

PLAINsIGHT

TRUSTED PARTNER FOR DATA & AI
IMPLEMENTATIONS

Who We Are

Belgian data & AI experts SME
bringing pilots to production with a
focus on expertise, co-creation and
adoption

How We Work

Methodologies & frameworks →
human-in-the-loop validation →
measured impact → adoption →
reusability

What We Guarantee

Governance & compliance (AI
Act/GDPR), data-first design,
adoption training for staff, and clear
metrics

“

We design privacy-aware, data-driven GenAI implementations that integrate into everyday operations and move reliably from pilot to production.

From Pilot to Impactful Solution in Production*

GTB: ICF Classification & Case Support

What: System extracts structured classifications from work-functioning assessments, suggests job targets while enforcing correct framework mappings, faster dossier building

Impact: Saves ~0.5 day per administrator per assessment, reduces manual lookups, improves correctness of job recommendations and client guidance.

Document Redaction (sensitive docs)

What: Automated anonymisation of sensitive documents: OCR, entity detection and configurable redaction. Operator reviews and corrects if needed.

Impact: speeds publication, reduces manual redaction time (measured by documents/hour saved), reduces human error and increases compliance confidence

Agentic RAG Chatbot

What: AI Agent searches multiple systems, aggregates evidence, drafts suggested replies for staff to adapt

Impact: reduces manual lookups, improves precision, frees staff for complex tasks
