WE ARE APLAST

WE ARE APLAST,
a modern and experienced
manufacturing company
specializing in the design and
production of high-quality
rotomoulded products.

We follow the principles of technological innovation, building our own brand and maintaining a high reputation in both domestic and international markets. We use the most advanced rotational moulding technology – including robotic rotational moulding (robomoulding) - which has minimal environmental impact and helps preserve the future of our planet.

High quality production

We focus on underground infrastructure and systems for sewage, water supply and waste water management, while mastering a wide range of production and development capabilities. Our products are the result of our in-house department that combines all the necessary expertise, from design and construction, all the way from tool production to rotational and robotic moulding, custom welding and final assembly. By leveraging advanced technologies, we ensure efficient, sustainable and exceptionally high-quality products for the rescue, industrial and automotive sectors.

Customer satisfaction

More than 50% of our revenue is generated through exports, reaching **32 countries** worldwide and counting. We owe the outstanding loyalty of our customers to the focus on the development of high-quality products that meet the requirements of quality, safety and efficiency, flexibility as well as our special approach we take when working with our business partners. We thus ensure the market advantage and recognisability of our own trademark products in an increasingly competitive global market.

Development partnerships built on certified quality

As a reliable partner who, together with the customer, develops the tools and takes care of the manufacture of the desired product. We are certified according to the standards of **ISO 9001** Quality Management System and **ISO 14001** Environmental Management System.

OUR VISION

We strive to become a leading manufacturer of rotomoulded polymer solutions across a wide range of industries, continuously pursuing new opportunities and sharing our technology.

OUR MISSION

We develop high-quality rotomoulded products that contribute to preserving a healthy planet and pristine nature, thereby improving the quality of our daily lives. We specialize in production, design, and development, striving every day to achieve the highest quality standards while reducing pollution and following sustainable manufacturing principles.

RESCUE

Rescue industry – Supporting those who save lives

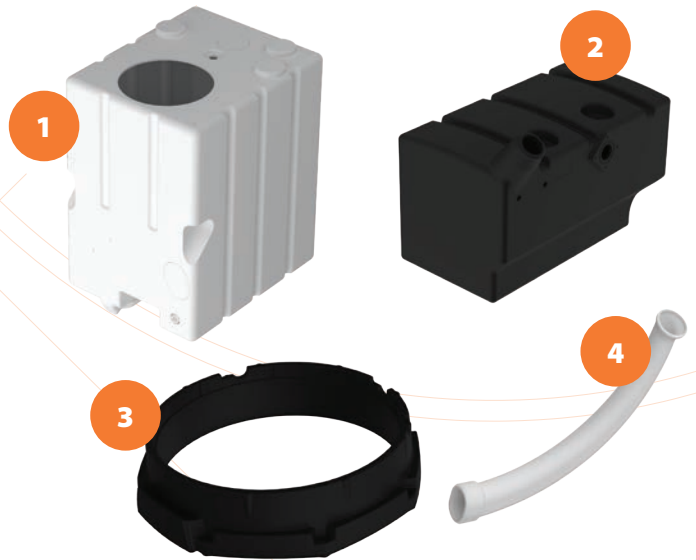

In the rescue sector, Aplast manufactures high-quality firefighting equipment designed for reliability and performance in critical situations. Our product range includes water tanks, fuel tanks, air distribution components, liquid distribution pipe system and other essential components that support firefighters and rescue teams in the field.

1 Water tanks*

2 Fuel tanks*

3 Air distribution components

4 Liquid distribution pipe system

*Water tanks available in 2000 l and 2600 l capacities. | Fuel tank capacity: 160 l.

AUTOMOTIVE & CARAVAN

Automotive industry – Designed for performance

Aplast manufactures durable and precisely engineered components for the automotive sector, including motorcycle top cases and fuel tanks that combine strength, functionality and modern design.

Caravan industry – Built for the journey

For the caravan and motorhome industry, Aplast produces a wide range of fresh and waste water tanks, welded tanks in various shapes and sizes, as well as fuel tanks – all designed to ensure reliability and convenience for life on the road. Where modularity meets mobility.

5 Motorcycle top cases **

6 Fuel tanks

7 Drinking water tanks

8 Waste water tanks

9 Welded water tanks

10 Fuel tanks

**Motorcycle top cases capacities: 12 l.

MARINE, POWER & ENERGY

Dredging - Strength that floats

Aplast designs and manufactures durable, high-performance floats in a variety of shapes, sizes and buoyancies. Each product is carefully engineered to meet the demanding conditions of dredging operations, ensuring reliability and long-lasting performance on the water.

Marine industry - Performance you can trust offshore

In the marine industry Aplast offers a wide selection of water tanks – from space-saving corner models to fully customized welded designs. Our solutions combine practicality, precision and quality, helping customers make the most of every inch on board.

11 Floaters ***

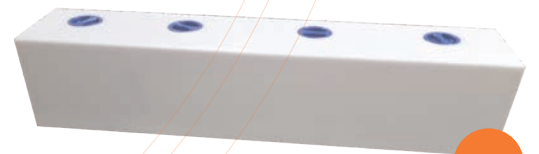

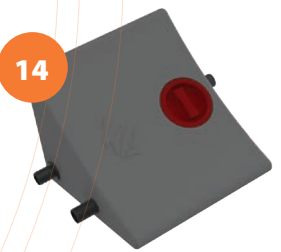

12 Low depth cable floater

13 Floating solar panel supports

*** Offered in various shapes and sizes, with customization options.

14 Corner water tanks

15 Welded water tanks

Power & Energy – Shaping a greener tomorrow

Aplast supports the clean energy transition with robust mounting systems and supports for solar panels. Designed for stability, durability and efficiency, our components provide a solid foundation for sustainable energy projects worldwide.

VARIOUS INDUSTRIES

Various Industries – Versatility in every design

Aplast also serves diverse industrial fields such as agriculture, construction, cleaning equipment and power generation. We produce fuel tanks, bumpers, fenders, shields, dashboards and a variety of liquid tanks – all tailored to meet specific operational needs with precision and quality.

MAIN ACTIVITIES

Aplast Industrial Program – Shaping innovation across industries

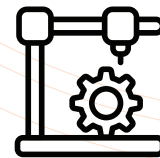

Aplast's Industrial Program combines advanced rotomoulding technology with innovation, versatility and performance. Our expertise extends across a wide range of sectors, delivering durable and customized solutions that meet the highest industry standards. Our products play a key role across diverse sectors – from rescue and automotive to caravanning, dredging, marine applications, and power energy. With extensive expertise and flexible production capabilities, Aplast also delivers tailor-made solutions for agriculture, construction, cleaning equipment, generators and many other industries. Wherever durable, lightweight, and high-quality polymer components are needed, Aplast is your trusted partner in innovation.

MORE SPACE FOR NATURE

We also develop smartly designed products that contribute to preserving nature. Through innovative solutions that optimize space, improve hygiene and support sustainable waste management, our products help create cleaner and more environmentally responsible future.

YOUR BENEFITS of working with us

- » **Dedicated in-house R&D** for materials, products and technological innovation.
- » Flexible approach with fast **technical adjustments**.
- » Deep **understanding of the industry** and requirements of the customers.
- » **Advanced**, state-of-the-art technologies and robotics solutions.
- » **High quality** products.
