PARTNER EXPERTISE OFFER

Connecting cartilage bioprinting with patients and clinicians

Polish SME seeking to join a technology-led Horizon Europe consortium

Articular cartilage • Knee joint preservation
Patient perspectives • Evidence and market intelligence

TRIBE CARTILAGE sp. z o.o. | Poland | EU PIC: 861180745

WHAT WE OFFER

Focused contribution to non-technical work packages

01 Stakeholder mapping
Orthopaedic clinicians, research groups, clinics and patient communities.

02 Patient perspectives
Needs assessment, engagement design and understandable research communication.

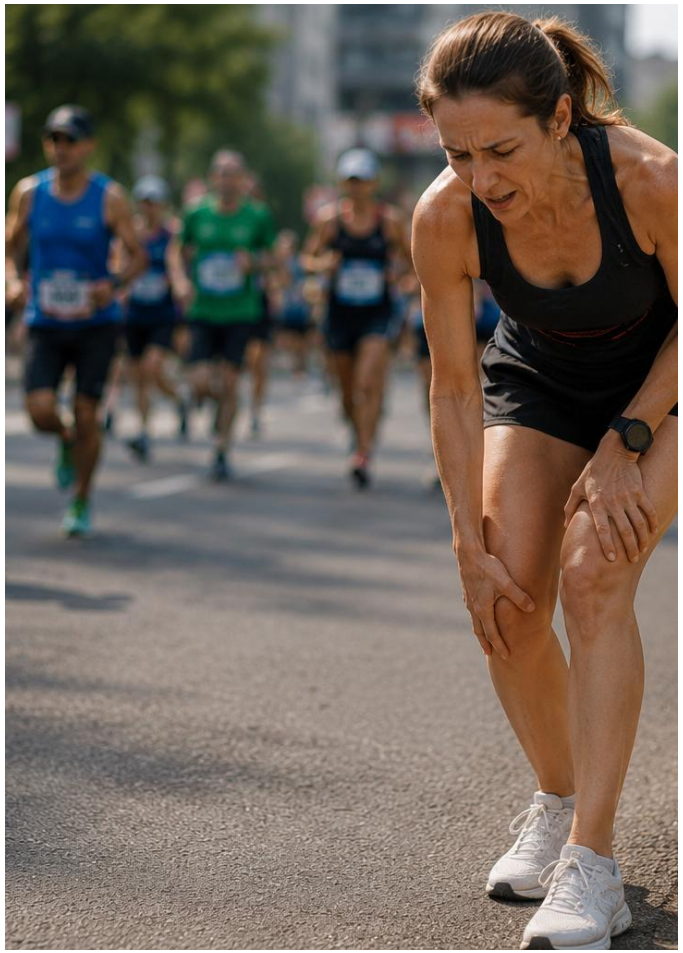

03 Evidence intelligence
Monitoring cartilage repair technologies and the clinical evidence landscape.

04 Exploitation support
Clinical adoption research, dissemination and early market pathways.

WHY US

A knee-focused interface between research and real-world needs

CURRENT ASSETS

Knee.help - broad knee-health patient-facing platform

Cartilage.help- cartilage-repair research intelligence

Ongoing conversations with Polish universities and research institutions

Founder: PRINCE2 PM experience in an MDR/FDA-regulated medical device company. Individual experience, not a claim of prior consortium delivery.

PARTNERSHIP REQUEST

Seeking a bioprinting consortium with a defined partner role

WE ARE LOOKING FOR

Coordinators and technology developers working on living-cell bioprinting for cartilage or osteochondral repair, including potential in-situ approaches.

WE CAN DISCUSS

A defined, budgeted role in patient engagement, stakeholder mapping, dissemination or exploitation, matched to the consortium's actual needs.
