

Who we are

CANDLE Ireland brings together national cancer, genomic and data infrastructures to enable federated, harmonised cancer research across Ireland and Europe.

What we are working on

We are building federated cancer research infrastructure, harmonising genomic and clinical data, and developing AI, digital pathology and precision oncology tools.

What's the one thing we need next

We need sustainable funding, secure data models, skilled technical workforces and long-term support for research software and infrastructure.

5 years Mission Cancer:
Stronger Through Connection
