

Who we are

STREXIT2 unites clinicians, surgeons, researchers, economists and patients to improve care for people with high-risk retroperitoneal sarcoma.

What we are working on

We complement STRASS2 with real-world observational evidence, comparing outcomes, quality of life and cost-effectiveness to support an evidence-based standard of care.

What's the one thing we need next

We need continued recruitment across 37 sites in 14 countries to determine which patients benefit from chemotherapy before surgery.
