The Naxida Azienda Agricola has always been attentive to quality and environmental sustainability issues, for this reason we adopt strict production protocols and make use of the most qualified technical assistance with several and accurate controls directly on the field of production. We periodically carry out chemical-physical analyses of the soil, leaf analyses, as well as the analyses of irrigation water and accurate analyses of the products obtained.

These important certifications place the NAXIDA at the same level of the best national and European companies in the production of the high quality agricultural products.
