ABOUT US

Masterconcept is an international multi-disciplinary consulting and project development group, based in Salzburg, Austria, with offices in Europe, CIS countries, Central Asia and Asia. The Masterconcept group has 25 years of experience in the areas of tourism, real estate development and major sport events and a proven record in *moderating, structuring and realizing large scale projects*.

Besides *creating a lasting story* for your project and for your site, we ensure economical viability and a high level of customer convenience in terms of logistics, lay out and operations.

Large projects, especially if linked to an attractive touristic anker (mountain, sea, river, lake) require a smart logistic lay out and good synergies amongst public or semi-public zones and facilities. *Style and Design* is the second question of a project, which should appear after the above mentioned concept is rock solid. We do spend much time with developers, studying market demand, customer profiles, project scaling, business planning, transportation, logistics and operations as well as strategic positioning within the domestic and international context.

Furthermore, MC was and partly still is involved in prominent major sport event projects, such as Olympic Winter Games (Sochi 2014, Salzburg2014 bid, Almaty, Lviv, Beijing Winter Games 2022), Olympic Summer Games and Summer Asian Games (Tokyo, Qatar) as well as the FIFA Football World Cup.

Once project realization decisions are made, Masterconcept often remains in the project, taking over general planning responsibilities, project designs and resort operations.

Masterconcept group has successfully planned and realized more than 50 projects in the past 20 years for governments and private clients.

See below our projects and references since 2002:

