

# AMLGO LABS

Harnessing Data and AI for Modernizing Enterprise Solutions

Sep 2024

# About Us

Amlgo Labs is a **global provider of Data Analytics and AI services** to firms across domains, sectors and geographies

**Clients**

- Corporates
- Consulting
- Health care
- Automobile & Manufacturing
- Financial & Advisory

### Global Presence

US  
Singapore  
New Delhi

- Tech-stack Coverage **70+ Technologies**
- Global Partners **5+ Valuable Partners**
- Established **2017**
- Core Expertise **AI-ML & Data Solutions**
- Resources **50+ Tech Experts**
- Recurring Customers **95%**
- Satisfied Clients **15+ Global clients**
- Fundings **Maruti Suzuki**
- Excellence Awards **Top 10 Data Analytics Startups**

# Data Solutions Offering

Functional Coverage

## Industry Coverage

**Amlgo Labs**

BFSI

Healthcare & Life Sciences

Consulting

Automotive

Financial & Advisory

- Information Technology
- Finance & Accounting (F&A)
- Sales & Marketing
- Supply Chain & Operations
- Human Resource
- Procurement

## Data Engineering & Intelligence Services

- **Data Quality & Governance:** Collibra, Informatica, Oracle Metadata mgmt., Apache Atlas.
- **SQL and NoSQL :** MySQL, MS SQL Server, Oracle, DB2, Cloudera, IBM Big Insights.
- **Cloud & Devops:** AWS, Azure, and Google Cloud, CI-CD Pipelines.

## Generative AI Services

- Large Language Models (LLMs): Our portfolio includes cutting-edge models such as **GPT-4, Llama 3, Llama2, Llama Index, Gemini, Lang chain** and **Mistral**.

## Data Visualization Services

- Create dynamic and visually appealing dashboards using tools like **Power BI, Tableau** and **Qlik Sense**

## Advance Data Sciences/Machine Learning Solutions

- AI/ML models, natural language processing, text mining, **statistical modelling**, NVIDIA AI Enterprise.
- Cognitive Services (**NLP/NLG, AR/VR, CV**)
- Recommendation Engines.

# Extensive Tool and Platform Experience – We are Tech Agnostic!

## ETL Workflows and Databases

- ORACLE
- databricks
- MySQL
- Microsoft SQL Server
- PostgreSQL
- mongoDB
- hadoop
- snowflake
- APACHE Spark
- Scala

## Data and App Hosting/Design

- Azure
- aws
- Google Cloud
- node
- ANGULAR
- React

## Data Science and Analytics

- python
- TensorFlow
- NLTK
- XGBoost
- R Studio
- colab
- IBM Watson
- Keras
- OpenCV
- OpenAI
- LLaMA
- MISTRAL AI
- LangChain

## Visualization and Storytelling

- Power BI
- tableau
- Qlik
- Google Data Studio
- Superset
- Illustration of a person at a desk with ML charts

## Project Management

- Waterfall
- Agile
- Scrum
- Azure DevOps
- Jira
- GitHub

# Engagement Models

## Full Time Equivalent (FTE) Model

- Dedicated analysts, and managers who work as an extension to client teams
- Analysts build expertise on client-specific culture, context, and best practices cohesive engagement
- All time availability of niche skills in data engineering, analytics and data science field across domains and industries.

**Greater Efficiencies and Productivity**

## Retained Capacity

- Cost effectiveness of a dedicated team, along with the flexibility of project-based, on-demand engagements
- Client buys defined capacity per year / quarter and Amlgo labs analysts with sectoral/functional expertise on requests

