

It Is Not About Preventing the Obvious. It Is About Having the Insight to Read Early What the Territory Was Already Saying.

Pepe Betancort Egea

Pact for Skills Member | Global3CCS | EU Outermost Region – Canary Islands, Spain

From Curiosity to Capability

- Territorial intelligence begins with **curiosity, observation and contact with the land.**
- Nicolás represents that first step: **to look, to touch, to ask and to learn.**
- Global3CCS links this with family-oriented occupational education and youth opportunities.

Villa de Mazo, Agaete and Las Palmas de Gran Canaria: three isolated territories, one archipelagic reality.

Nicolás, 9 years old. Territorial intelligence begins with curiosity, attention and care.

From Curiosity to Capability

KPIs: biodiversity, training, people involved, 100 laying hens, production, sales and routines.

- **KVIs:** employability, discipline, traceability, resilience and replicability.
- Global3CCS frames this from the Canary Islands to the EU through **AI, Blockchain and Web4.0 Photonics.**

It Was Not a Storm. It Was a Wild Audit of How a Fragmented EU Outermost Territory Is Governed

Pepe Betancort Egea

Pact for Skills Member | Global3CCS | EU Outermost Region – Canary Islands, Spain

Three Territories, One Living Classroom

Villa de Mazo, Agaete and Las Palmas de Gran Canaria form one archipelagic learning system.

- **Villa de Mazo** brings biodiversity; **Agaete**, situated learning; **Las Palmas de Gran Canaria**, traceability and visible evidence of failure.
- Together they show how an isolated and fragmented territory must learn to adapt

Javier and Pepe on site: technical reading, solution and territorial commitment

UiPach MAESTRO: KPI–KVI

KPIs: biodiversity, training, people involved, 100 laying hens, production, sales and routines.

- **KVIs:** employability, discipline, traceability, resilience and replicability.
- Global3CCS frames this from the Canary Islands to the EU through **AI, Blockchain and Web4.0 Photonics**.

Conclusion

- **Water did not surprise us. It exposed us.**
- The visible damage also exposed failures of design and follow-up.
- The task now is to read and adapt the territory before damage governs again
- **It was not a storm. It was a wild audit.**
- What looked like a natural disaster was also a human failure of design, teaching and follow-up.
- The answer is **territorial vocational education, applied technical intelligence and cooperation among island territories**.
- **Water did not surprise us. It exposed us.**

From the Territory That Warns to the Territory That Learns

Pepe Betancort Egea

Pact for Skills Member | Global3CCS | EU Outermost Region – Canary Islands, Spain

Sensitive to Cycles

- The Canary Islands are described as an isolated, fragmented and vulnerable territory.
- **We are highly sensitive to economic, social and environmental cycles.**
- What is learned earlier in the Canary Islands later becomes unavoidable elsewhere.

European Reference Framework

Pepe Betancort positions innovation from the Canary Islands to the EU and outermost regions in **Industry 5.0 Waste Management**.

- Global3CCS provides **Industry 4.0 solutions to local SMEs** and seeks sustainable technology partners.
- The proposal competes through **criteria, traceability, training and productive change**.

Shared territory, shared reading: adaptation also means learning together.
