Smart Wheelchair Lending System for Public, private and Healthcare Spaces

THE CHALLENGE

- 16% of the population has mobility limitations and often lacks access to wheelchairs during visits to public or clinical facilities.
- Wheelchair availability is poorly managed, leading to thefts, over-purchasing, and burden on staff.
- No scalable, user-friendly tool exists to control or optimize wheelchair access and returns.

IMPROVE MOBILITY AND USER EXPERIENCE FOR MOBILITY RESTRICTIONS USERS

Self service Location Platform control Maintenance

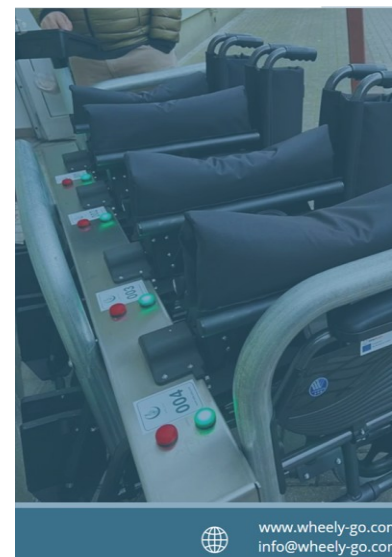

THE SOLUTION

WHEELY-GO An intelligent, self-service system for wheelchair lending, equipped with geolocation, anti-theft alerts, real-time dashboards, and user interfaces.

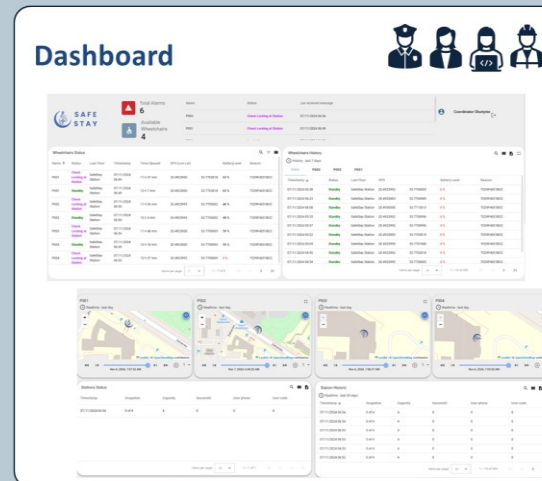

- Self-Managed Borrowing:** Users access wheelchairs via a personal code (e.g., phone number).
- Indoor & Outdoor Tracking:** **Real-time positioning** with geofencing alerts.
- Digital Platform:** Centralized management dashboard for live tracking, maintenance, and usage analytics.
- User-Centric Design:** On-screen instructions, SMS alerts, multilingual messages, audible alarms.
- Integration-Ready:** Compatible with hospital and facility IT systems (ERP, CRM, etc.).
