

Bioterramar

Innovative environmental solutions protecting sea and land across the Mediterranean

About Us

Founded in 2023, Bioterramar IKE is at the forefront of developing cutting-edge marine anti-pollution systems and pheromone-based biocontrol technologies. Located in Athens, Greece, we are dedicated to ensuring sustainable ecosystem protection throughout the Mediterranean region.

Our Mission

Our mission is to foster robust collaborations across the Mediterranean to achieve cleaner waters and resilient ecosystems. We aim to be a critical player in environmental innovation, working alongside partners to create sustainable solutions.

Our Expertise

- **Marine Anti-pollution Systems:** Design and implementation of systems to combat marine pollution.
- **Stormwater Management:** Advanced strategies for effective stormwater control.
- **Pheromone-based Biocontrol:** Innovative biocontrol technologies utilizing pheromones.
- **Environmental Pilot Projects:** Initiating and managing pilot projects to test environmental solutions.

Featured Project

Pilot Installation of ID-O® Waste Baskets

Location: Municipality of Agia Paraskevi, Greece

This project involves the deployment of our innovative ID-O® waste baskets, designed to reduce marine litter and improve waste management efficiency. It represents a significant step toward cleaner urban environments and water bodies.

Partners

We collaborate with leading organizations to enhance our impact:

- **Pollustock (France)**
- **M2i Life Sciences**
- **Bioassays**
