Agenda

SAFETECH INNOVATIONS

About us

In early 2011, we envisioned a safer cyber environment for companies with deep security needs. We had the knowledge and means to do it, so it was natural to establish **the first company dedicated to cyber security in Romania**.

We combine our expertise and experience with artificial intelligence to provide our clients with the necessary means to achieve and maintain the desired level of security.

We are passionate about what we do, able to innovate, open to collaboration, goal-oriented and attentive to the particularities of each engagement.

We have our headquarters in **Romania** and group companies in the **United Kingdom**, the **United States** and the **United Arab Emirates**, locations where, **in total, around 70 colleagues** work.

Since 2020, **we are listed on the Bucharest Stock Exchange (BVB)**, with the symbol SAFE.

"

We lay the foundations for a **secure digital future***, by applying the expertise of the Safetech team and artificial intelligence, to protect our customers.*

Victor Gânsac
CEO of Safetech Innovations

Profile Highlights

We have the people, skills and technology to help you overcome your cybersecurity challenges.

We run **20 partnerships with important manufacturers** in cybersecurity, with the help of which we provide you with a comprehensive portfolio of solutions and products.

Within the company we have a **research and development team** that has so far completed **software products for:**

- **Automation in the information security management process,**
- **Using Honeypot technology in industrial control systems,**
- **Mobile malware detection and investigation.**

We deliver:

✔ **Security management consulting services**

✔ **Security assessment, testing and audit**

✔ **Incident monitoring, detection and response services**

✔ **Professional cybersecurity system integration and system administration services**

✔ **Advanced analysis for critical cyber security incidents**

✔ **Cyber security training services.**

Profile Highlights

Complementarily, we provide **complete outsourcing of security operations** via **Safetech CERT (STI CERT®), the first private Computer Emergency Response Team in Romania**.

- STI CERT is **operational for 8 years** and ensures **24/7/365** coverage.

- Serves **clients from the following industries: financial-banking, utilities, health, technology, retail, distribution, consulting, gaming**.

- Deals with a **monthly volume of over 100 billion events** captured by the supervised security monitoring solutions.

- Investigates an average of **12,000 security alerts/month**.

- Identifies and handles an average of **150 security incidents/month**.

- Currently helps to secure **over 50,000 employees**.

SAFETECH INNOVATIONS

Why choose Safetech

- The diversified portfolio, which includes **dozens of state-of-the-art technical solutions**

- The more than **600 projects we have successfully completed** globally

- **Own Security Incident Monitoring and Response Team (STI CERT®), operational since 2015, with 24/7/365 coverage, and accredited by Trusted Introducer**

- **20 technology partnerships** with top suppliers

- Providing rapid response **services of advanced analysis for critical security incidents** and recommendations for remediation

- **In-house cybersecurity software research and development team**

- **High level of certification of the company's specialists**.

Our portfolio of services

Securing critical infrastructures (ICS/SCADA)

We combine leading global technologies with our own software products to secure critical infrastructures in industrial environments.

Monitoring and responding to cyber security incidents

We provide 24/7/365 monitoring services to detect threats in real time and minimize their impact.

Advanced analysis for critical security incidents

We carry out, on an urgent basis, advanced technical investigations for critical incidents, we deliver recommendations and coordinate the client's activities for rapid remediation.

Professional services of systems integration

We design and deliver a set of software applications and hardware devices capable of functioning as a single and coherent system that meet a set of cybersecurity objectives.

Security testing and auditing

We assess the effectiveness of cyber security measures, identify security risks and vulnerabilities that can be exploited, assess organizations' compliance with legislation and certain standards.

Information security and risk management

We provide solid expertise and solutions for developing effective strategies, as well as developing and tracking action plans.

Cyber security consulting

We develop and implement policies and procedures, as well as technical controls to protect you against cyber threats and ensure regulatory compliance.

Cyber security training

We provide training on cyber security best practices and ongoing security awareness services for recognizing and dealing with phishing attempts.