• Offices

Salzburg, Vienna, Uzhgorod, Kyiv, StP, Almaty, Bishkek, Beijing

Projects

AUT, ITA, GER, GRE, UKR, LEB, DOHA, RUS, ARM, KAZ, KYG, CHIN, JAP, THAI, MYAN

BISHKEK MOUNTAIN CLUSTER

Legende

Picture: Bishkek Mountal Area overview

Google Earth

N 3 km

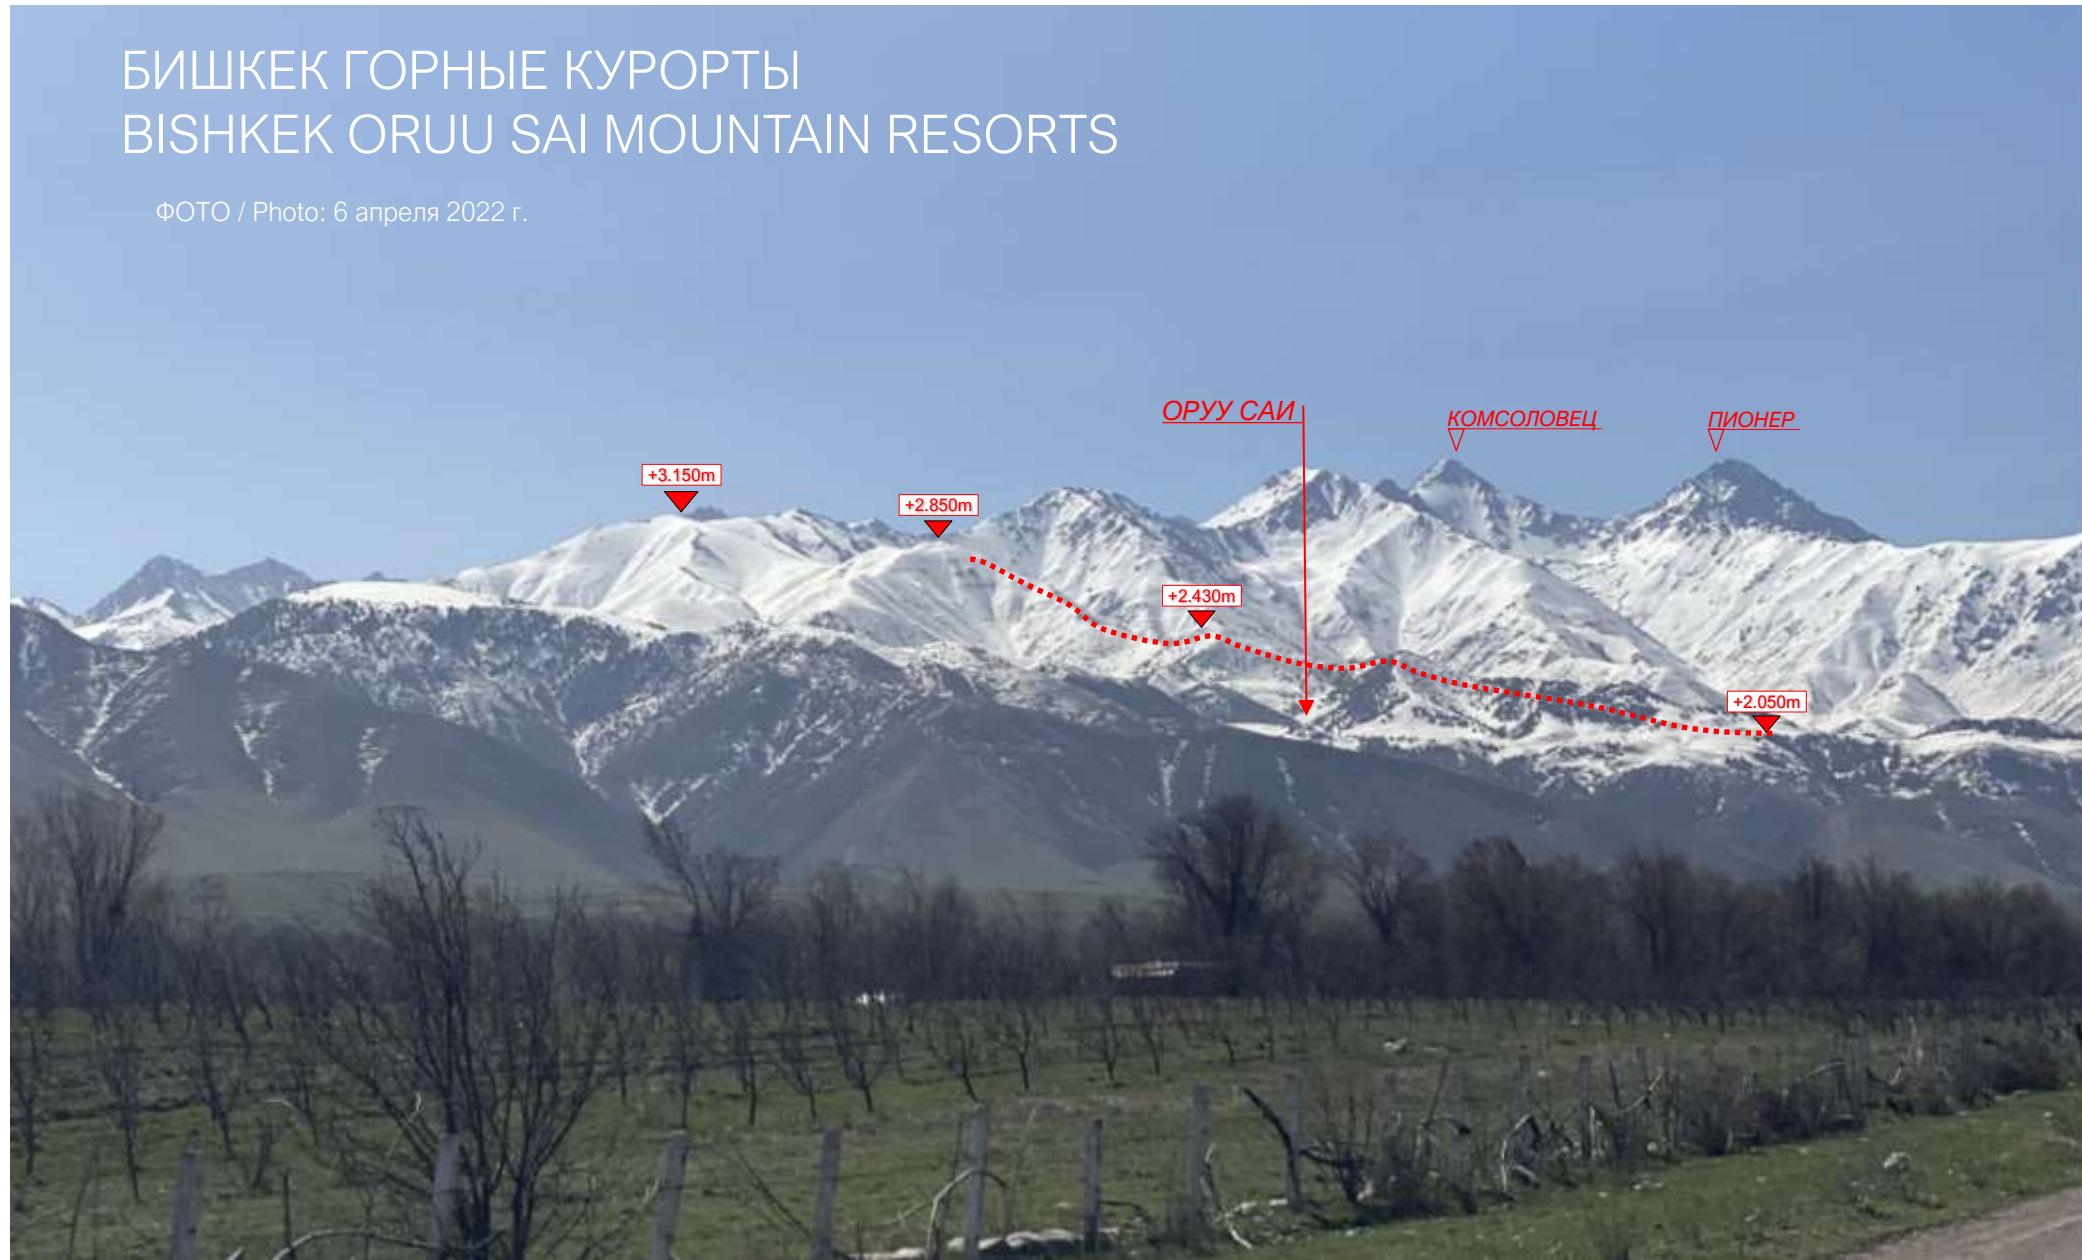

GENERAL STRATEGY

The mountain range south of Bishkek has nice potential to become large Ski Cluster for city residents as well as for international travellers. The easy access and vicinity to the city centre and it's International Airport (50km) are a good advantage, which only few international ski resorts enjoy. Although the current 4 ski areas are of old standard, the ski slopes are in nice terrain and should be improved accordingly. It is then easy to connect the ski areas to one big ski cluster of 80 – 100km of slopes, which becomes attractive to ski travellers and the hotel industry. The step by step approach allows a cost efficient development, starting as a day visitor resort for the locals and then expanding with the growth of the mountain tourism market.
