

Robust divisible cable protection pipe - easy to use problem solver!

Greenpipe's divisible cable protection pipes, made from 100 % recycled materials and designed for tough environments and efficient installation.

110 - 160 mm

Greenpipe Snipp & Snapp® Quicklock

Fast and effortless installation – save time and money without compromise

The cost-effective and sustainable choice. With an innovative, user-friendly design and robust hinges, Quicklock handles even the toughest challenges.

The durable, split sleeve provides comprehensive protection along the entire cable length, even over long distances, and allows for bending up to 22.5°. Perfect for those seeking simplicity without compromising on quality or sustainability.

Quicklock – fast, effortless and secure.

Greenpipe Snipp & Snapp® – The trusted original in split cable protection

A complete range of cable protection pipes, crafted from 100 % recycled plastic, designed to streamline installation and minimize environmental impact.

With tool-free assembly, you save time and money while ensuring reliable and sustainable cable protection for power distribution, railways, underwater applications and many more.

The innovative design and durable locking system deliver long-lasting quality while easing workloads for installers and supporting a greener future.

Choose Snipp & Snapp® – sustainability, quality and simplicity combined!

60 - 220 mm

Greenpipe Snipp & Snapp® Hardlock

Proven quality and reliability – trusted by professionals worldwide for over two decades

The original in split cable protection, highly valued by professionals for more than 20 years. With an integrated coupling system for fast, hassle-free installation, it easily connects to corrugated cable ducts.

Perfect for power distribution, railways, and other demanding projects – Hardlock is the go-to solution for those who prioritize long-term performance and top-tier quality.

Hardlock – proven protection for infrastructure.

70 - 160 mm

Greenpipe Snipp & Snapp® Panzar

The ultimate protection for extreme environments – superior performance

The market's strongest and most durable cable protection pipes, meticulously engineered to endure the harshest conditions and exceed the highest demands across various projects. Ideal when standard plastic pipes or materials are insufficient.

With Panzar, you can use standard cables instead of reinforced ones, while still benefiting from exceptional strength, flexibility and long-lasting performance.

Panzar – when only superior solutions will do.

Secure lengthwise connection

Easy installation without tools

Tiltable 7-22,5° in any direction

Why settle for poor protection? Contact us for free samples and take the first step toward smarter, faster, and greener installations!
