investment Round: Seed

Capital Investment: US \$ 43,000

Website: http://bokyong.website.ne.kr/proposal/m_003.html

Business item

BOKYONG

Introducing the one-touch sliding bike pop-cycle based on human body size big data. Pop-cycle adjusts the frame, handle, and pedal heights in 3 seconds to control buses and subways.

It can be used quickly and easily anytime, anywhere, including escalators and elevators. It is a bicycle pop-cycle that connects all spaces in your daily life and shares every moment of movement.

Acquired Technology / Competitiveness

- 1. Frame production through die casting manufacturing process
- 2. Assembly of finished products without welding
- 3. Ease of A/S, where only defective parts can be directly replaced
- 4. Color can be customized for each frame part

Strategy to Enter the Global / USA Market

- 1. B2C sells to cousumers through agencies or sells online.
- 2. B2B sales agency MOU through strategic alliance
- 3. Private contract through B2G Procurement Service delivery

Business Model / Target

Mobility and parts sales to B2C, B2B, B2G

business alliance to B2B

Mobility sharing to B2C, B2G

Wholesale and retail brokerage business

Mobility R&D
