

Ultimate Locker Experience

Storing personal or business items is very important. Secure, secure and functional storage that is easily accessible. As easily as possible. When we want to, from anywhere we want to and as we want to. With as little interaction with the locker. As we have more important things on our mind.

Metra Smart Locker Systems transform your existing and new lockers into a future-proof, user-centered, personal smart storage experience. Innovative solutions that minimise user interaction with the locker doors and ensure a higher level of hygiene.

The locker user experience that influences the well-being of the locker user, their effectiveness at work and their perception of the facility and organization.

User-centric & Future-ready

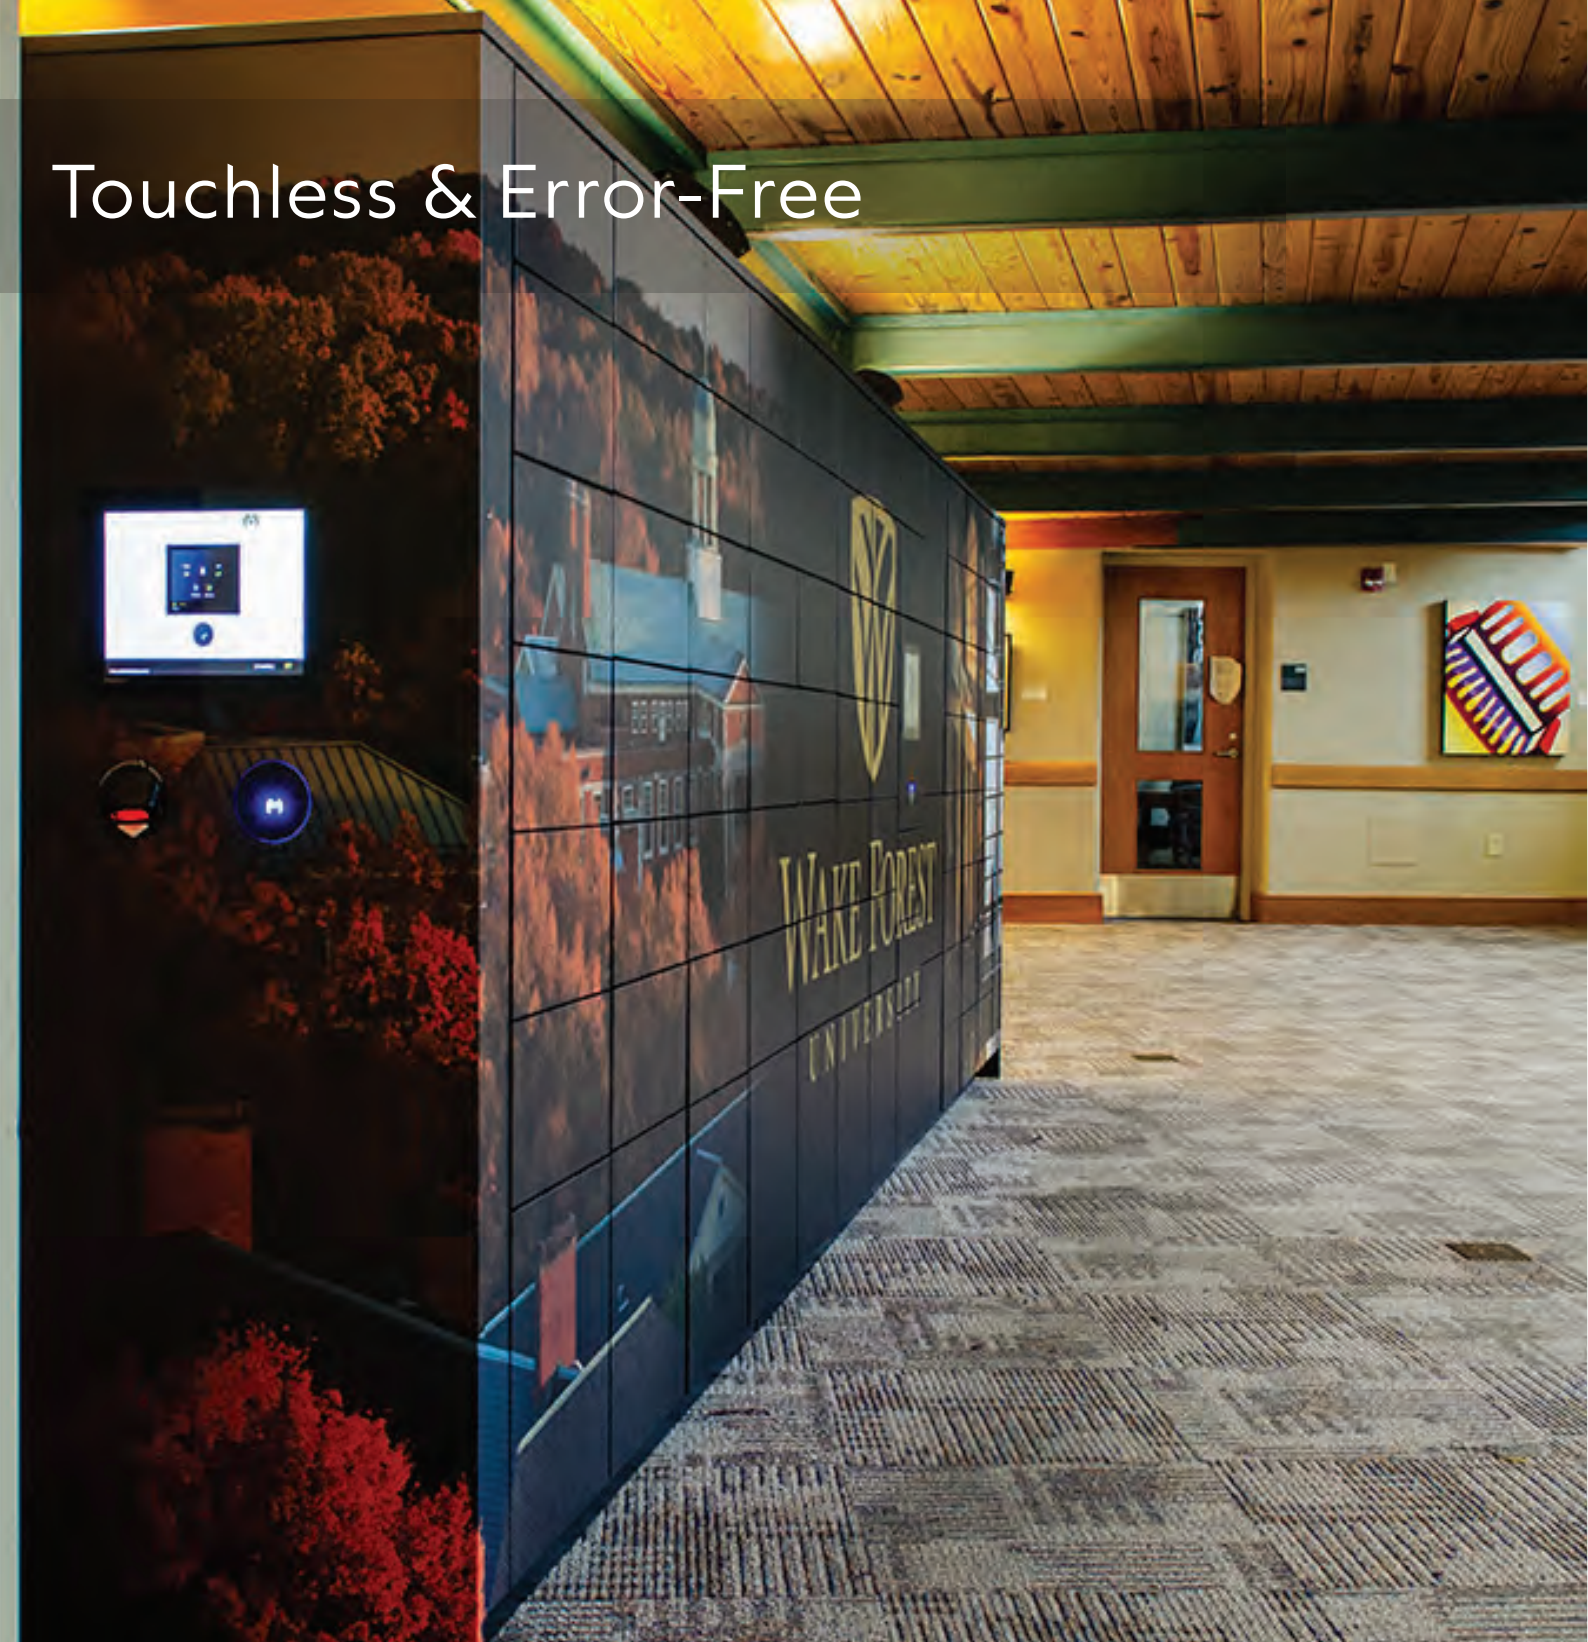

Safe, smart, visually appealing and user-centric work or study environment makes all the difference. It provides peace of mind, uplifts the spirit and improves focus and collaboration. The characteristics of highly effective people.

