

Ultra-Energy Efficient Air Filter Fact Sheet

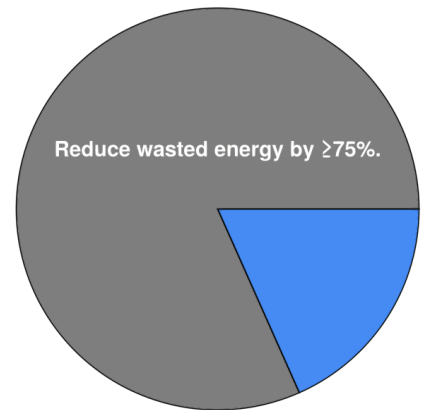

Filters are secretly sapping the energy from the system, making your HVAC not as powerful as expected. However, filters are needed to protect your HVAC, or they will quickly become dirty and breakdown early.

Keno Nanofiber Filters

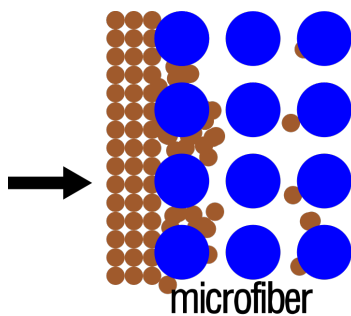

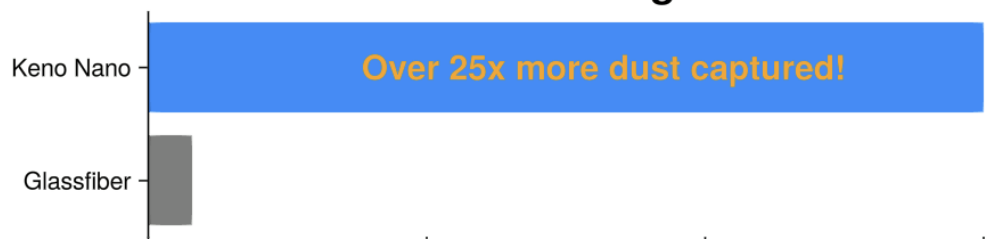

Can be made to fit your HVAC system's needs. Our filters not only protects your HVAC, but your health too. Nanofibers filters the smaller, more harmful particles more readily than traditional glass fibers while allowing air to pass through more easily, upgrading your system to be more powerful, longer lasting, and healthier for its users.

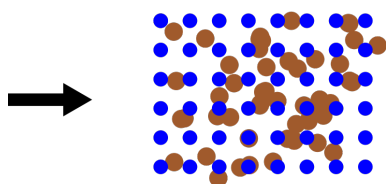

One of the easiest low-cost way to upgrade your infrastrucuture to comform to the green-building trends.

Dust needed to clog the filter

microfiber

nanofiber

Nanofiber capture dust deep in its matrix, increasing the amount of dust it can hold without blocking the air.

Patents and Awards

Patented multi-module charged-PVDF nanofiber filter-media
Gold Medal from Exhibition of Inventions Geneva 2014
Special Award from Romania Ministry of Education 2014
Finalist of Austria Sustainable City Solution 2024
