

UKRAINIAN MANUFACTURER OF NONWOVENS

We work for the following industries:

- ✓ light industry
- ✓ furniture industry
- ✓ home textiles
- ✓ filtration
- ✓ defense industry
- ✓ construction
- ✓ landscape design

We have our own sewing and quilting lines

20+ years on the market

6 technologies

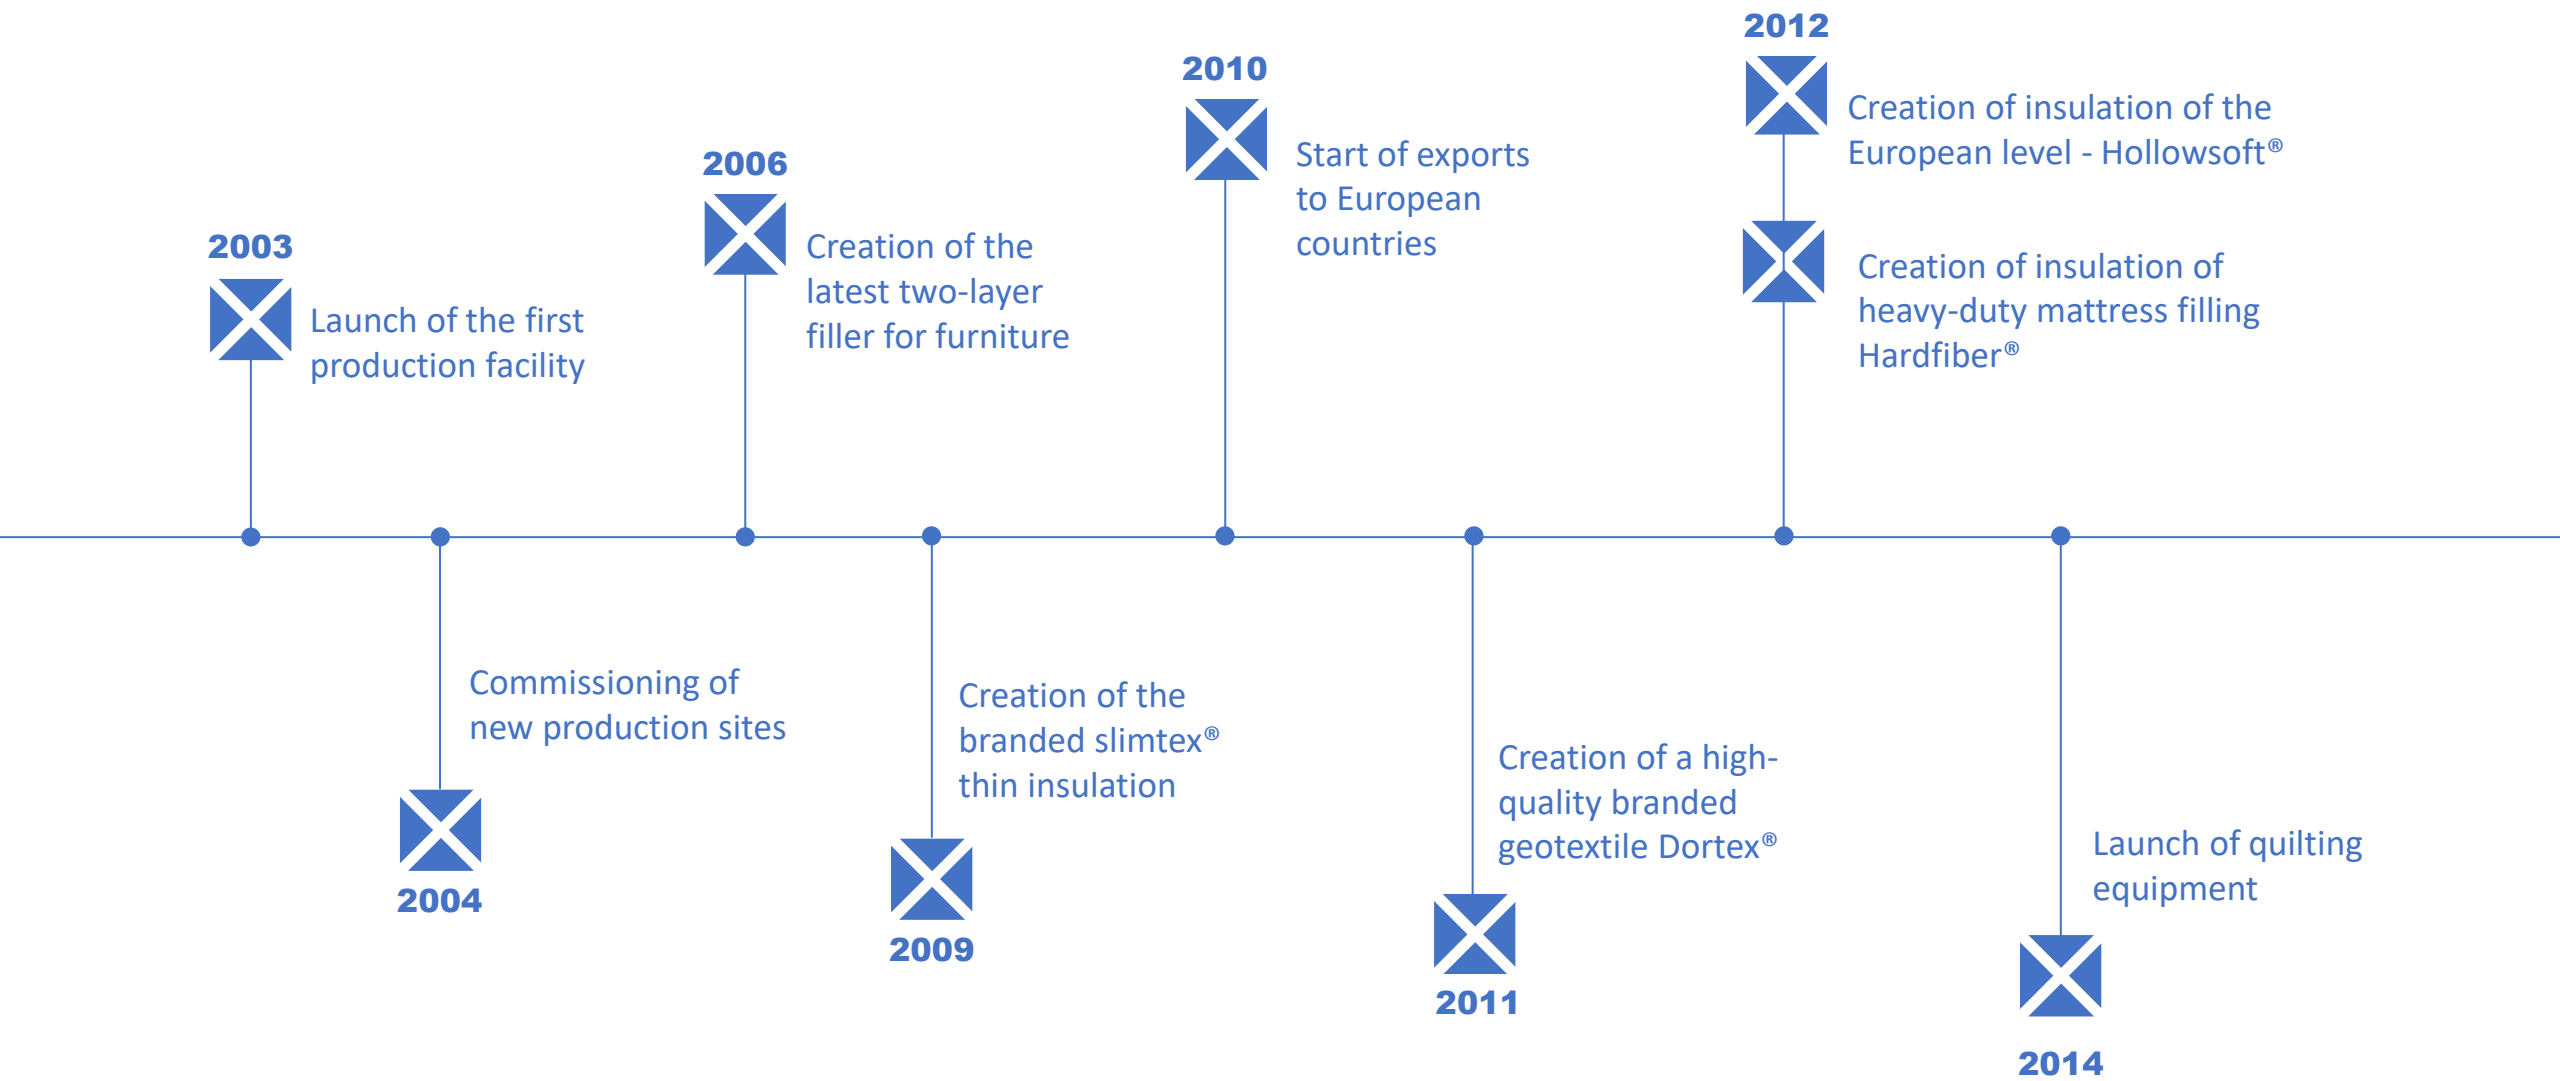

9 production lines

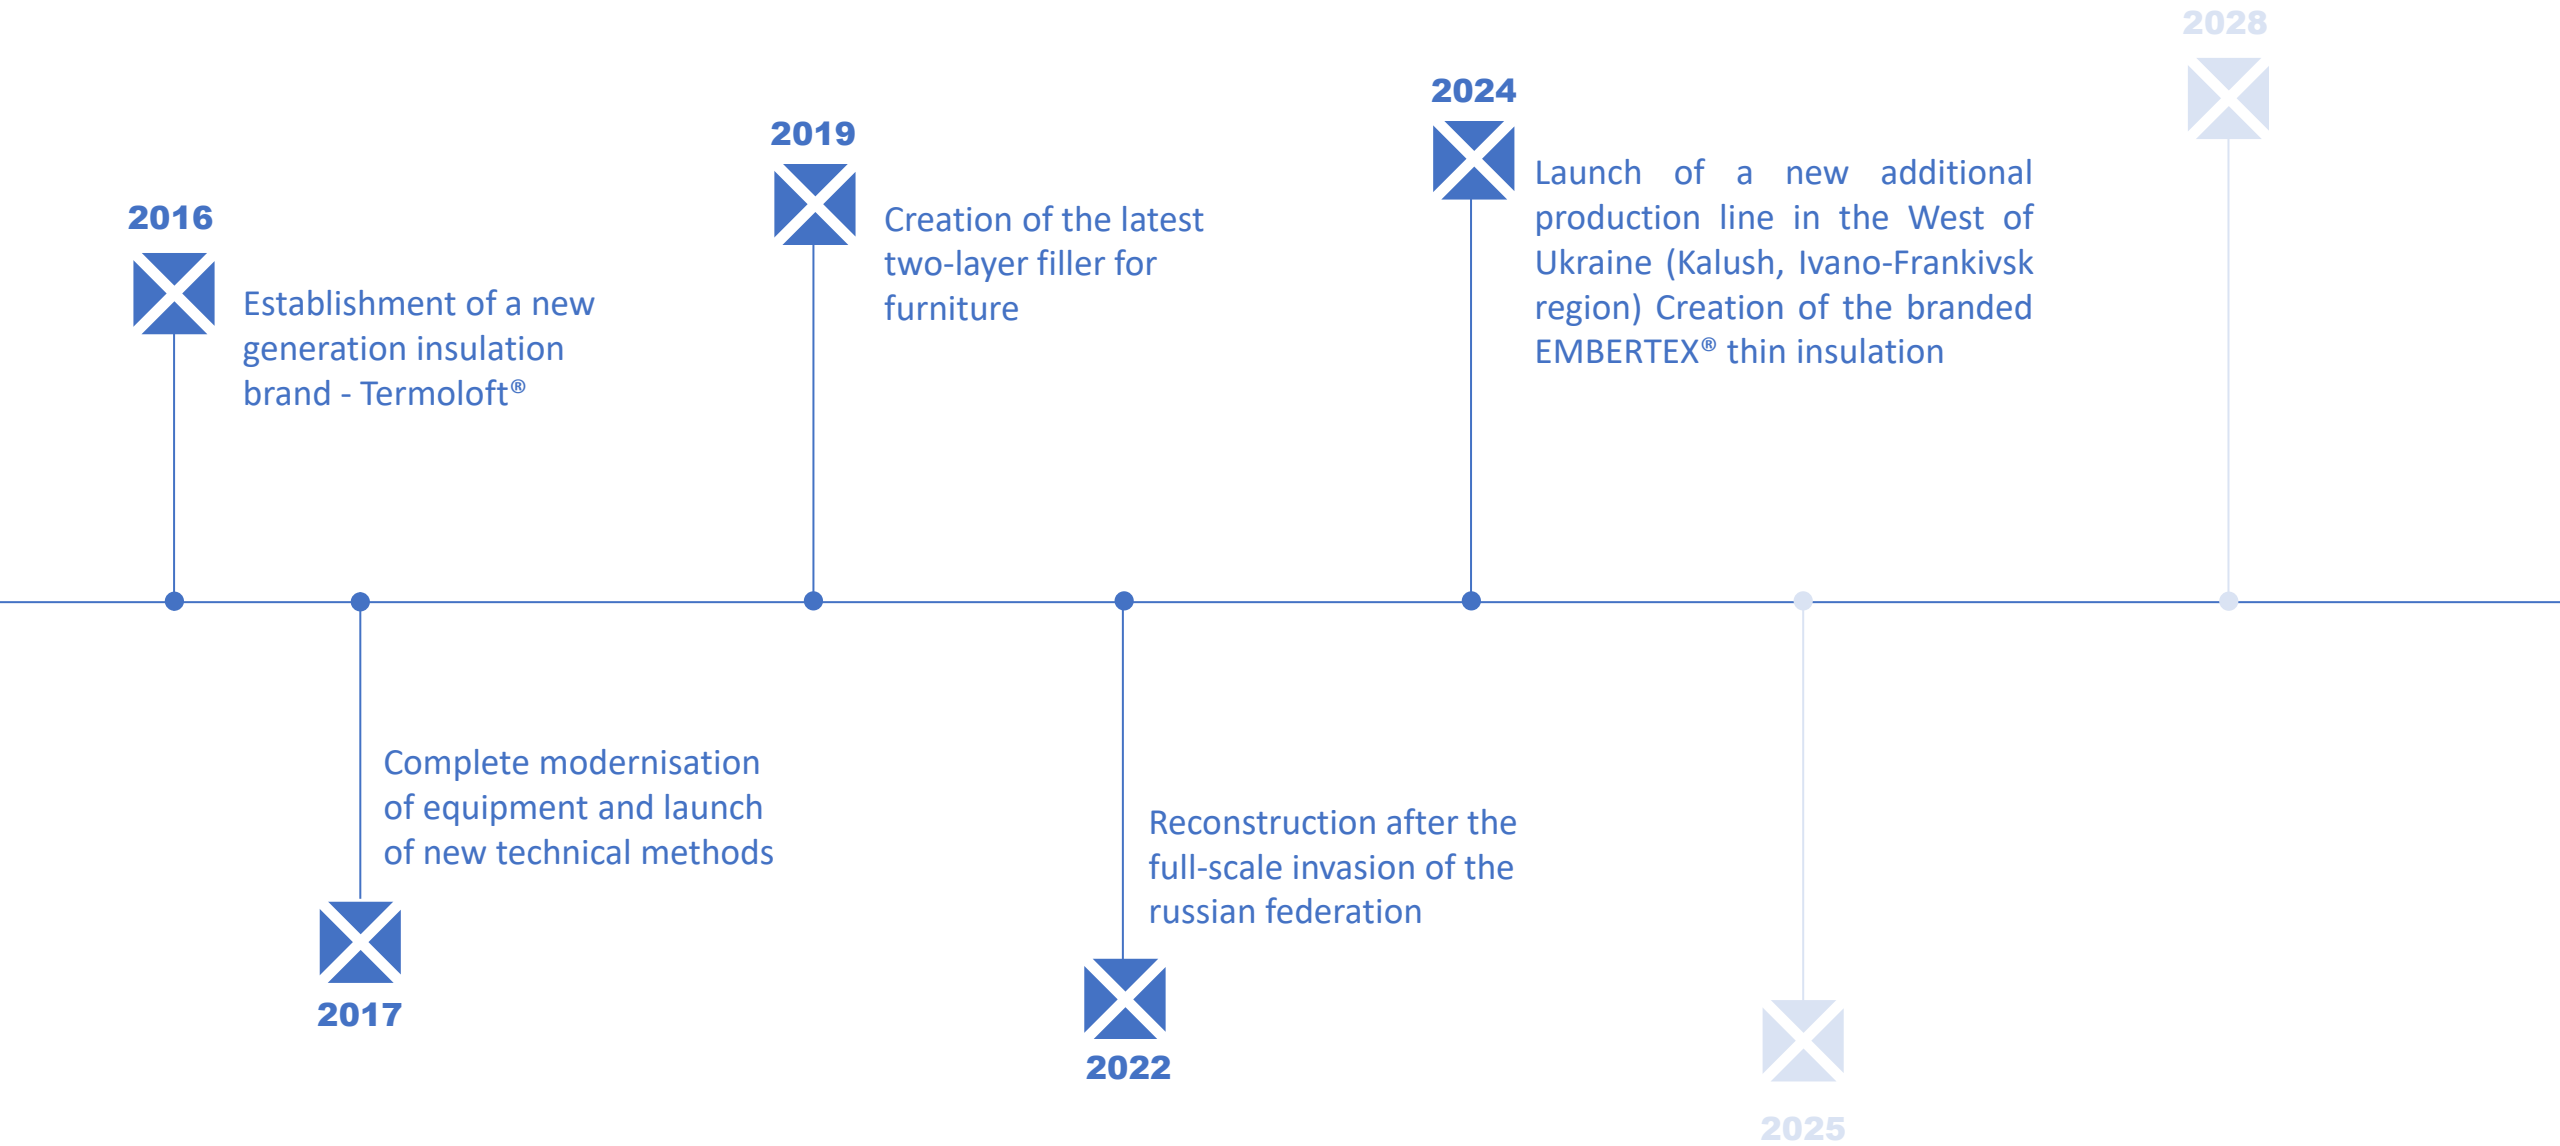

180+ employees

3450+ SKUs in the company's portfolio

exports to EU countries

2016

Establishment of a new generation insulation brand - Termoloft®

2019

Creation of the latest two-layer filler for furniture

