

EMJMETALS

SIA EMJ metals

EMJ Metals was founded in 2010, with industry experience since 2005. We specialize in sheet metal cutting and bending, producing custom parts for various sectors – construction, energy, mechanical engineering, woodworking, shipbuilding, mining, defense and more.

Our motto is "win-win" – we believe in long-term, mutually beneficial partnerships. With extensive material stock and advanced equipment, we ensure competitive prices, short lead times, and a customer-focused approach.

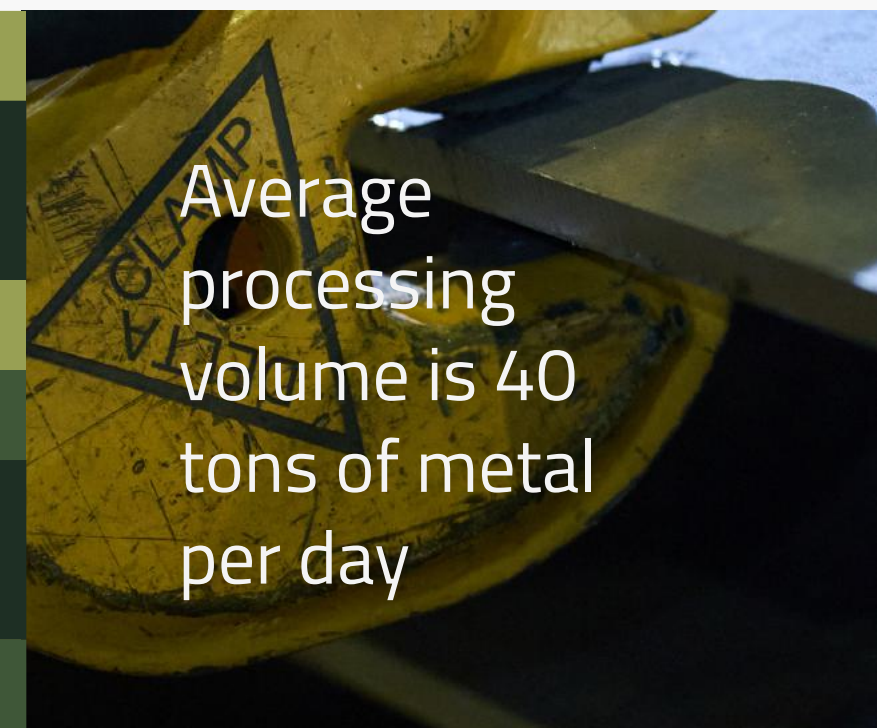

Production facilities:
11 500 sq. meters

For the defence sector, full in-house production

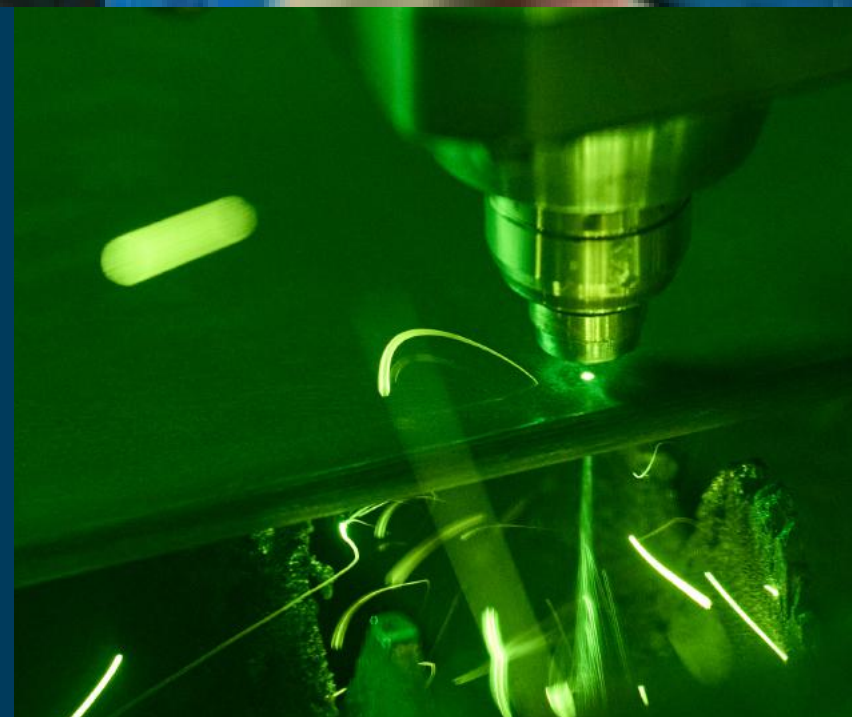

emjmetals.lv

Average processing volume is 40 tons of metal per day

Laser cutting tables up to: 8150*2600 mm

Additional services:
welding,
machining,
galvanizing,
painting

*upon request availability

Plasma cutting table layout up to 4000*20000 mm with bevel cut, drilling, threading

ISO 9001:2015
ISO 14001:2015
ISO 50001:2018
AQAP 2110:2016
www.tuv.com
ID 9105086953

We can bend up to 20 mm s355MC steel with bending length 8000 mm @ 125 tn./m

Export to Baltic, Nordic, Benelux (references upon request)
