

FROM POMEGRANATE TO ECOLOGICAL LEATHER

CATALOGUE 2024

www.pome.co www.yugencompany.com

We don't just create materials; we tell a story about what's possible when we work with nature, not against it.

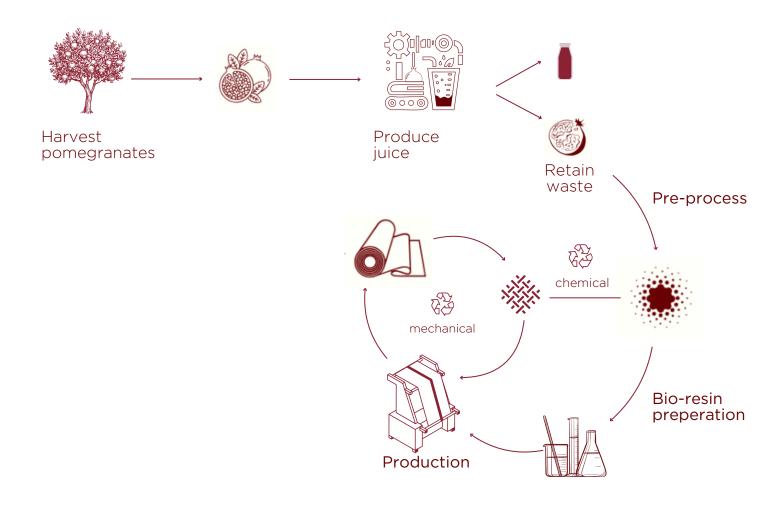

where nature meets innovation

our materials are rooted in nature's own circularity

What sets Pomeco apart is how we utilize the strength and durability inherent in the molecular composition of pomegranates. We take something often considered waste and show its true potential.

CATALOGUE TEXTURE

We believe that ethical choices should never come at the expense of quality or high design. That's why *Pomeco is fully customizable*. We ensure that our customers looking for specific textures, colors, or finishes can commit to sustainability without comprising their aesthetic standards

CATALOGUE

COLLECTION

EASE
Code: 1909
Weight: 280±%5 g/m2
Thickness: 0.5 ± 0.1 mm
Application Areas: Clothing (strech)

Code: 1912
Weight: 600±%5 g/m2
Thickness: 1.2 ± 0.1 mm
Application Areas: Bags, Shoes, Upholstery

CATALOGUE COLOR CHART

CATALOGUE COLOR CHART

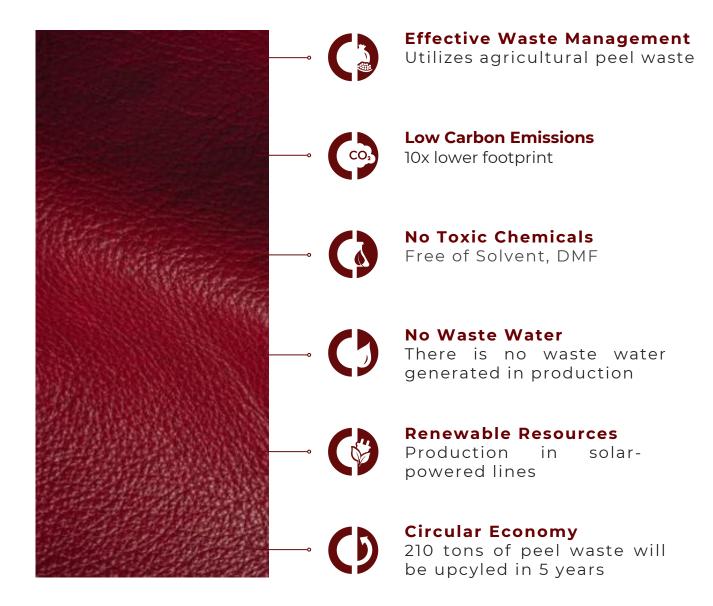

For us, sustainability is not just a concept—it's a commitment to the wholeness of the world that goes far beyond environmental responsibility.

IMPACT

By using plant-based resources and reducing the reliance on chemicals, we are able to minimize the harmful impact on soil, water, and the air. Pomeco's bio-leather production consumes less energy, requires fewer resources, and generates lower emissions than traditional animal and synthetic leather.

ACHIEVEMENTS

With this valuable achievements, we are more motivated and determined than ever to advance circular design and innovation. Together, we aim to expand POMECO's reach, creating greater impact through more sustainable choices.
