

Sea the Change

BLUE CARBON

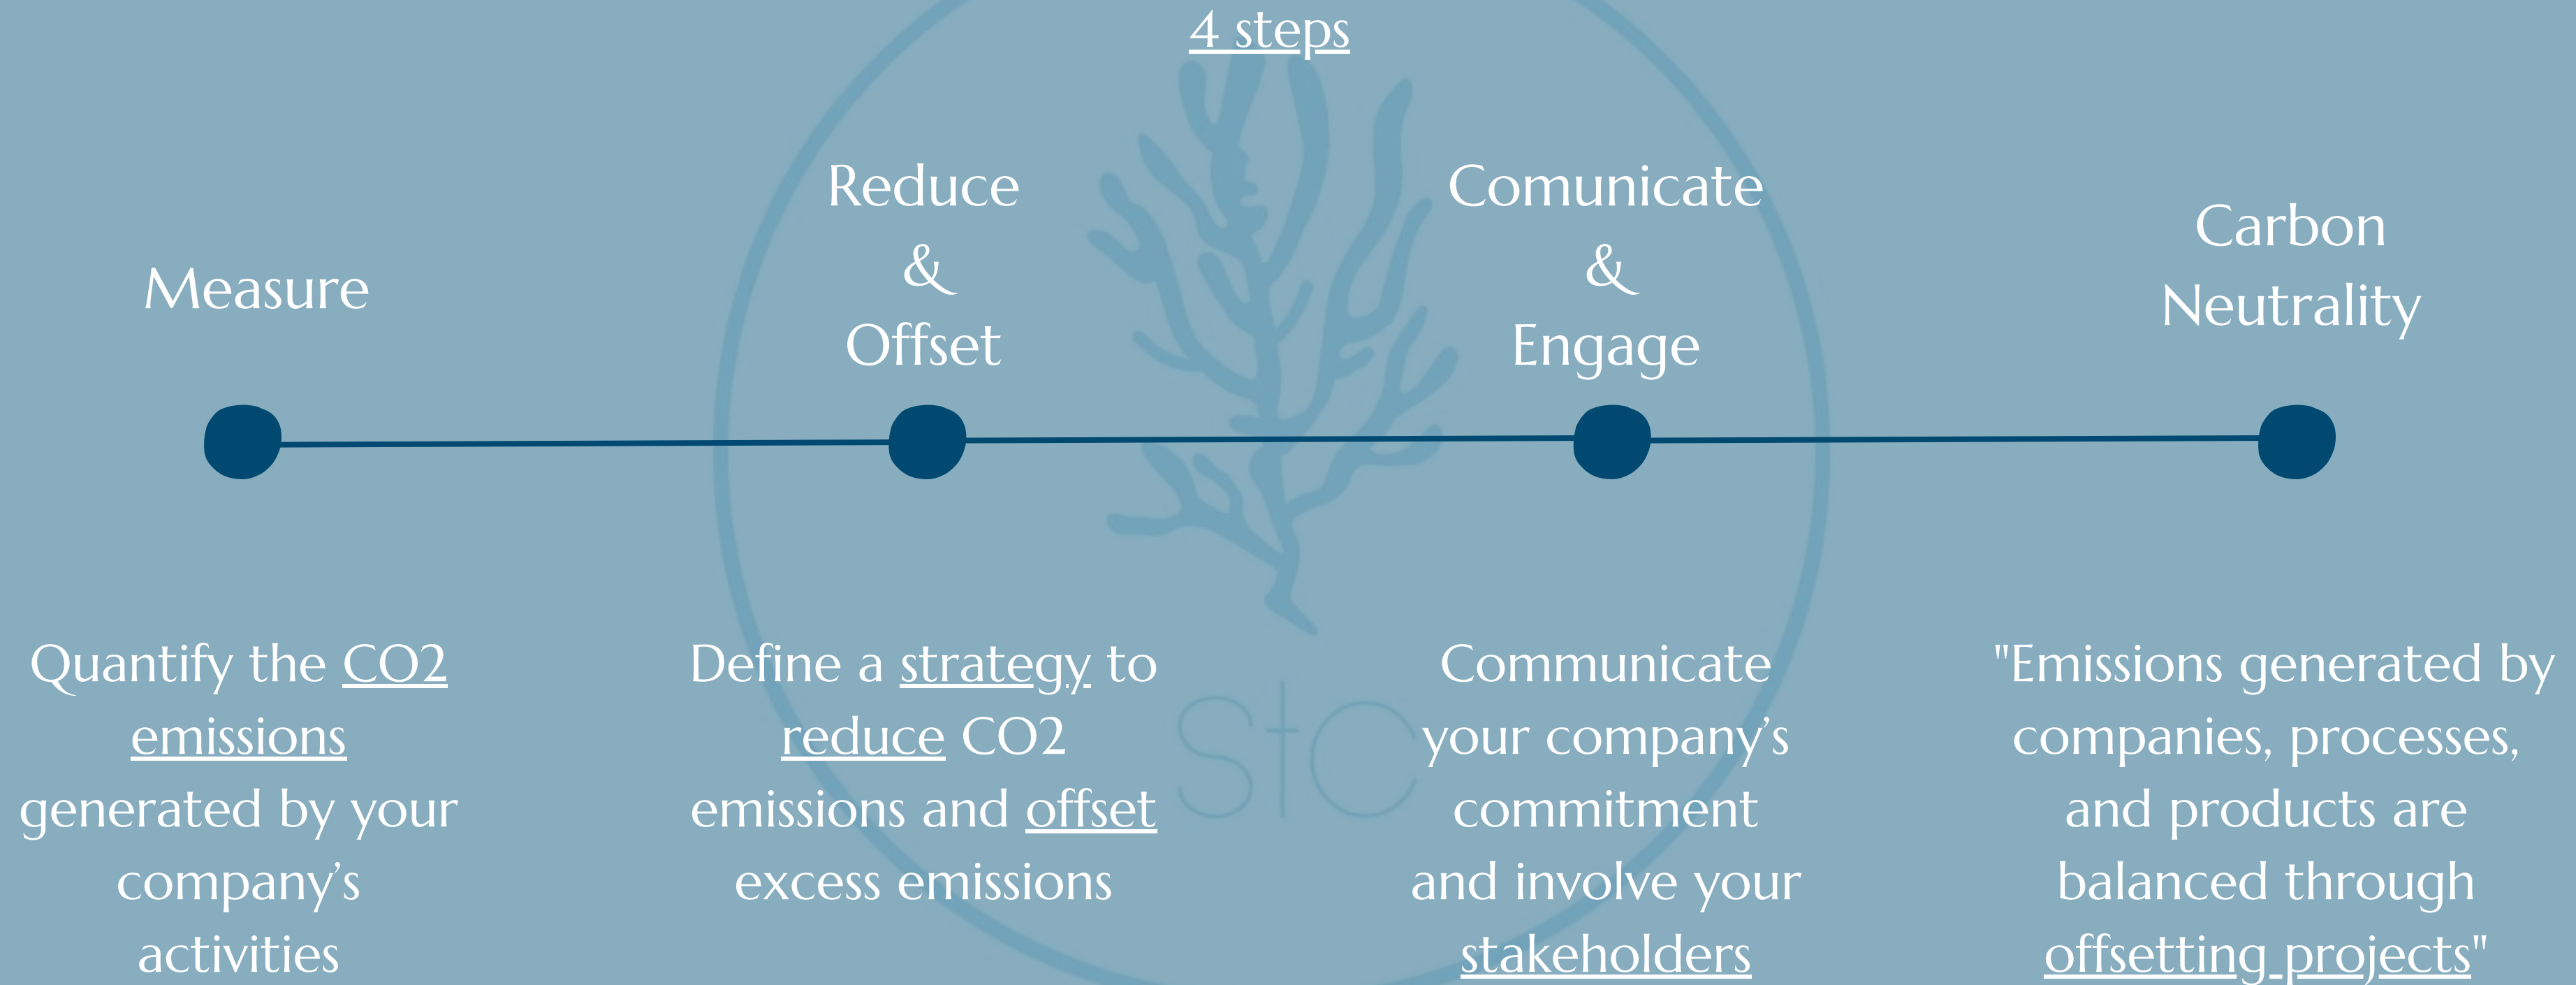

Protect Venice
and its lagoon by
offsetting your
residual
emissions

Through a project that protects the Venetian lagoon, we mitigate the effects of climate change and support the conservation of marine ecosystems. We generate Blue Carbon Credits that allow your company to offset the emissions that can't be reduced

HOW WE WORK

Areas of application

Organization

Offset Scope 1, 2 and 3 emissions in excess that you can not reduce.

Event

Measure CO2 emissions related to your company's event, offset them and make your event "net zero emissions".

Product

Measure CO2 emissions related to a product line and offset them;

Engagement

Measure CO2 emissions related to your company's activities and engage your clients and stakeholders to offset them.

TRASPARENCY & ACCESSIBILITY

Blue Carbon Credits
are certified β Neutral
by Bios srl reference
practice
UNI PDR 99:2021

The climate project is
based in Venice, we
offer your company
the opportunity to
come and see what we
do through a guided
tour