2024

Launch of a new additional production line in the West of Ukraine (Kalush, Ivano-Frankivsk region) Creation of the branded EMBERTEX® thin insulation

2028

2017

Complete modernisation of equipment and launch of new technical methods

2022

Reconstruction after the full-scale invasion of the Russian Federation

2025

Technologies

Non-wovens:

Annual capacity: up to 5 000 tons

- 3 needle punching lines with calendering machine
- 2 air-through-bonding-lines
- 1 airlaid production line (set to start in 2025)

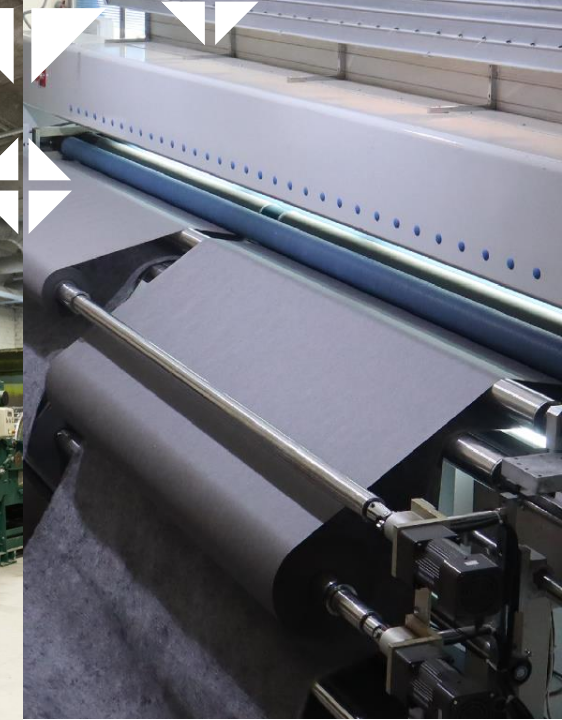

Textile Recycling:

Annual capacity: up to 3 500 tons

- 1 tearing line
- 1 baling press
- 1 fiber-to-fiber unit (set to start in 2025)

Sewing:

- 3 quilting machines
- automatic cutting room (set to start in 2025)
- sewing equipment
- 1 automatic molding machine (set to start in 2025)

