

PMO PARTNERS Company Profile 2025

Content

1. *About Us*

2. *Our Team*

3. *Our Partners*

4. *Our Services*

5. *Our Reference
Projects*

- ❑ Our mission is to support our clients' projects by **delivering best-in-class PMO, innovative projects, and proposal/programme management services** at transparent, competitive price.
- ❑ With our International Team in Türkiye, we serve both the national and EU programmes with extensive cross-sector experience (academia, SMEs, municipalities, NGOs, corporates).
- ❑ **Core Services:** RD&I Proposal writing & budgeting • Work-plan design • Consortium building • Risk Management & Quality Assurance • Data Management Plans • Reporting & audits Assistance • IPR • Communication, Dissemination & Exploitation
- ❑ **Domains:** Software, Digital & AI, Chemistry, Health, Smart Cities, Smart Mobility, Energy, Environment , Education, Manufacturing.
- ❑ **Grants:** Over 250 Million EUR managed for our clients.
- ❑ **Collaborations:** Universities, Technology parks, R&D Centers, SMEs, Corporations, Municipalities, NGOs (project-by-project).
- ❑ More than 100 R&D and Innovation Projects, both national and international, managed.

Our Team

Ali Özgür DOĞAN
Sales Manager
BC: BBA,
MBA: M&O

Dr. Jimmy Godard
PMOGI Mentor Trainer
PMO Establishment Expert
DM/IST, MBA, CB-PMO®, PMP

Bengü TÜRK
Founder, CEO
BC: PSc & IR
MA: PSc & IR, PMP
MBA: Sorbonne
CB-PMO, CA-PMO, PMOGI-ABPI

Esmâ YALINGÖK KIZILTAŞ
Senior Project Manager
BS: PS & PA
MS: PSY
MA: PMP, PSPO I, PSM I, Safe SSM
CB-PMO, CA-PMO, PMOGI-ABPI

Beril KIRCI
International Business
Development &
Program Manager
BC: Environmental Engineer
MA: M.Sc. - Ing. Mechanical
Engineering
PMP Cd.
CB-PMO, CA-PMO, PMOGI-ABPI

Ozan DABAK
Project Manager
BS: ME
MBA: ME
CA-PMO

Bağlan DENİZ
Project Specialist
BC: PSc & IR

Baran ALTUNCU
International Project
Development Coordinator
BC: PSc & IR
CA-PMO

Stefano Todde
Project Specialist
BC: PSc & IR
MA: PSc & IR
MPM
MS: Global Health Policy

Abby FRIMPONG
Overseas Business
Development Specialist

Gülcan ÇAKAR
Accounting and
Administrative
Affairs Coordinator
BC: CO
Occupational Health and Safety Expert

3

Our Partners

PMO Partners produces solutions that meet the needs of businesses with our 100+ solution partners.

PMO Partners Services

Project Management Consultancy

- EU Funding Programs
- TURQUALITY® Application and Management Consultancy
- National Fund Programs

Strategic Management Consultancy

- Corporate Transformation Consultancy
- Digital Transformation Consultancy
- R&D and Design Center, Incubation Center, Acceleration Center Installation and Consultancy

Sustainability Consultancy

- North American Market Research and Integration

PMO Partners Academy

- R&D and Project Management Trainings (EU Scale-up)
- Trainings for Unit Managers
- Trainings for Investors, Senior Managers and Entrepreneurs