Making your workplace lockers smarter means providing the highest levels of security, flexibility and usability to their locker users. A touchless, highly individual and user-friendly experience will in many positive ways affect your employees, your workplace dynamic and ultimately your business.

Instantly enable more hygienic, collaborative and organized work processes in traditional, hybrid or other work arrangements or office configurations. Instantly and remotely adapt locker use in real-time, from a single user/locker to thousands of lockers and users in multiple locations.

Touchless & Error-Free

Optimizing indoor or outdoor delivery and pickup processes can affect workflows, stress and well-being, delivery costs, and revenue. The bigger the organization, the more organizationally and financially significant those effects can be.

Metra parcel locking solution enables using your parcel lockers in safer, touchless, and easier ways to deliver or collect various items. Easily facilitate and remotely manage inbound, outbound, or in-house drop-offs and pickups for different types of users, while making the process and the user experience secure, discreet, hygienic, convenient, easy, and error-free.

It's time you start noticing all the individual delivery and pickup processes in your organization and elevate them to a new level, improving the well-being, experience, and satisfaction of your employees, customers, students, patients, or others.

Contactless & Secure

Customers who use payable rental lockers expect the smoothest, most user-friendly experience for their money. From your perspective as a rental locker provider, you want the most secure, reliable, and maintenance-free solution, so there are no related costs or customer complaints. After all, it is a significant revenue stream for you (or it can be).

Your tailored smart rental locker solution should perfectly suit the needs of your customers and those of your business, both at the same time, without any compromises.

Regardless if it is a classic POS locker rental, a self-service locker rental, or a combination of both. Or a rental service, where accessing a locker is just a step in using the rental service (f. Ex. vehicle rental).

And regardless of the configuration, size, or material of the lockers and the types of payment options you would like to offer in your successful locker rental service.

Frictionless & Hygienic

Guests and visitors of your water park, amusement park, ski resort, or other facility are usually among the most demanding (locker) users. They don't like any moment of their free time going to waste. They are in your facility for one reason - to have a great time and to create lasting memories.

They expect to use smarter lockers with minimal user interaction to unlock and access them, as they usually carry skis, towels, or else in their hands. A smarter locker means a frictionless locker experience, where the locker safely stores their personal, valuable belongings and instantly provides easy and touchless access.

Metra smarter locker solutions for modern leisure facilities range from standalone plug & play locker systems to complete "entry to exit" solutions, including entry and exit control, smart locker system and cashless payment system with complete fiscal and locker management. Make sure your guests leave with the best experience and a wish to return soon.