For garment industry

01 Self-extinguishing insulation

02 EMBERTEX™ flame retardant insulation

03 TERMOLOFT® insulation

04 Hollowsoft® insulation

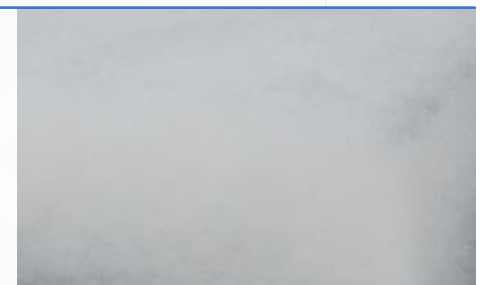

05 Slimtex® thin insulation

06 Synthetic down insulation

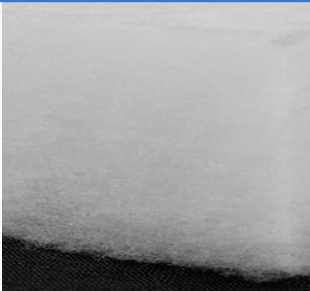

07 Silicone insulation

Fillers for furniture and home

01 Hardfiber®

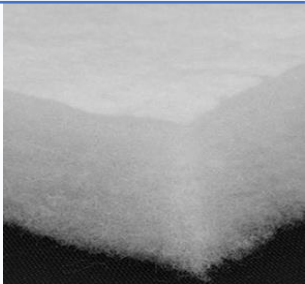

01 Aeropuff™

01 Filler wool

02 Termo filler

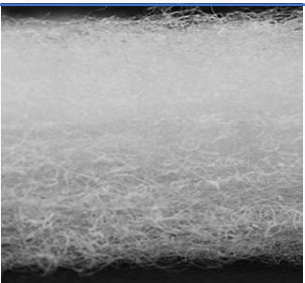

02 Filler cotton

02 Filler bamboo

03 Furniture filler

03 Filler "ball"

03 Thermofelt

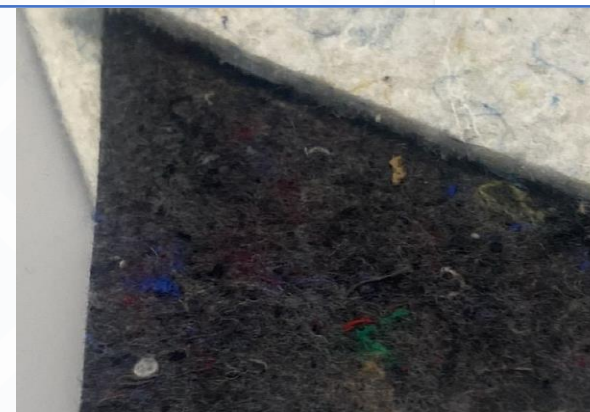

Materials from recycled fibre from fashion industry

01 Novoisol™ wall insulation

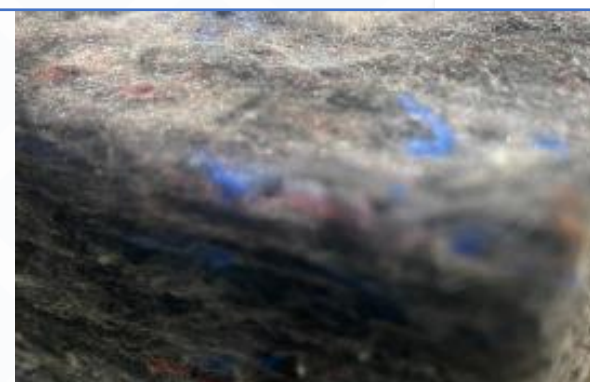

03 Underlayment for Novoisol™ laminate flooring

02 Frame for mattresses

04 Underlayment for Novoisol™ laminate flooring

For building

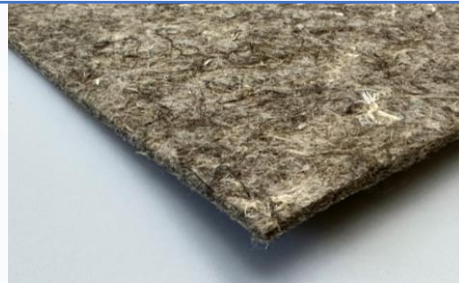

01

Novoisol™ wall and roof insulation

02

Underlayment canvas
Novoisol™

03

Novoisol™ interlocking insulation

04

Novoisol™ recycled fibre building insulation

05

Dortex® geotextiles

06

Underlayment for laminate flooring

Other nonwovens

01 Insole fabric

03 Agrofibre

02 Filter fabric

04 Spunbond for clothing and furniture

Services

01 Quilting service

03 Edging service

02 Contract sewing service for mattresses, pillows, blankets and bags

04 Recycling of textile waste

Goods

01 Pillows by K.Textile™

03 Bedspreads K.Textile™

02 Blankets K.Textile™

04 Mattresses K.Textile™

FIRE RESISTANT MATERIAL EMBERTEX™

It is oxidised polyacrylonitrile fibre, a flame retardant material that has a number of features that are important in many areas.

- ✓ does not burn, melt or drip
- ✓ provides a high level of heat and sound insulation
- ✓ lightweight and comfortable to use
- ✓ electrical conductivity: low (has dielectric properties)

Application

- + Heat shield
- + Flame retardant barrier
- + Thermal barrier
- + Footwear
- + Aprons
- + Mittens
- + Fire blankets
- + Thermal protective clothing
- + Jackets

Index	Produce
Density	200 to 600 g/m ² +/- 7%
Canvas width	1,000 mm to 3,000 mm +/- 2%
Canvas length	20 m to 75 m +/- 2%
Operating temperature	300 C
Maximum operating temperature	500 C
Flammability class	A2

Dortex[®] geotextile. The ultimate solution

Dortex[®] geotextile is your dependable solution for construction, landscaping, gabions and roadworks. It offers environmental safety, exceptional strength and ease of use. Dortex[®] geotextile provides robust protection against ruptures and deformations, stabilises soil and guarantees the longevity of any project, be it reinforcing slopes, constructing drainage systems or building gabion structures.