**PMO GLOBAL
INSTITUTE INC.**

Our Project Management Consultancy Services

4

Proposal Writing

Strategic Alignment

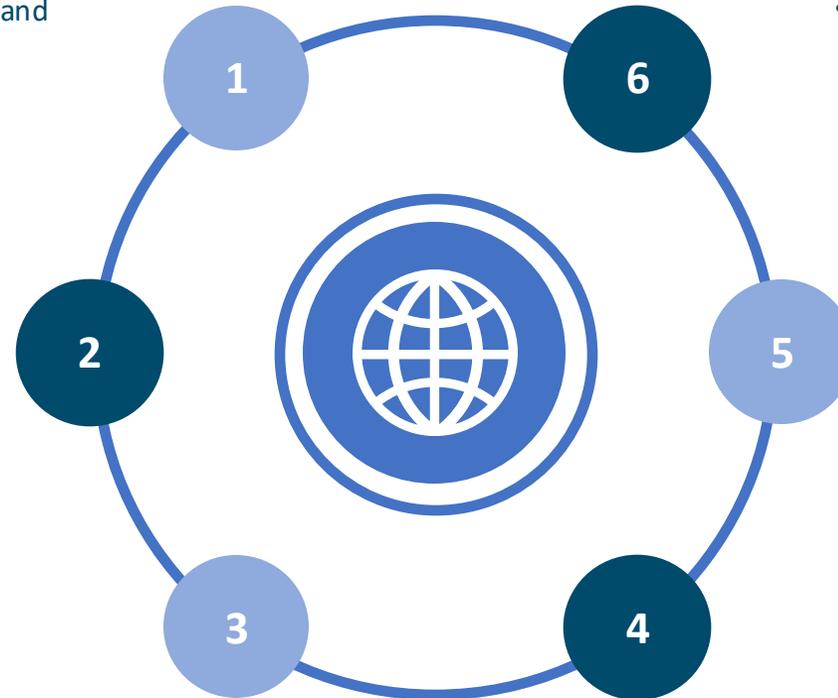

- Align project goals with EU program priorities.
- Structure consortium and work packages.
- Set clear timeline and responsibilities.

Needs Assessment

- Identify missing expertise or resources.
- Analyze project strengths and gaps.
- Define optimal partner profiles.

Proposal Content

- Define objectives, innovation, and impact.
- Detail methodology and work plan.
- Prepare budget, resources, and risk plan.

Administrative Support

- Complete forms and compliance documents.
- Address ethics and legal requirements.
- Ensure formatting and clarity.

Partner & Network Support

- Recommend partners from our network.
- Facilitate introductions and agreements.
 - Coordinate information sharing.

Submission & Follow-Up

- Conduct final review before submission.
 - Ensure on-time delivery.
 - Support post-submission queries.

Our Project Management Consultancy Services

4

Contacting Expertise

Leveraging EU Network

An extensive network of EU R&D&I professionals is engaged to match the specific requirements of the project.

Professional Portals

Qualified candidates are identified through established EU innovation and funding platforms.

Direct Outreach

Targeted communications are initiated with selected experts to propose tailored collaboration opportunities.

Relationship Building

Enduring professional relationships are cultivated to support current and future EU initiatives.

Our Project Management Consultancy Services

Portal Management

PMO Yönetim ve Danışmanlık A.Ş

1	Create and Validate Profile Setting up and verifying the company's profile
2	Register as Consortium Participant Enrolling the company in the consortium
3	Upload Documentation Submitting required administrative and technical documents
4	Manage Document Versions Ensuring the latest versions of documents are used
5	Coordinate with Team Gathering necessary information and approvals from the team
6	Monitor Deadlines and System Keeping track of deadlines and system functionality
7	Conduct Compliance Review Reviewing all entries for compliance
8	Confirm Upload and Archive Verifying successful upload and archiving records

Training

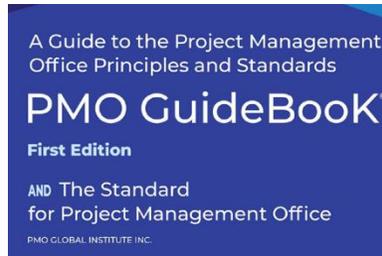

PMO Partners is an institution accredited and authorized by the Project Management Office Global Institute (PMO GI) and is an accreditation body for global project management practices.

<https://pmoglobalinstitute.org>

**PMO GLOBAL
INSTITUTE INC.**

PMO Partners, as an Authorized Business Partner (ABP) of the PMO Global Institute (PMOGI), delivers official CA-PMO® and CB-PMO® certification programs. With our two certified instructors, we provide globally recognized training that equips participants with the knowledge, practical skills, and frameworks to establish, manage, and mature effective PMOs. Our programs combine expert instruction with interactive learning to prepare professionals for their certification exams and to drive measurable impact in their organizations' project management practices.

