Internet voice browsing

Speaky Internet helps you navigate menus and links, fill out forms, and accomplish any task on the web thanks to AI

Calls and messages

Control phone's functions with your voice, make calls, handle messages, and manage contacts

Chatbot

SpeakyAI features a GPT powered chatbot for intelligent, conversational assistance with questions and tasks

Web TV and Radio

Listen to web radios and TV, and bookmark your favourites for quick access

SpeakyAI

Conversational screen reader

Our integrated services enable full digital access for the blind

Omni App Reader

To make any app accessible, even the ones not accessible by traditional screen readers

Manage documents by voice

With SpeakyAI you can create, edit and share documents to boost your productivity

Smart image reader

Our image reader can describe any picture, whether it's from your surroundings, gallery, or another app
