## ARE YOU GOING TO DO A CATCHMENT ANALYSIS TO FIND HOTSPOT CONTAMINATION? OR SEWER OVERFLOW?

Then rent EMMA, a land-based measuring station, which, using a pump system, can easily/efficiently take your measurements from drain outlets, ditches and streams - with data on the screen!

- **EMMA** can be set to measure at different intervals and upload times
- **EMMA** sends data to Just-measure, where you will receive a Login - or data will be forwarded
- **EMMA** removes sediment and dead biomass continuously using a built-in filter system
- **EMMA** customizable choice of sensors such as nitrate, dissolved oxygen, pH, turbidity, redox, phosphorus, ammonium and flow/water level meter

*Our mission is to help you create an overview and intervene where needed, using innovative and effective services*

## IS OXYGEN DEPLETION A PROBLEM YOU WANT TO KNOW MORE ABOUT?

Then rent BOOI, which can measure from a depth of 5 meters and report on the ongoing development of oxygen content, which indicates water quality – with data directly on your screen!

- **BOOI** can be set to measure at different intervals and upload times
- **BOOI** sends data to Just-measure, where you will receive a Login - or data will be forwarded
- **BOOI** is equipped with self-cleaning sensors to reduce inspection time
- **BOOI** can be adapted to your choice of sensors e.g. oxygen, turbidity, conductivity

*Our mission is to help you create an overview and intervene where needed, using innovative and effective services.*