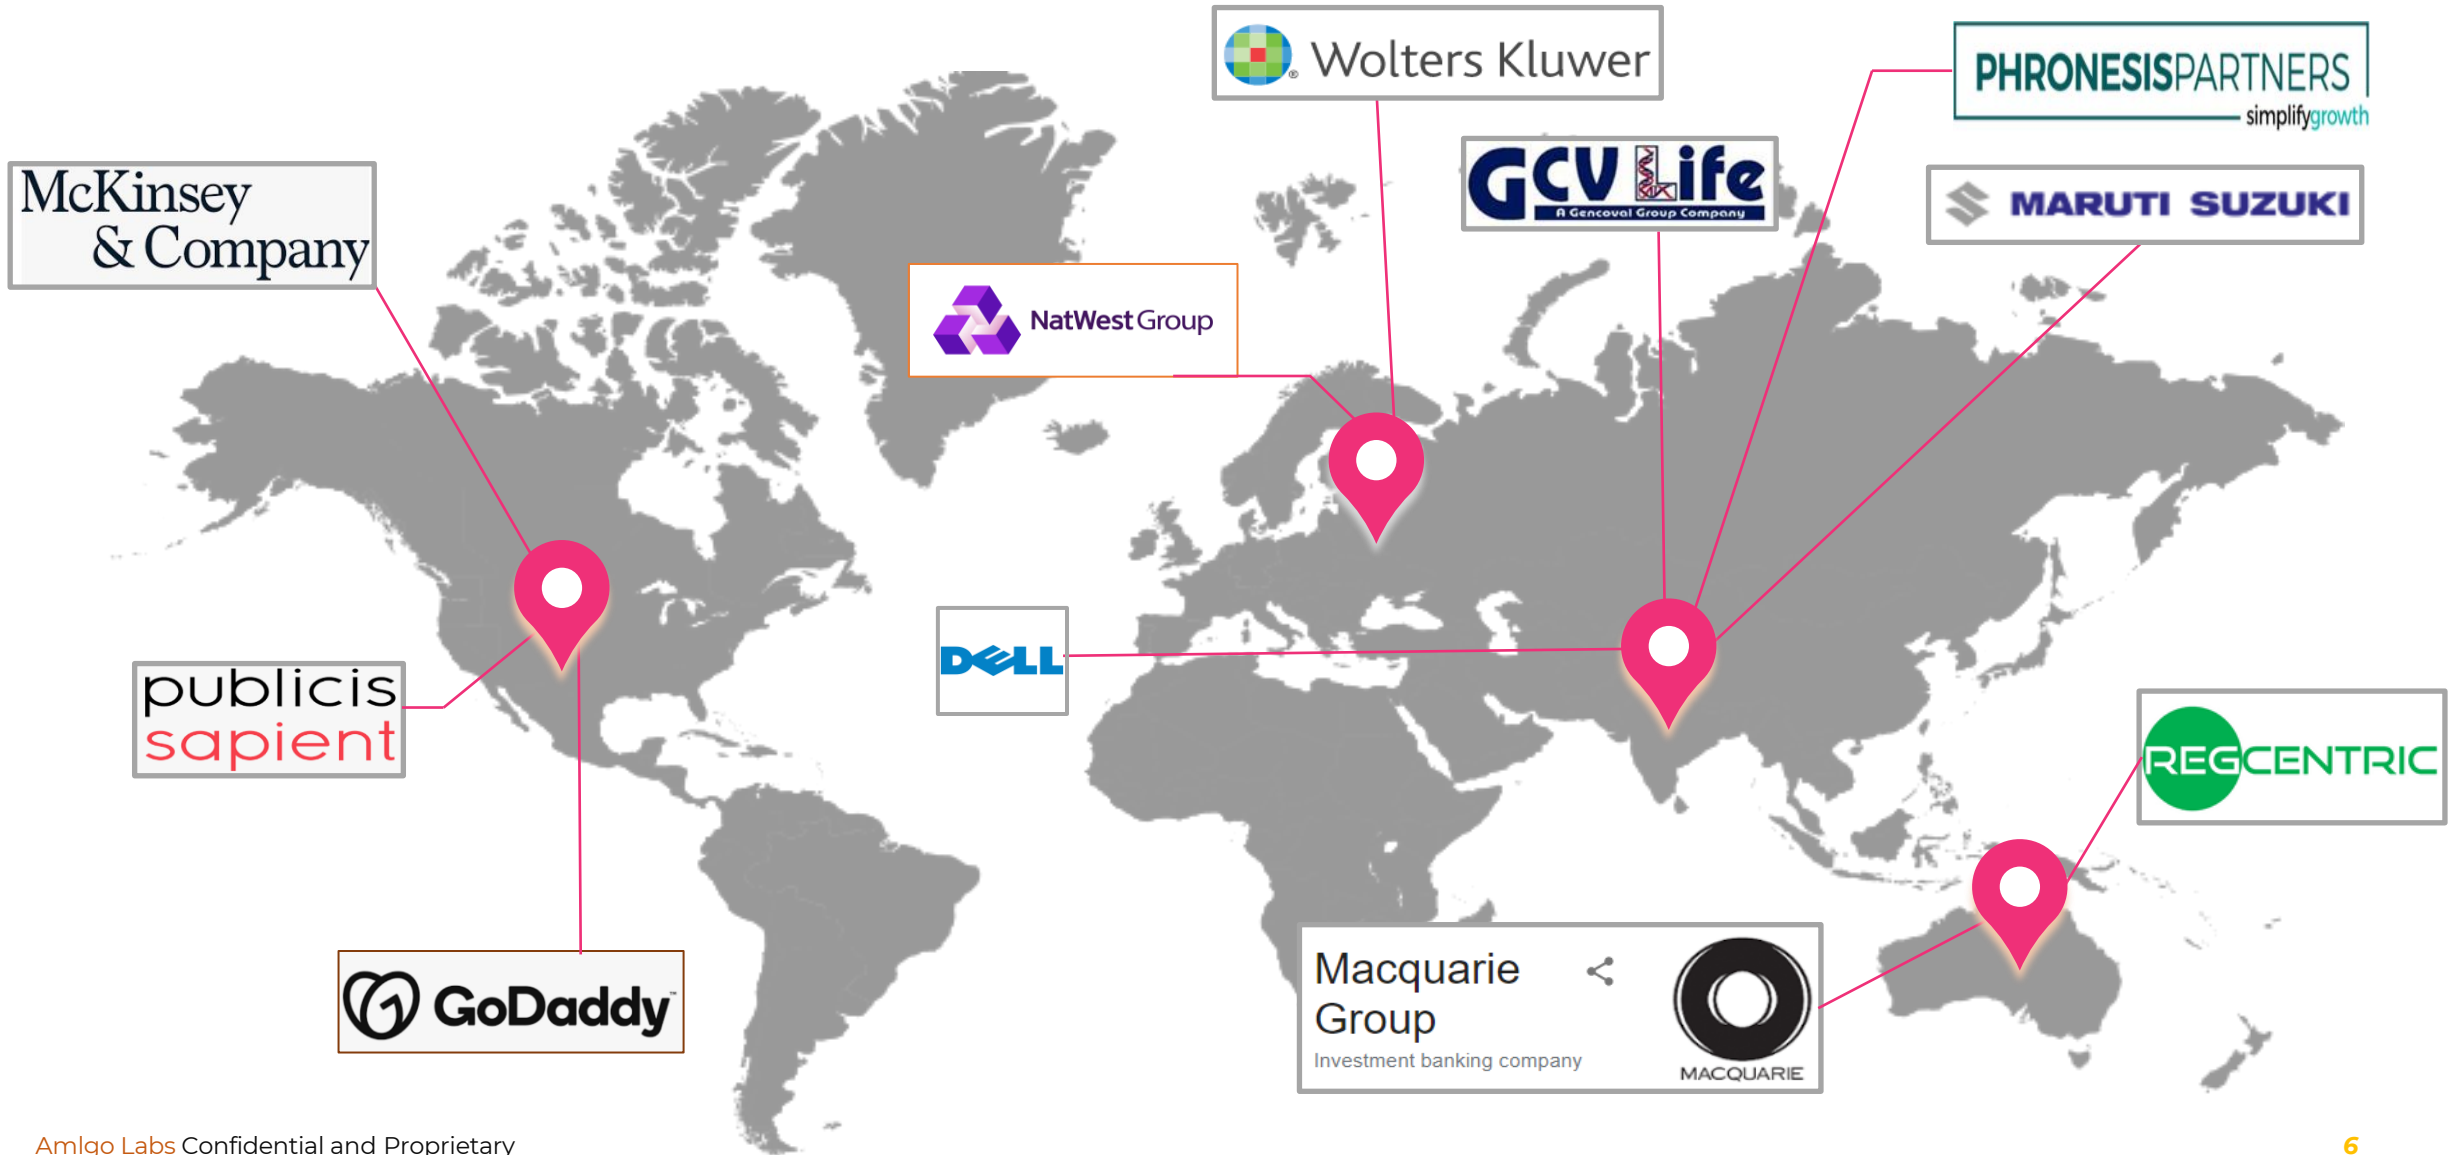

**Flexible and Cost Effective Capacity**

## Ad-hoc Project Model

- On-demand development and consultation support for one-off requirements or where the requirements are cyclical or transactional
- Albeit at higher per hour cost, it provides flexibility to engage the required skills immediately and for a defined period of time.

**On-demand for a Defined Project**

# Our Valuable Clients

# Delivering on Promises -

98%

On time Successful Project delivery

100%

Customer Satisfaction Score

**Biggest Testimonial:** One of our customers (Maruti Suzuki) invested in Amlgo Labs to help the company grow and redefine its data analytics solutions.

## 10 Most Promising Data Analytics Startups - 2019

**D**ata Analytics industry is currently going through significant disruptions. Analytics and data science are being leveraged beyond just achieving operational efficiencies and supporting new business models for shaping business performance. IT spending is not just limited to leading companies or data intensive organizations, rather a conscious step taken by most organizations, small or large, in order to maintain relevance in the market. A report published by Analytics India

from data analytics are delivery of relevant products, mitigation of risk and fraud, enhanced customer experience and new revenue gain, SMBs and large enterprises across various industry verticals are gradually building up its analytics capabilities. Proving to be quite a lucrative sector, there has been an influx of data analytics solution providers in the market. However, in order to achieve their business goals, organizations need to sift the myriad of vendors and select a solution provider that possesses the right skill set,