The Certified Associate in PMO (CA-PMO)® certification is a professional credential designed for individuals who wish to build or advance their careers within Project Management Offices (PMOs).

The Certified Baseline PMO Consultant (CB-PMO)® certification provides advanced knowledge to understand how to apply PMO processes to complex, real-world projects and provides the competency to successfully implement strategic project initiatives

5. OUR REFERENCE PROJECTS

ADA

Remote Healthcare Monitoring Powered by Network Intelligence and Automation

The project will deliver the ADA healthcare platform, a set of interconnected and 5G-enabled healthcare services that employ AI and automation throughout applications and the network to improve user experience and enhance workforce productivity.

ADA will deliver four business-oriented next-generation remote healthcare monitoring demonstrators built upon the ADA platform across four nations and two continents.

- These are:
1. personalised care monitoring
 2. multi-party remote physiotherapy
 3. voice-based remote disease diagnosis
 4. coordinated care for nursing homes

WHY ADA?

The prevalence of chronic diseases, combined with aging population and technology advancement, has given rise to the popularity of remote health monitoring (RHM) extending traditional hospital-based healthcare. Many existing RHM solutions on the market focus on making remotely collected data accessible, however, offering limited actionable insights to support healthcare workers in decision making. ADA project focuses on developing and demonstrating next generation remote healthcare monitoring solutions using 5G and AI.

SOLUTION

To deliver its ambition, the project brings together a spectrum of technology value chain partners covering 5G (OpenRAN, Edge, 5GSA), Cloud, AI/ML (federated learning, deep learning), security and privacy-preserving data technologies.

ADA ECOSYSTEM

13 partners from 4 countries will collaborate for 3 years to focus on developing solutions for remote healthcare monitoring solutions.

5. OUR REFERENCE PROJECTS

ATTACC

Automated Tax Compliance For Cross-border Trading With Gran-IoT

The project will deliver the ATTACC platform, a cross-border, IoT-enabled tax compliance and trade facilitation infrastructure that integrates localisation, automation, and distributed ledger technology to reduce administrative burden, enhance transparency, and increase efficiency in international trade.

ATTACC will deliver four business-oriented next-generation automated cross-border trading demonstrators built upon the ATTACC platform across multiple nations and regions.

- IoT-enabled goods localisation and digital seals for secure, real-time border crossing detection
- Smart Data Services for supply chain tracking that integrate with national Single Trade Window systems
- DLT-enabled automated tax and customs payments triggered by smart contracts on taxable events
- Anomaly detection services to ensure compliance, security, and fraud prevention across the supply chain

QUALITY LABEL BY

FUNDED BY

WHY ATTACC?

ATTACC project addresses inefficiencies in tax and customs administration by integrating advanced IoT, 5G/6G wireless networks, and Distributed Ledger Technology (DLT). This initiative aligns with global trade digitalization efforts, ensuring seamless compliance, reducing fraud, and optimizing supply chain operations.

SOLUTION

ATTACC introduces a GRAN-IoT-based localisation and tracking system that links tradeable goods with tax and customs processes in real time. By utilizing IoT sensors, blockchain smart contracts, and open banking APIs, the project enables automated tax compliance, enhancing transparency, security, and efficiency in cross-border trade.

ATTACC ECOSYSTEM

6 partners from 3 countries will collaborate for 3 years to focus on Automated Tax Compliance for Cross-border Trading using GRAN-IoT

5. OUR REFERENCE PROJECTS

BIOSAFIRE

New generation of safe and sustainable bio-based flame retardants for industrial applications

BIOSAFIRE's main objective is to develop a new generation of safe and sustainable-by-design biobased flame retardants that replace current toxic alternatives with high-performance sustainable ones while testing the implementation of the JRC's SSbD Framework and providing guidelines and recommendations for its improvement.

BIOSAFIRE will deliver five industrial demonstrators built upon its bio-based flame retardants across four key sectors:

- Naval demonstrator (command console)
- Railway demonstrator (bogie box)
- Home appliance demonstrators (refrigerator chassis & oven display holder)
- Wood coating demonstrator

Each demonstrator will validate BIOSAFIRE's scalable bio-based FR formulations (TRL7-8), ensure recyclability and reduced carbon footprint, and deliver guidelines for wide substitution of harmful flame retardants.