Reliable & Functional

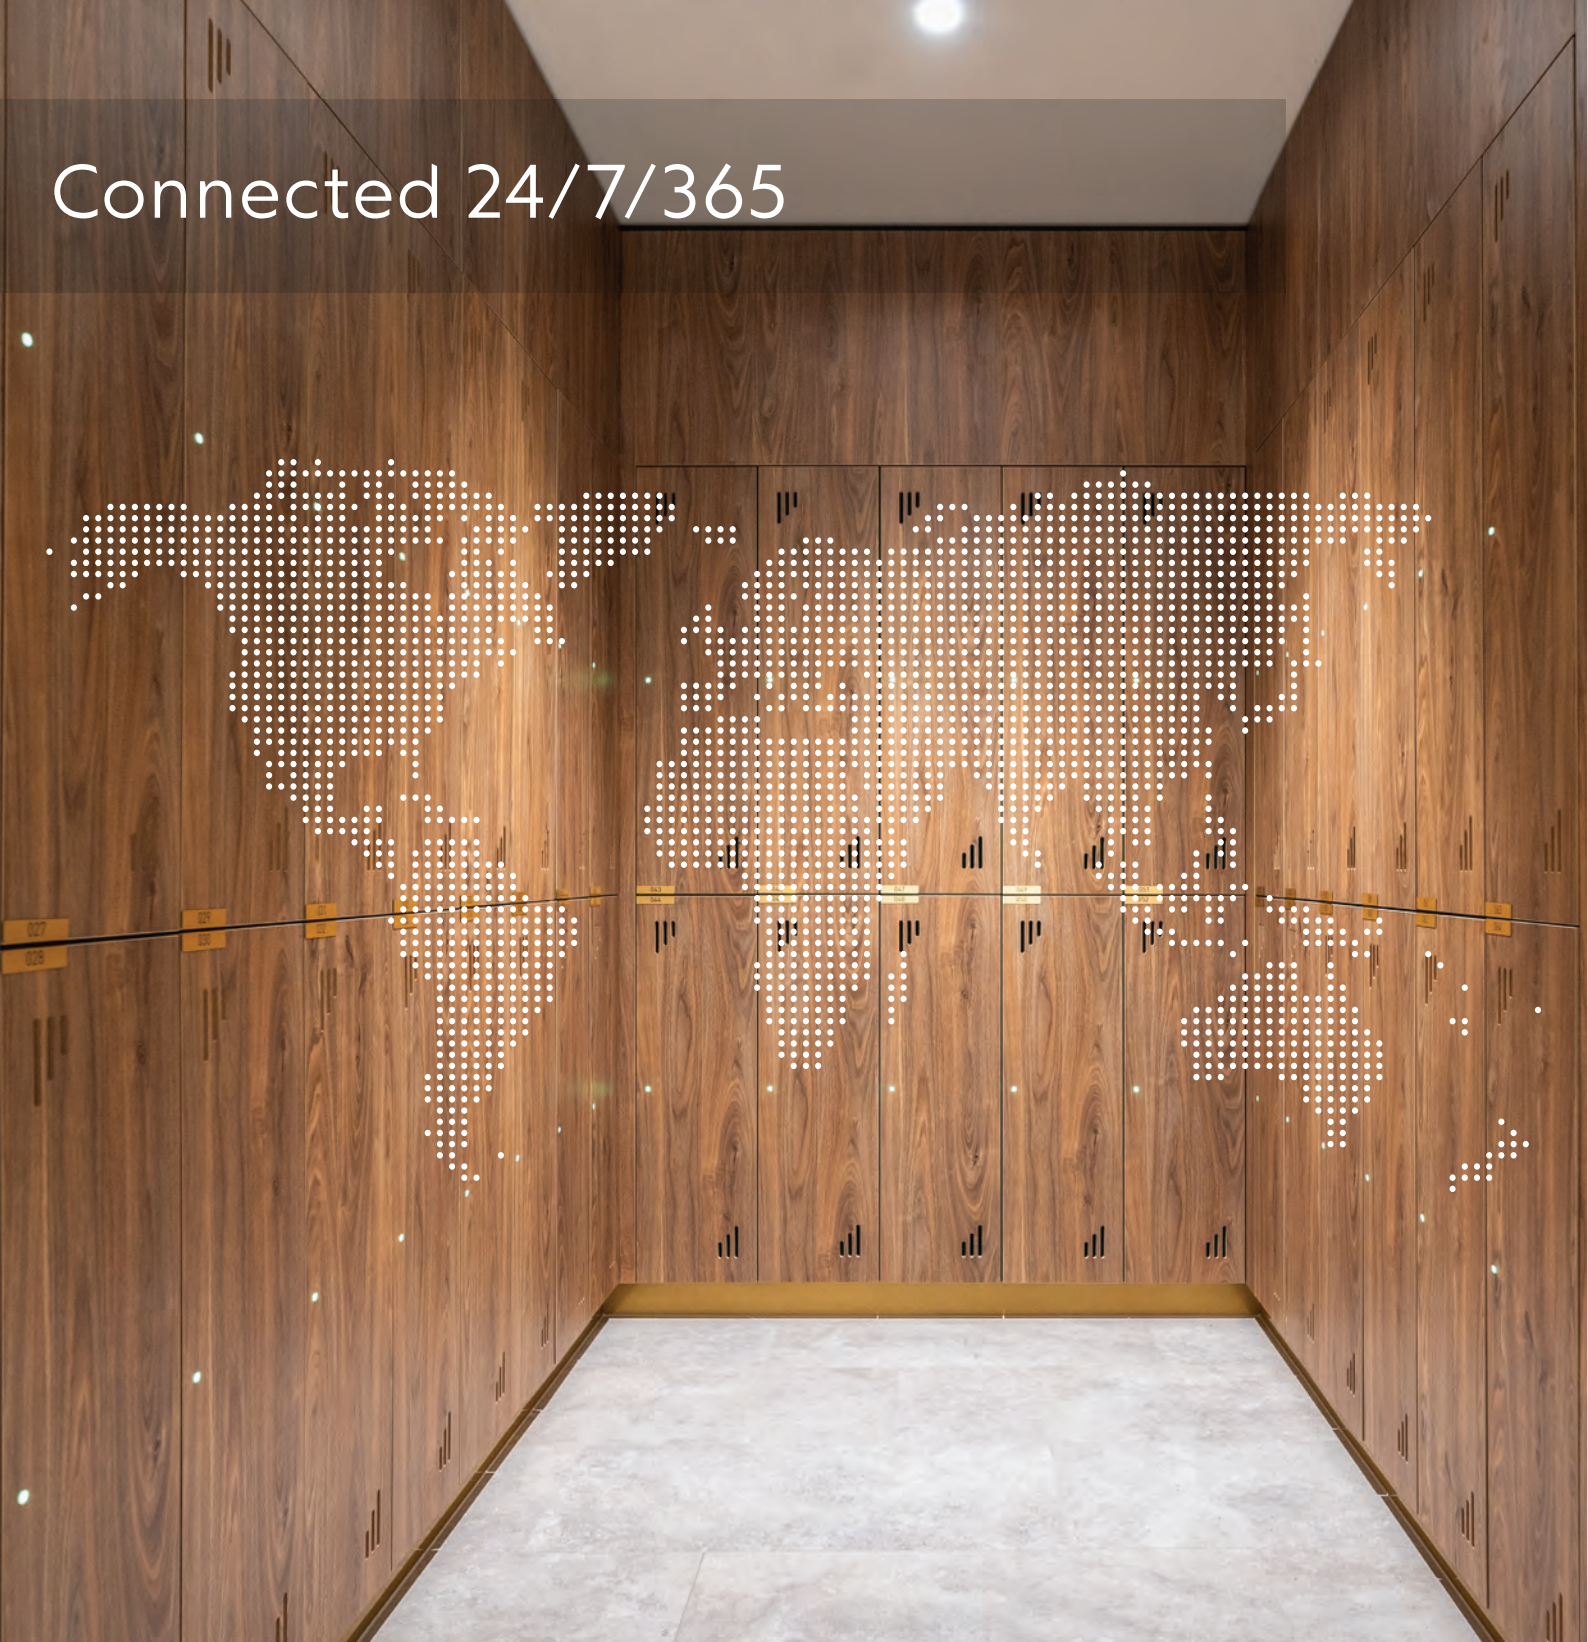

The power of the electric motor of the Metra smart locks and the innovative Metra smart locking system equips your lockers with world-renowned security, reliability, flexibility, and functionality.

The interior designers appreciate the clean-line locker doors' modern appeal and creative potential. Locker users enjoy peace of mind with smarter anti-theft and anti-vandalism features of Metra smart locks that ensure their valuable personal belongings are securely stored but immediately available.

Even in the most challenging leisure environments, the performance of Metra electronic smart locks and your renowned property remains impeccable.

We always try to surpass your expectations. We are constantly raising the bar that defines the locker use experience for you and your users. Make a wise business decision.

Connected 24/7/365

Every Metra smart locker project is unique. Customers may have different questions and need additional information. They might have specific wishes and requirements. The uniqueness and usefulness of each Metra smart locker solution are why we enjoy it so much (and have enjoyed it for the past 30+ years).

We love rising to the occasion. We always try to exceed the expectations of you, our partner, and each locker user. The first impression is essential. We ensure your Metra smart locker users expect and get the highest level of smart locker experience at all times. Over years and decades.

In the last three decades, we have established long-lasting relationships and even true friendships with some extraordinary people worldwide. A global family of (Metra smart) partners, customers and locker users.
