

Who we are

DISCERN is a multinational European consortium coordinated by IARC, bringing universities, research institutes and patient organisations together to investigate poorly understood cancers.

What we are working on

We combine environmental, genomic, metabolomic and proteomic data with machine learning and advanced models to identify and validate cancer risk factors.

What's the one thing we need next

We need coordinated EU action to translate DISCERN evidence into prevention through stronger monitoring, data sharing, screening capacity and harmonised policies.

**5 years Mission Cancer:
Stronger Through Connection**