High strength and durability

Dortex[®] geotextile offers exceptional resistance to tearing, chemicals and UV radiation, ensuring long-lasting performance in any condition.

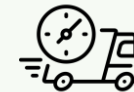

Environmental safety

Dortex[®] materials are crafted from eco-friendly components that ensure environmental safety.

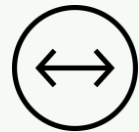

Certified quality

Dortex[®] geotextile is certified for conformity with ISO standards, confirming its superior quality.

Prompt delivery

We ensure speedy delivery of Dortex[®] geotextile across Ukraine, tailored to the specific needs of each client.

Variable surface density and width

We offer a wide range of geotextile fabrics with different surface densities (from 100 to 800 g/m²) and widths (from 1 to 4 m).

Application of Dortex® geotextile

01 Road construction

Enhancing roadbed separation and reinforcement to boost the strength and durability of roads.

02 Hydrotechnical construction

Providing efficient drainage and erosion control in hydraulic structures.

03 Roofing systems

Dortex® geotextile is used in roofing structures to form a dependable barrier that safeguards against leaks, enhances ventilation and prolongs the roof's lifespan.

04 Gabions

Dortex® geotextile safeguards against deformation and outwash, enhances drainage and reinforces the gabion base, boosting stability and durability.

05 Geo-ecological construction

Use in environmental protection projects, such as coastal and slope stabilisation.

06 Landscape design and horticulture

Weed control, creation of artificial ponds and stunning landscape designs.

Technology department

K.tex Technology Department is a powerful team of professionals constantly learning and mastering new achievements in the science of nonwovens. Our technologists are ready to develop together with you the product that will fulfil your task quickly, economically and efficiently.

Quality control

Quality control of K.tex products is carried out at every stage of work - from the moment of receiving raw materials to the moment of vacuuming and packaging of goods.

