Smart Water & Circular  
Hardware Training

### Startup-in-a-Box Framework

Hybrid (Physical / AR/VR  
Remote) Technical Training

Launch  
**Andalucia Pilot:  
Summer 2026**

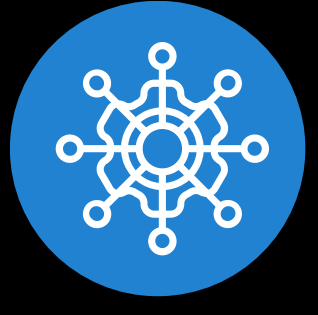

Location  
**Granada / Huelva,  
Spain**

## PROJECT OVERVIEW

LEADALEAP is a multidimensional industrial ecosystem validated by the Spanish government through ENISA and UGE-CE. Our hardware (R2W) and software (AguaCluster) solve physical resource scarcity.

We're building a circular talent pipeline: a specialized incubator transforming local youth into technical experts who manage, maintain, and spin off startups from our 9-module infrastructure.

Partners access our Andalucia Industrial Pilot (Summer 2026) as a live testing ground with fast-tracked institutional framework.
