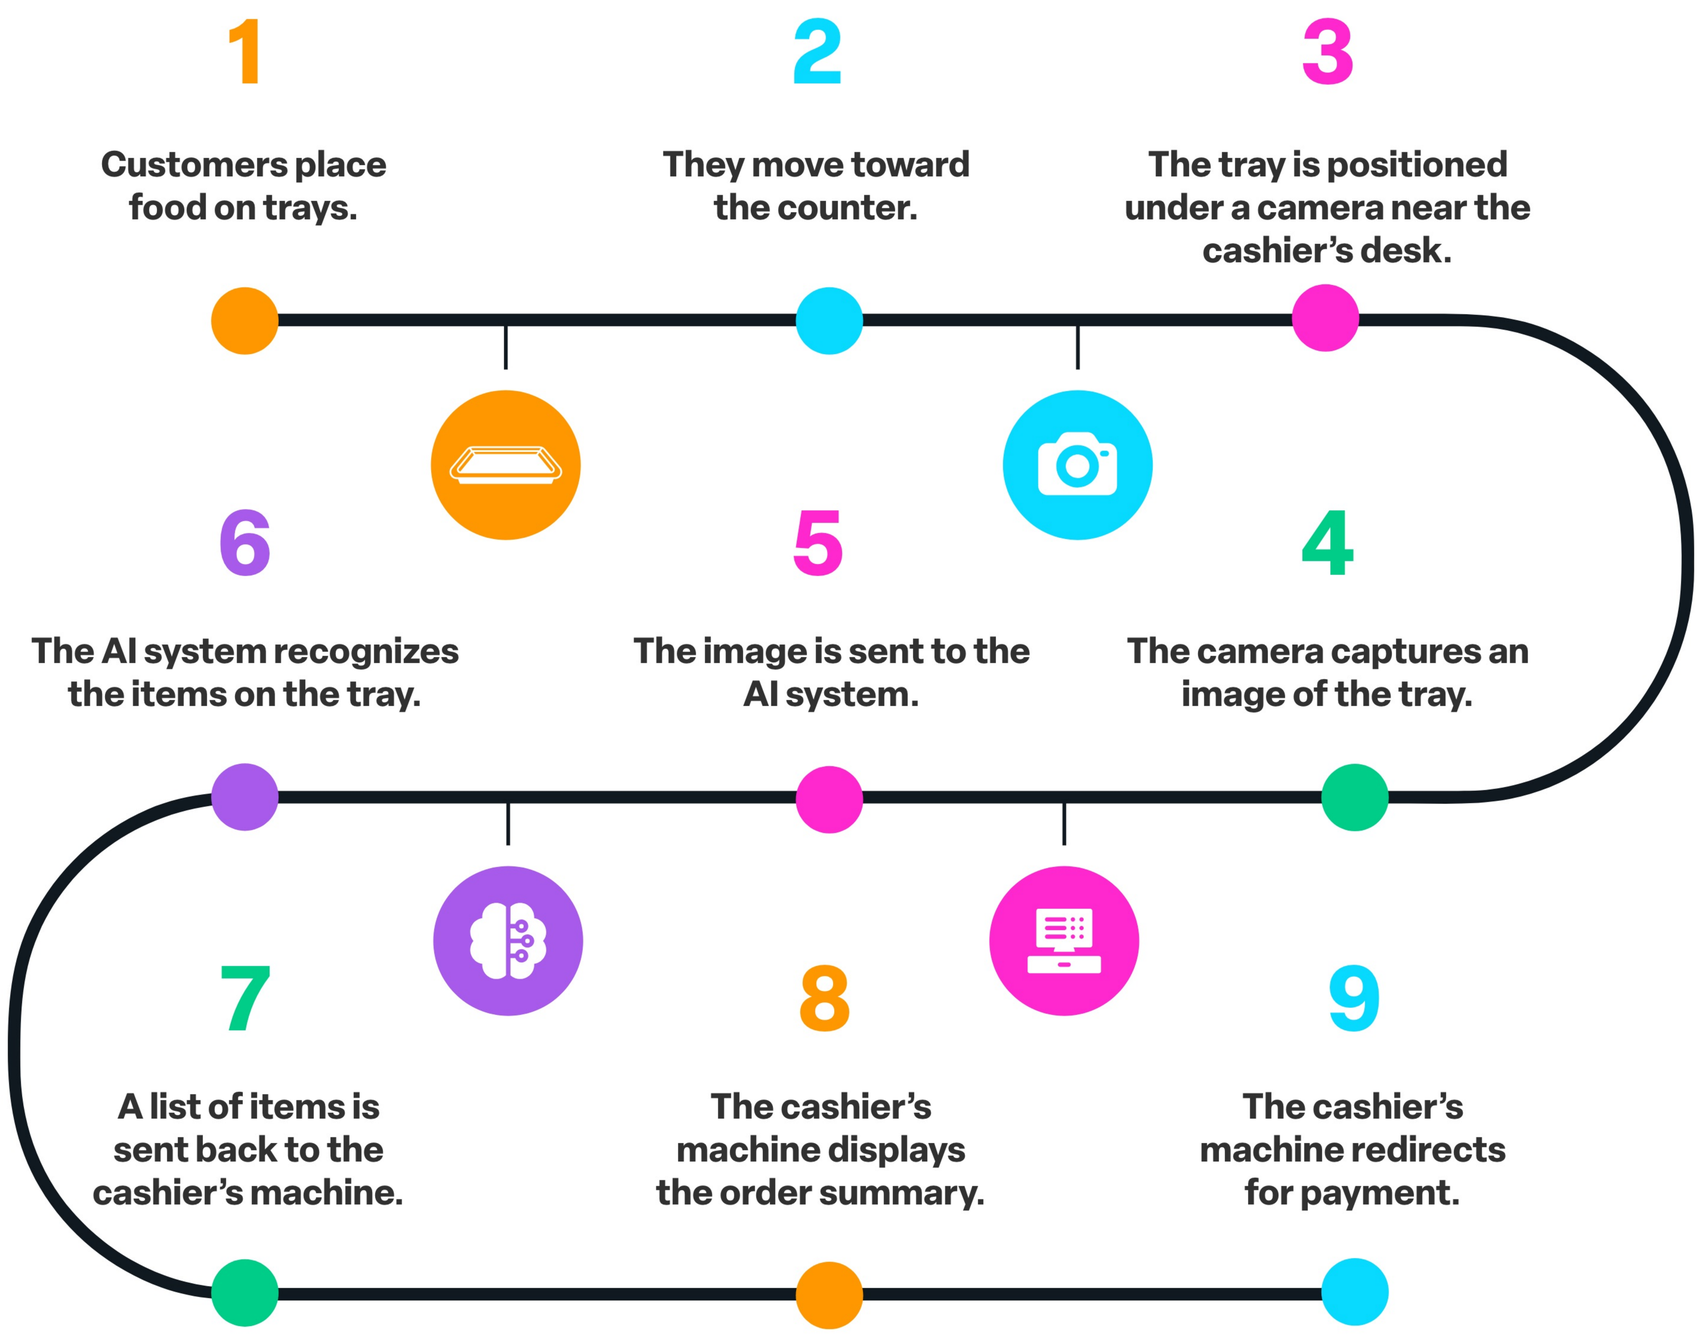
Cognitive Services for Restaurants by ByteLAKE

AI-powered add-ons for Simpra POS

Cognitive Services for Restaurants is a product by byteLAKE, a company that specializes in Artificial Intelligence (AI) solutions for various industries. This product offers AI-powered software add-ons that enhance the functionality and efficiency of restaurant management solutions. One of the add-ons is a food recognition system that automates the billing process and reduces the waiting time for customers.

It works as follows



Simpra Suite Integration

This add-on is compatible with Simpra, a complete solution for restaurants that includes tablet(s), point of sale (POS) equipment, payment terminal(s), inventory management software, and more.

Cognitive Services for Restaurants also has more add-ons on the roadmap, such as:

- Restaurant floor monitoring for automated reservations
- Tables occupancy monitoring
- Cameras assisting staff in typical cleaning activities