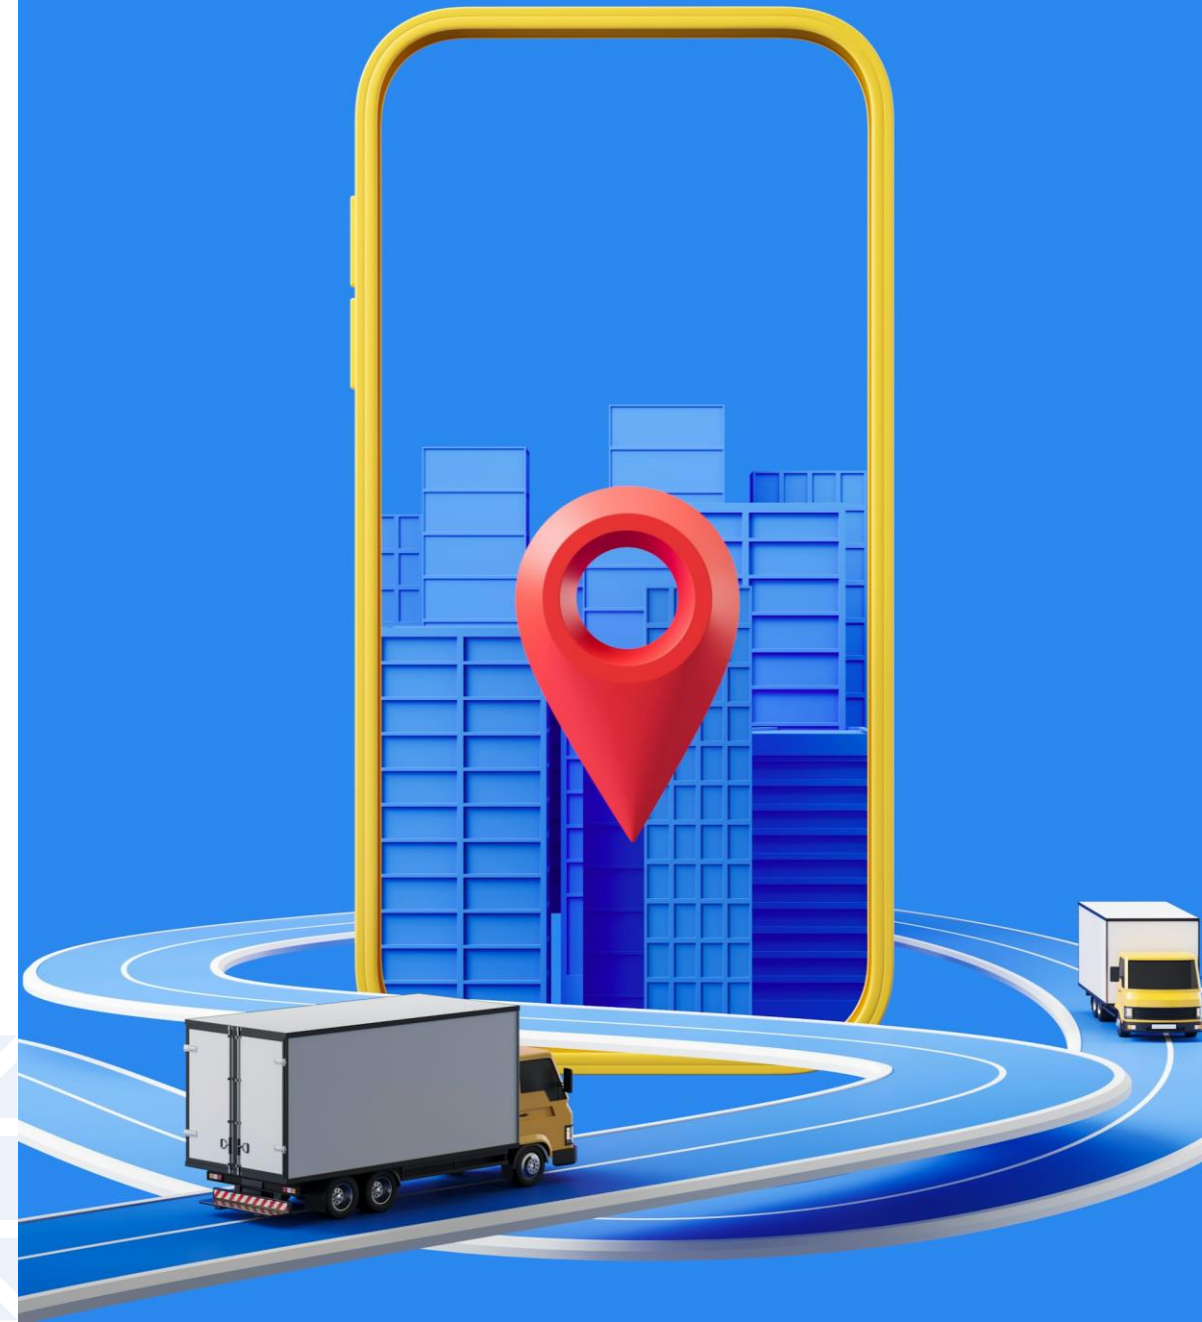

The quality control department accompanies the customer's order along the entire production line and thus we achieve high technical characteristics for each order.

Logistics

K.tex logistics department will promptly select the transport by which you can deliver the goods or help you order vehicles from any transport company.

New challenges – new opportunities

K.tex development in Ukraine during the period of full-scale war

In March 2022, K.tex launched an additional nonwovens production line in Kalush, Ivano-Frankivsk region.

New facilities and jobs are working for our victory. Powerful state-of-the-art production lines have been installed in Kalush, which allow us to significantly increase the speed of delivery of finished products to our customers.

Social initiatives of K.tex

IDP Pack: K.tex cooperates with the NGO Association 911 and the Ministry of Reintegration of the Temporarily Occupied Territories of Ukraine. Our goal is to produce and deliver more than 10 thousand sets, and everyone can join the campaign and share their warmth. The kit includes a pillow, a blanket and a transport bag.

Support for the Rehabilitation Camp: K.tex annually allocates funds to support the operation of a rehabilitation camp for the military. Support for the Armed Forces of Ukraine: K.tex supports the Armed Forces of Ukraine in all possible ways. We donate, raise funds and help the military by providing our finished products.

Student internships. Whatever challenges we face, we look to the future and invest our resources in the younger generation. It will be the young people's task to rebuild Ukraine, so we provide them with all possible tools to find high-quality and technological solutions.

Inside matters – our credo

01

02

03

04

RAW MATERIALS

We are the kind of company that cares about the environment - our raw materials are sorted textile waste and recycled PET bottles.

PROCESSES

Thanks to modern equipment, we can create products that have no analogues in Ukraine and meet the requirements of consumers.

PRODUCTS

Our speciality is properties. We can select the product that will meet any of your needs

STAFF

Each of our employees is important. We are a company that understands that our greatest value is our people, so we constantly organise training, participate in exhibitions and invest in them.

**Cooperation with K.tex is
always the right choice!**
