AKCES NCBR SPACETECH ACCELERATION PROGRAM

Konrad Kosecki

What does Akces NCBR do?

Akces NCBR is an accelerator within the **NCBR Group** that supports the commercialization of innovations developed in academic and business environments. We help turn ideas into tangible products and services available on the market.

Our mission is to accelerate the implementation of R&D outcomes through comprehensive activities including education, pre-acceleration, acceleration, and post-acceleration.

Akces NCBR SpaceTech Acceleration Program

Akces NCBR SpaceTech Acceleration Program is a joint initiative by **Akces NCBR, POLSA, ESA BIC Poland**, aimed at supporting startups and innovators developing space technologies.

By combining resources and expertise, we offer mentoring, funding, and commercialization support.

The program connects science and business to accelerate the development and market entry of cutting-edge space solutions, with applications in both public and private sectors.

Program partners

**business
incubation
centre**
