

SEVERO

Swallowing gel

Banana and Tutti Frutti flavour

Difficulty Swallowing?

The expression that something is “a hard pill to swallow” isn’t just a metaphor. Swallowing pills can be difficult, unpleasant and even extremely painful for many people.

Some people have a natural aversion to swallowing pills, while others have physical issues affecting their ability to take oral medication.

The medical term for swallowing problems is dysphagia. Approximately 22% of all adults above the age of 50 and up to 68% of residents in long-term care settings suffer from a difficulty swallowing – a percentage growing with our aging population.

In co-operation with the department Food & Biobased Research of the renowned Wageningen University, we have developed the Severo Swallowing gel, with the aim to ease the intake of tablets, capsules, and powders for this vulnerable group.

“The swallowing gel makes it considerably easier to take medication. The gel easily mixes with the medication and can be swallowed at once. Because the gel is dispensed in measured amounts, there will be no loss of gel. The gel is a great advantage for clients with swallowing problems!”

Nursing Home Talma Haven, Urk, The Netherlands***

Severo – quick and easy

The gel encapsulates the medication, allowing it to pass through the throat effortlessly. The gel masks the sometimes bitter taste of medication. After swallowing, the gel quickly dissolves in the stomach. This ensures that the medication is not affected by the gel and the body effectively absorbs the active ingredients. The user-friendly bottle with built-in dosing pump makes the gel ideal for home and healthcare institutions. The gel contains no sugar, alcohol or any common allergenic substances.

Try Severo Swallowing Gel!

SEVERO Swallowing gel

- ✓ Eases the swallowing of tablets and powders
- ✓ Quick passage of medication through the throat
- ✓ Masks the bitter taste of medication
- ✓ Has no known negative effect on the medication
- ✓ Suitable for all patients over 2 years of age