'This project has received funding from the European Union's Horizon Europe research and innovation programme under Grant Agreement No. 101178218.'

Co-funded by the European Union

WHY BIOSAFIRE?

Current flame retardants rely heavily on toxic halogenated and phosphorus-based compounds that pose risks to human health, the environment, and circularity. BIOSAFIRE addresses this challenge by developing bio-based flame retardants from lignins and tannins, based on the EU's Safe and Sustainable by Design (SSbD) framework.

SOLUTION

BIOSAFIRE introduces next-generation SSbD flame retardants that replace harmful chemicals with sustainable, high-performance alternatives. Through advanced extraction and industrial upscaling, the project will deliver demonstrators in four sectors: naval composites, railway components, home appliances, and wood coatings.

BIOSAFIRE ECOSYSTEM

22 partners from 12 countries will work for 3.5 years across the full value chain, ensuring scalable, market-ready solutions that replace harmful flame retardants

5. OUR REFERENCE PROJECTS

LCAMP

Learner-Centric Advanced Manufacturing Platform

LCAMP will deliver a European platform for advanced manufacturing education and innovation that is learner-centric, integrating digitalisation, micro-credentials, and future skills observatories to reduce the gap between industry needs and vocational training. The initiative aims to boost resilience, employability, and upskilling in the digital and green transitions.

LCAMP will deliver four core service demonstrators / pillars built on its platform across regions and Centres of Vocational Excellence (CoVEs):

- Future Trends Observatory:
- Personalised Learning Pathways & Micro-credentials
- Collaborative Learning Factory
- Open Innovation Community & Synergies

Co-funded by the European Union

WHY LCAMP?

The Advanced Manufacturing sector is evolving rapidly (AI, IoT, Industry 4.0/5.0), but vocational training is lagging behind: skills gaps, fragmented offerings, and weak pathways for ongoing upskilling. LCAMP aims to bridge that gap to make the workforce more adaptable and the sector more resilient.

SOLUTION

LCAMP builds a learner-centred platform with observatories for future skills, personalised learning paths, micro-credentials, a Collaborative Learning Factory, and an Open Innovation Community. These tools enable VET/HVET centres to deliver training aligned with industry needs and the twin transitions.

LCAMP ECOSYSTEM

19 partners from 9 countries will work together for 4 years. It involves VET/HVET providers, companies, regional authorities, working together to upskill and reskill learners and ensure sustainability and self-sufficiency of the platform.

5. OUR REFERENCE PROJECTS

PHRESH

Patient Health Response in Emergent and Secure Habitats for Connected Healthcare

MLPCARE

PHRESH will deliver a connected healthcare framework that reshapes health risk assessment, emergency response, and treatment. By integrating AI, advanced sensors, privacy-preserving technologies, and quantum-secure encryption, PHRESH reduces disparities in access, strengthens patient trust, and improves outcomes in remote and critical care.

PHRESH will deliver four next-generation healthcare demonstrators built upon its platform across multiple countries:

- PHRESH will deliver four healthcare demonstrators across multiple countries:
- Sense for Health: Sensor-based risk profiling and diagnosis.
- Alert to Prevent: Preventive alerts and personalised treatment.
- Connected and Mobile Care: Real-time ambulance-hospital data sharing.
- Secure and Collaborative Learning: Federated AI with post-quantum security.

WHY PHRESH?

Healthcare equity is undermined by limited access in rural areas, slow emergency response, and gaps in secure data sharing. PHRESH addresses these by uniting next-gen digital health technologies with strong privacy and security standards.

SOLUTION

PHRESH builds an integrated platform combining AI, IoT sensors, edge computing, and post-quantum encryption. It delivers smarter risk detection, preventative alerts, and connected ambulance-hospital communication to improve patient outcomes while safeguarding sensitive data.

PHRESH ECOSYSTEM

A 36-month project with over 30 partners from 8 countries, including universities, SMEs, large enterprises, hospitals, and insurers.
