

Who we are

ELMUMY is a consortium including clinics, research centres, universities, and companies with expertise on multiple myeloma patient management and identification of molecular features associated with the disease.

What we are working on

The main objective is to elucidate the factors associated with the onset of multiple myeloma at the molecular and cellular level.

What's the one thing we need next

Identify individuals with high risk for developing multiple myeloma and prevent the onset of the disease by appropriate therapeutic approaches.
