History & Bright Future

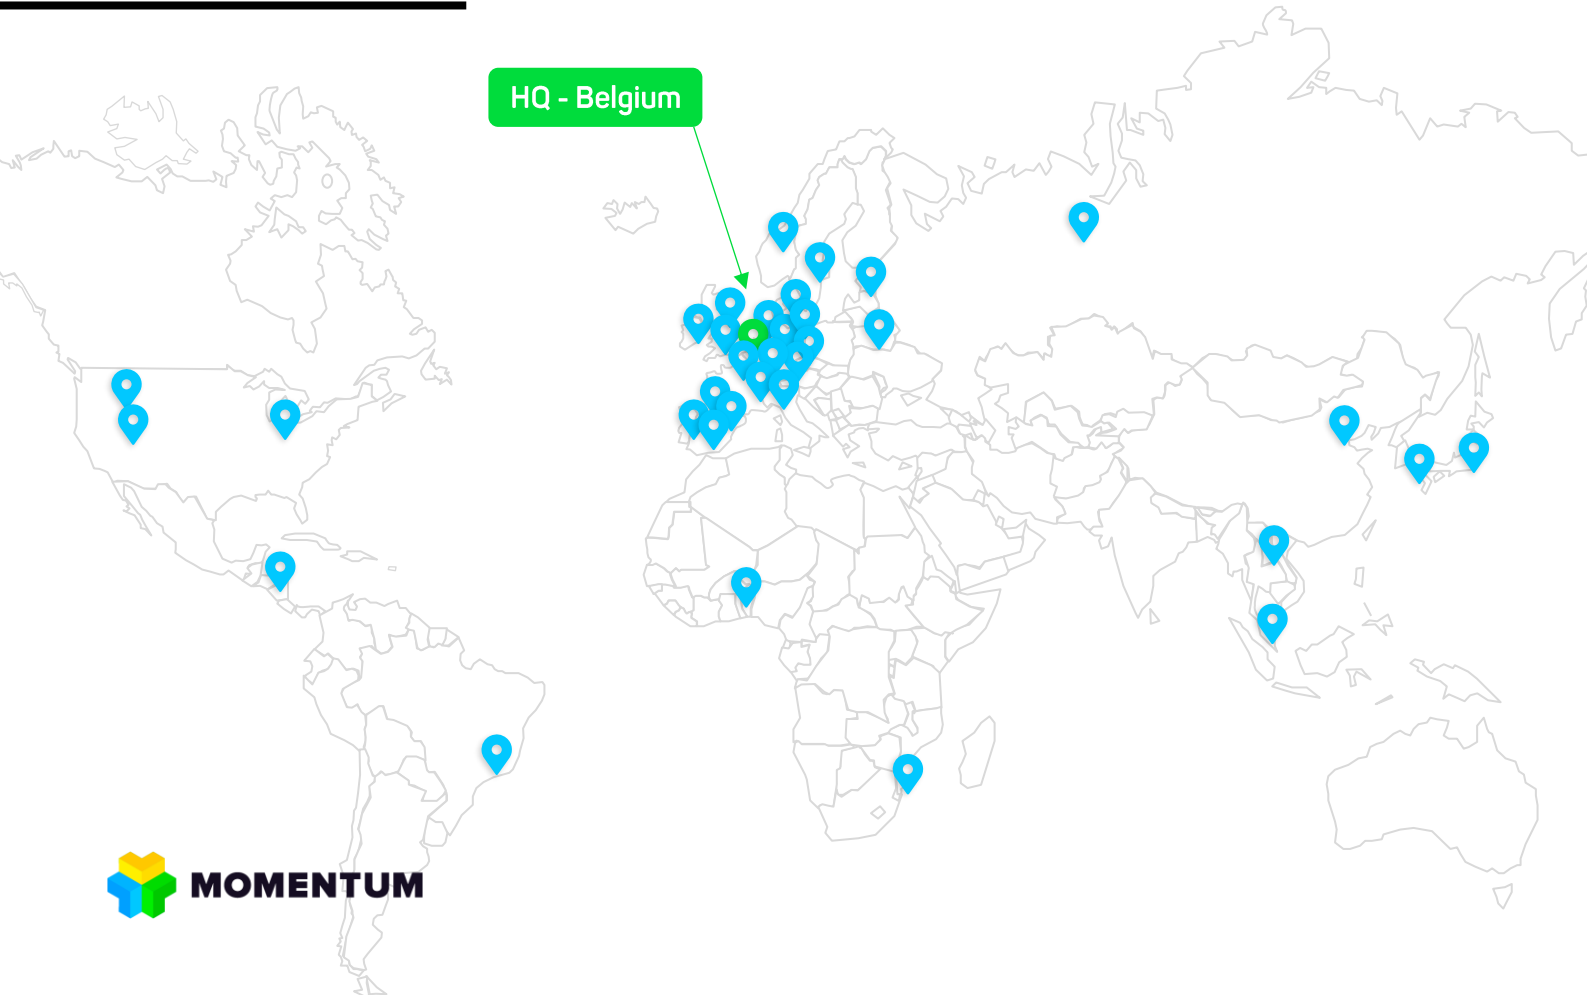

Company Overview

- Founded in 2003 by Lieven Decorte and Ann Geeraert. Their vision was to bridge IT & OT, digitize and orchestrate production into one seamless flow.
- Brighteye is a privately held company. During the last years Brighteye has demonstrated consistent growth in revenue and profitability, resulting in strong financial health.
- **Momentum** is a scalable platform enabling MES, WMS/WCS, QMS, APS, Batch Execution capabilities developed in Belgium built on latest technologies enabling real-time orchestration of the end-to-end production process, warehouse management and automation control.
- With **100+ Global Customers** and more than **70% in the Food & Beverage industry**, Brighteye brings domain expertise and process knowledge. Beyond that Brighteye serves also discrete manufacturing.
- Brighteye has **over 20+ years experience in delivering complex and multi site projects** involving OEMs, system integrators and renowned machine-construction companies like Deprez Construct, Tummers, Kiremko, Elog, Viscon ...

Momentum Global Customer Base

Company Overview

We are particularly proud of our partnership with Michelin

Michelin Group - Global leader "*Offering everyone a better way forward in a safer, cleaner, more accessible and more efficient manner*"

Business strategy and objectives :

- External growth, including through acquisitions, to become less dependent on the traditional business and create value to achieve overall growth for all of Michelin's activities.

Operational challenges:

- Highly fragmented digitization landscape with both outdated internal size developments and a large number of outdated MES systems of all kinds.
- Rolling out a unified MOM and ERP technology stack across multiple sites, for optimal TCO with maximum standard applications.
- Establish state-of-the-art IT/OT landscape to address all current and future business challenges.

Momentum tipping point:

- Decision on exclusive partnership (*Momentum and Oracle cloud ERP*) for optimal size and uniformity benefits and corporate governance.
- Templated roll-out program for a global footprint with benefits to reuse and uniformity.
- 10 sites in scope, covering the business units rethreading, aircraft tires and mold production.

When is our **Momentum**?
