

ACC Aviation Coaching Consulting GmbH

YOUR PARTNER FOR SAFE AND EFFICIENT SOLUTIONS
IN AVIATION

CONSULTING | TRAINING | COACHING | AUDITS

About us

Who we are and what we stand for.

Experienced team of experts

Expertise in aviation – development, production and maintenance

Extensive industry knowledge

Manned & unmanned aviation (UAV/UAS) – civil & military

Comprehensive support

From concept to approval or certification – consulting, implementation and ongoing support

Our focus areas

Technology, Management & Safety – Focus on quality, efficiency and safety

Our values: the basis for quality and trust.

Pragmatic

*Practical, efficient,
implementable*

Reliable

Quality, sustainable results

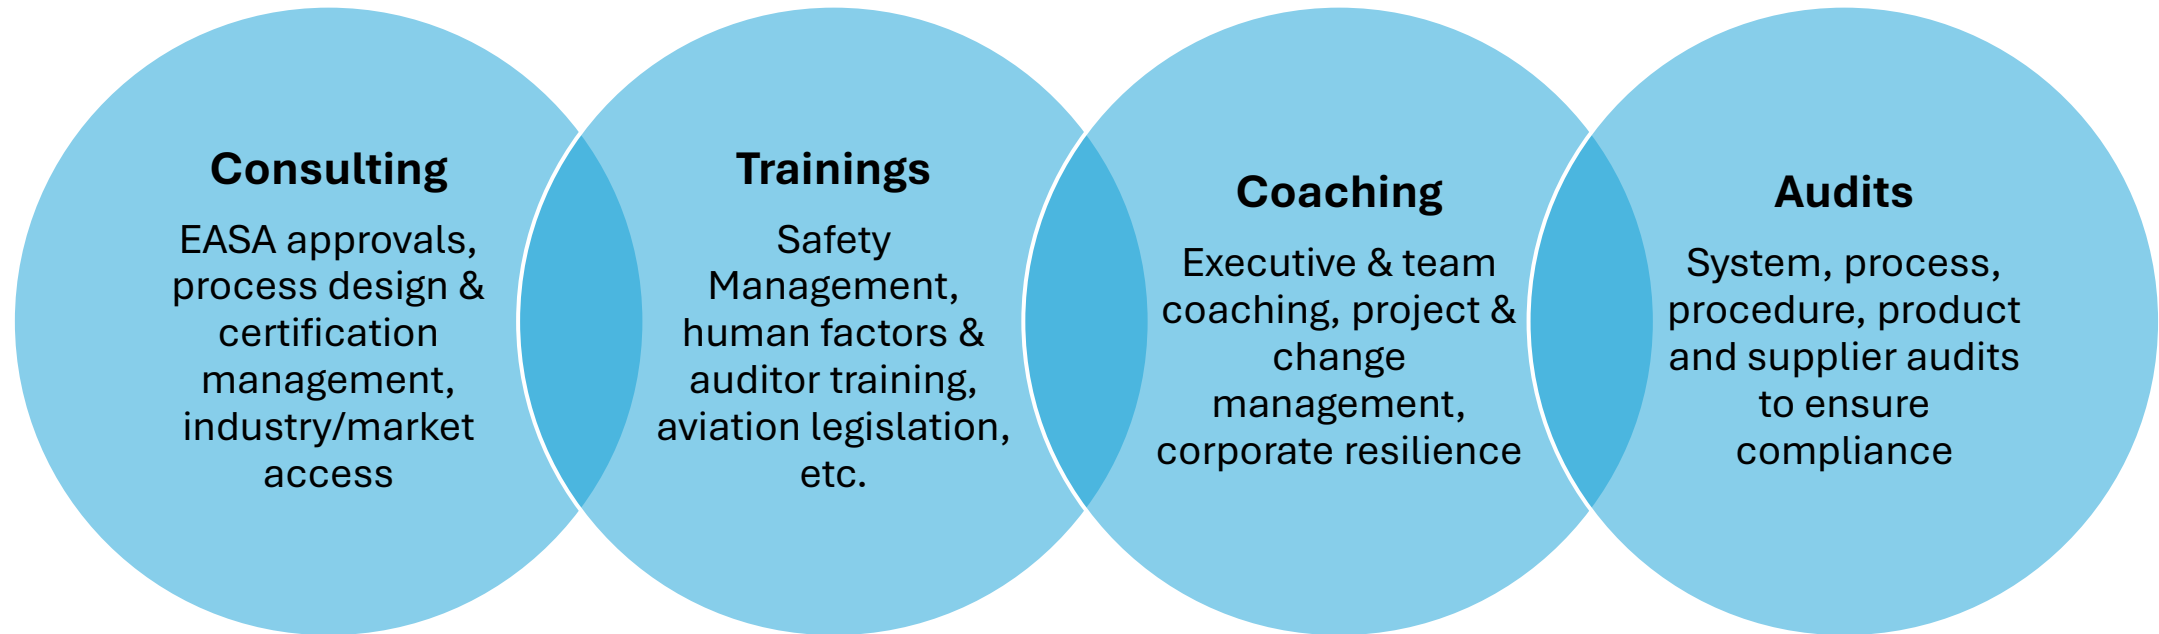

Authentic & honest

*Clear communication,
complete transparency*

With these values, we ensure sustainable solutions, strengthen compliance and promote long-term success in aviation.

