Ground clearance	400 mm
Maximum driving angle (side)	30°
Maximum incline (uphill)	65°
Overhang angle front/back	89°/53°
Water forcing depth	1000 mm
Ramp angle	34°

## About FOX

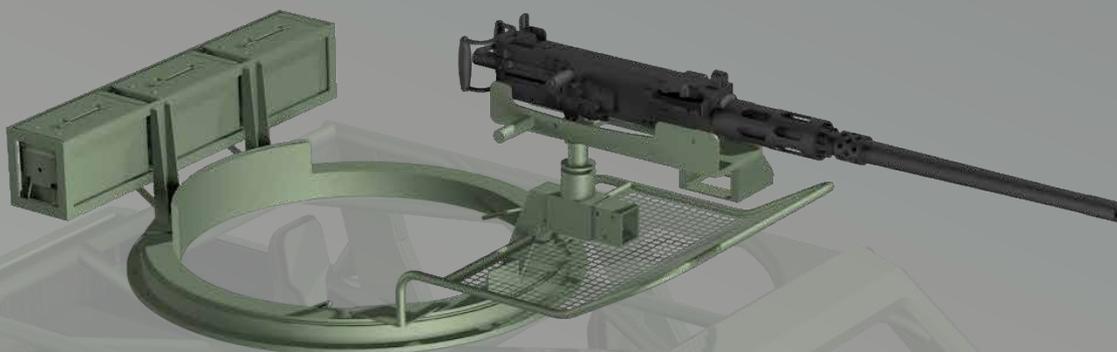

VR FOX is a military four-wheel-drive people carrier, developed and adapted to army needs in its very smallest detail.

Design and functionality are tailor-made to ensure safety, sustainability and to meet all NATO standards. Interior of the car has been designed around a soldier, with main focus on easy entry-exit, safety and driving comfort.

FOX is equipped with various high-tech systems that help to navigate through difficult terrain, such as narrow places in forests, swamps and even up to 1m deep water.

The vehicle has many unified parts, which make FOX easy to maintain and requires much less spare parts. For example, all 8 suspension arms, all 4 uprights and all 4 shock absorbers and springs are equal in order to simplify supply process and reduce costs.
