Coremine Vitae Overview

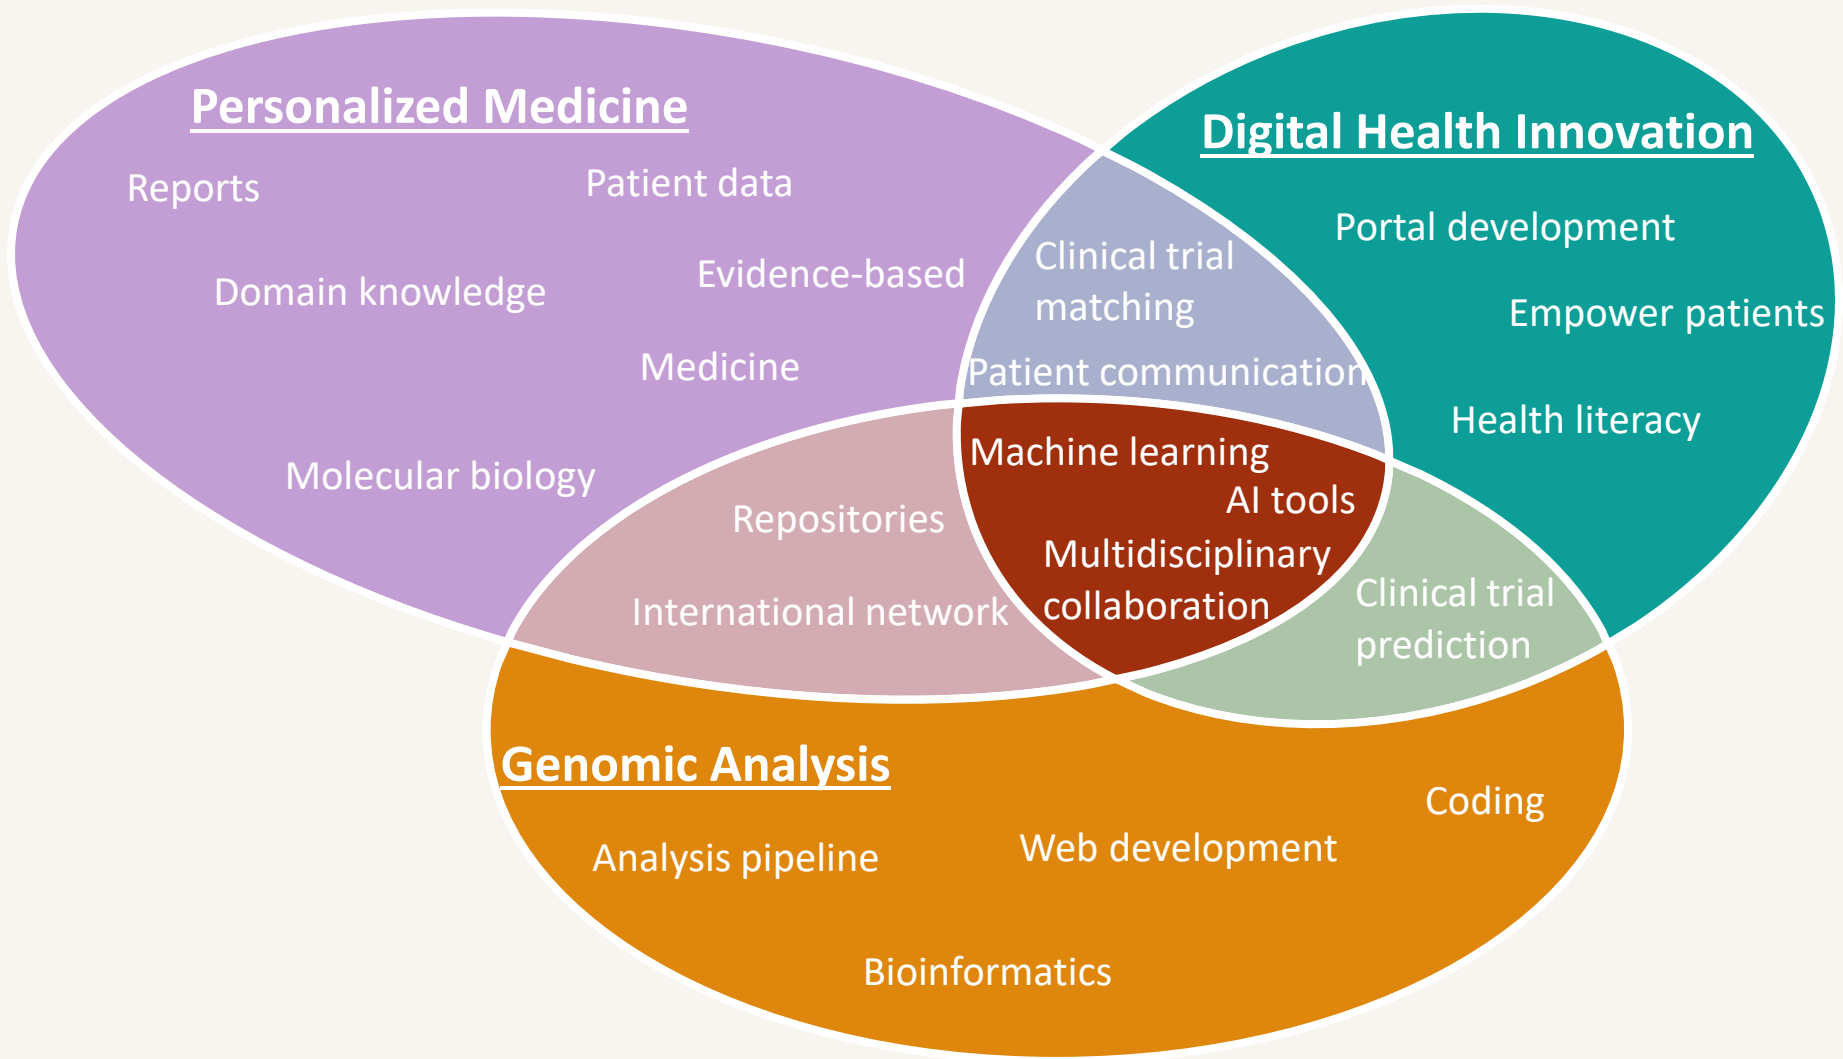

CoreMine™
VITAE

Norwegian **SME** specializing in AI, machine learning, and complex data analysis.

Our mission is to bridge the gap between research, data, and real-world decision making.

Core Competencies and Expertise

Core Competencies & Expertise

CoreMine™
VITAE

Our AI Solution

✓ Automated processes

Replicates what experts would have done if they had unlimited time.

✓ Harmonizes competence

Guides users to review evidence and act according to best practices.

✓ Collaborative learning

Continuously builds new knowledge from scientific and real-world evidence.

What we do/ What we offer

- ✓ Research knowledge structuring & **evidence synthesis**
- ✓ **Interpretable analytics** & AI-supported insights
- ✓ Digital platforms & knowledge hubs
- ✓ Decision-support & evidence-to-action tools
- ✓ **Communication, health literacy** & stakeholder engagement

Track Record & Collaborations

Key collaborations & proven delivery

- ✓ **Spin-out from PubGene (2022)** – roots in biomedical text mining and knowledge extraction
- ✓ **200+ personalised medicine reports delivered** – combining AI, evidence synthesis, and clinical input
- ✓ **Brain Cancer Portal (Hjernesvulstportalen)** launched with the Norwegian Brain Cancer Association (2025) – supporting health literacy and shared decision-making
- ✓ **EU Horizon & Eurostars collaboration experience** – working with academic, clinical, SME, and patient-organisation partners
- ✓ **Proven ability to translate complex research into usable tools and insights** (dashboards, briefs, portals)

Topics of Interest-2026