Our services:

safety, efficiency and market access.

Consulting

Compliant, efficient structures for sustainable success.

EASA Part 21 (Subpart J / DOA & Subpart G, POA), Part 145 & Part CAMO

Approvals and authorisations in accordance with EASA standards for Design, Production and Maintenance organisations or companies responsible for continuing airworthiness management

Processes, manuals & procedures

Development, implementation & optimisation – individual support and guidance after consultation

Certifications according to DIN EN ISO 9001 & EN 9100

Support throughout the complete process – from decision-making to preparation and implementation to ongoing development (CIP), if desired

Product development & modification

Support in accordance with ARP 4754 & 4761 – Civil aircraft systems development – covering the entire development cycle from requirements to certification / Guidelines and methods for conducting safety assessments for the certification of civil aircraft

Safety Management (SMS), Information Security Management (ISM), Advanced Product Quality Planning (APQP)

Consulting, setup & implementation, further development – fundamental components and management systems

Consulting UAS

Compliant, efficient structures for sustainable success.

Transfer of Manned Aviation Expertise into the UAS Domain

Certification

UAS type & change certification support incl. preparation for EASA Design Verification (DVR)

APQP Planning

APQP-driven planning for UAS product and process realization

Safety & Compliance

Transparent and repeatable UAS processes ensuring safety and regulatory compliance.

Tailored Advisory

UAS consulting aligned with mission profiles and operational needs

Integrated Compliance Chain

End-to-end integration of UAS into the aviation design, operation, and maintenance framework

Trainings

Practical training for compliant behaviour. Maintaining qualifications through refresher seminars.

EASA Part 21 (Subpart J / DOA & Subpart G, POA), Part 145 & Part CAMO

Seminars/training courses on approvals, certifications and airworthiness management – optionally tailored to your specific needs or content/focus – whether QM, safety management, CS or similar.

Quality management

ISO 9001 & EN 9100 – Introduction, implementation/application & certification, including best practice and lessons learned

Human Factors & Safety Culture

Human factors/behaviour, safety management and risk awareness in aviation, human performance, just culture, etc.

Auditor training (based on ISO 19011)

Training of auditors for auditing management systems (focus: aviation and its supplier industry), management of internal and external audits

Safety & Riskmanagement

Safety assessments, configuration or risk management – specific seminars and training courses in accordance with international standards - Including best practice and lessons learned

Coaching

Tailored support for executives, teams and organisations.

Executive & team coaching

Leadership skills, team building & conflict management

Project & Change Management

Change-Prozesse, Priorisierungen & nachhaltige Unterstützung

Effectiveness in project organisation

QfD, Design for X, Lean & Six Sigma & Process Optimisation

Enterprise Risk Management

Risk management & Business Continuity

Customer Management

Intercultural competence, customer communication & relationship management

Audits

Independent audits for quality, compliance and process optimisation.

System audits

Review of QMS – in accordance with aviation regulations or EN 9100 / ISO 9001, identification of weak points, etc. – individual configuration possible upon consultation

Process & procedure audits

Ensuring process compliance – individual design possible upon consultation (based on manuals, standards, aviation legislation)

Product audits

Conformity of products with applicable requirements (example: product conformity from order to release)

Configuration audits

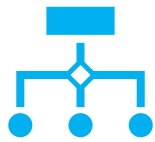

Systematic review of the actual configuration of a product or system for compliance with its applicable requirements (documentation and standards).

Supplier audits

Assessment of the performance and compliance of external partners (suppliers, subcontractors, service providers, etc.)

Why ACC Aviation Coaching Consulting Ltd?

Your partner for sustainable success in aviation.

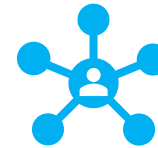

Unique combination

Combining technological, management and safety expertise

Practical solutions

Instead of theory – pragmatic & effective

Strong network

Member of leading associations (BDLI, UAV DACH e.V.)

Our approach

Clear processes, transparent communication & individual adaptation to customer requirements

Strong partner to the aviation industry
