EXECUTIVE SUMMARY

EmailTree AI (Email Operating System) is an advanced end-to-end AI email automation solution that **enhances security and productivity** by **automating email processing, management and task execution.**

EmailTree AI reads and comprehends emails and text requests, classifies them, detects intents and key information.

Leveraging AI, it accesses relevant custom databases to generate intelligent responses and perform tasks seamlessly across human, API, and Robotic Process Automation (RPA) interfaces.

EmailTree AI offers high efficiency with minimal computational resources, significantly improving security and customer service and operational efficiency while ensuring data security and compliance.

DIFFERENTIATION

EMAILTREE.AI

End-to-end Email Complex Processes & AI Automation

Email Classification & Segmentation

Spam & Phishing Detection & Segmentation

Custom Expert Knowledge

Task & Workflow Automation

Computation Power Demand Optimization

Integration & Deployment

Ai driven, low-code content platform

Execution & Enterprise Integration

Microsoft
Zendesk
ServiceNow
SalesForce
UiPath (and top 5 RPAs)
Celonis
Chrome

Channels

Emails
API
Documents
Chat / Messaging
Web portal / Forms

Security by design:

EmailTree protects customers' data by the way the platform is build and deploys
GDPR Compliant, ISO 27001 in progress
