

PROGENICYTE JAPAN Co., Ltd.

Pioneering New Frontiers!

Progenicyte Japan is a next-generation biotechnology company redefining the future of healthcare. Our innovations span cutting-edge exosome-based diagnostics and drug delivery systems, non-cell-based regenerative medicine, as well as intelligent wearable or handheld medical devices. We will transform people's dreams into life-changing realities by a bold vision and proprietary technologies.

Exosomes Unleashed

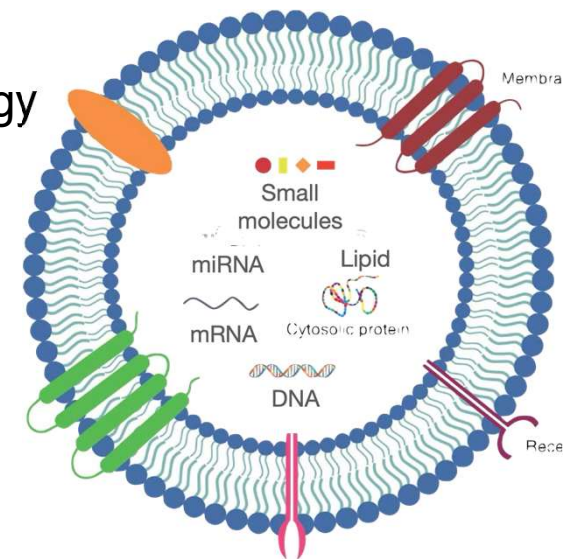

- Customized human exosomes with patented DNA-loading technology
- Plant-derived exosomes for cosmetic applications
- Nucleic acid therapeutics for glioblastoma
- Anti-pathogenic agents

Pharmacological regenerative medicine

- Drug development for Alzheimer's disease and Down syndrome

Medical devices

- Portable and wearable non-invasive devices for early diagnosis
