

NeuraEdge Limited

From Insight to Action — FinTech × EdTech × AI

Position, Mission, Vision

Transforming knowledge into the intelligence behind what comes next.

1

Position

AI-powered knowledge infrastructure for learning, research and decision-making.

2

Mission

From Insight to Action — Empowering a sustainable future

3

Vision

Trusted AI for a Greener World

KNOWLEDGE STACK

A unified AI foundation that turns complex information into connected knowledge, adaptive experiences and actionable intelligence.

NeuraCourse™ course factory

A “course factory” powered by large language models and multi-agent prompting.

Creation

Adaptive multi-format delivery & application labs

Exam-true micro-lessons, videos, mind-maps, quizzes, case labs, calculators.

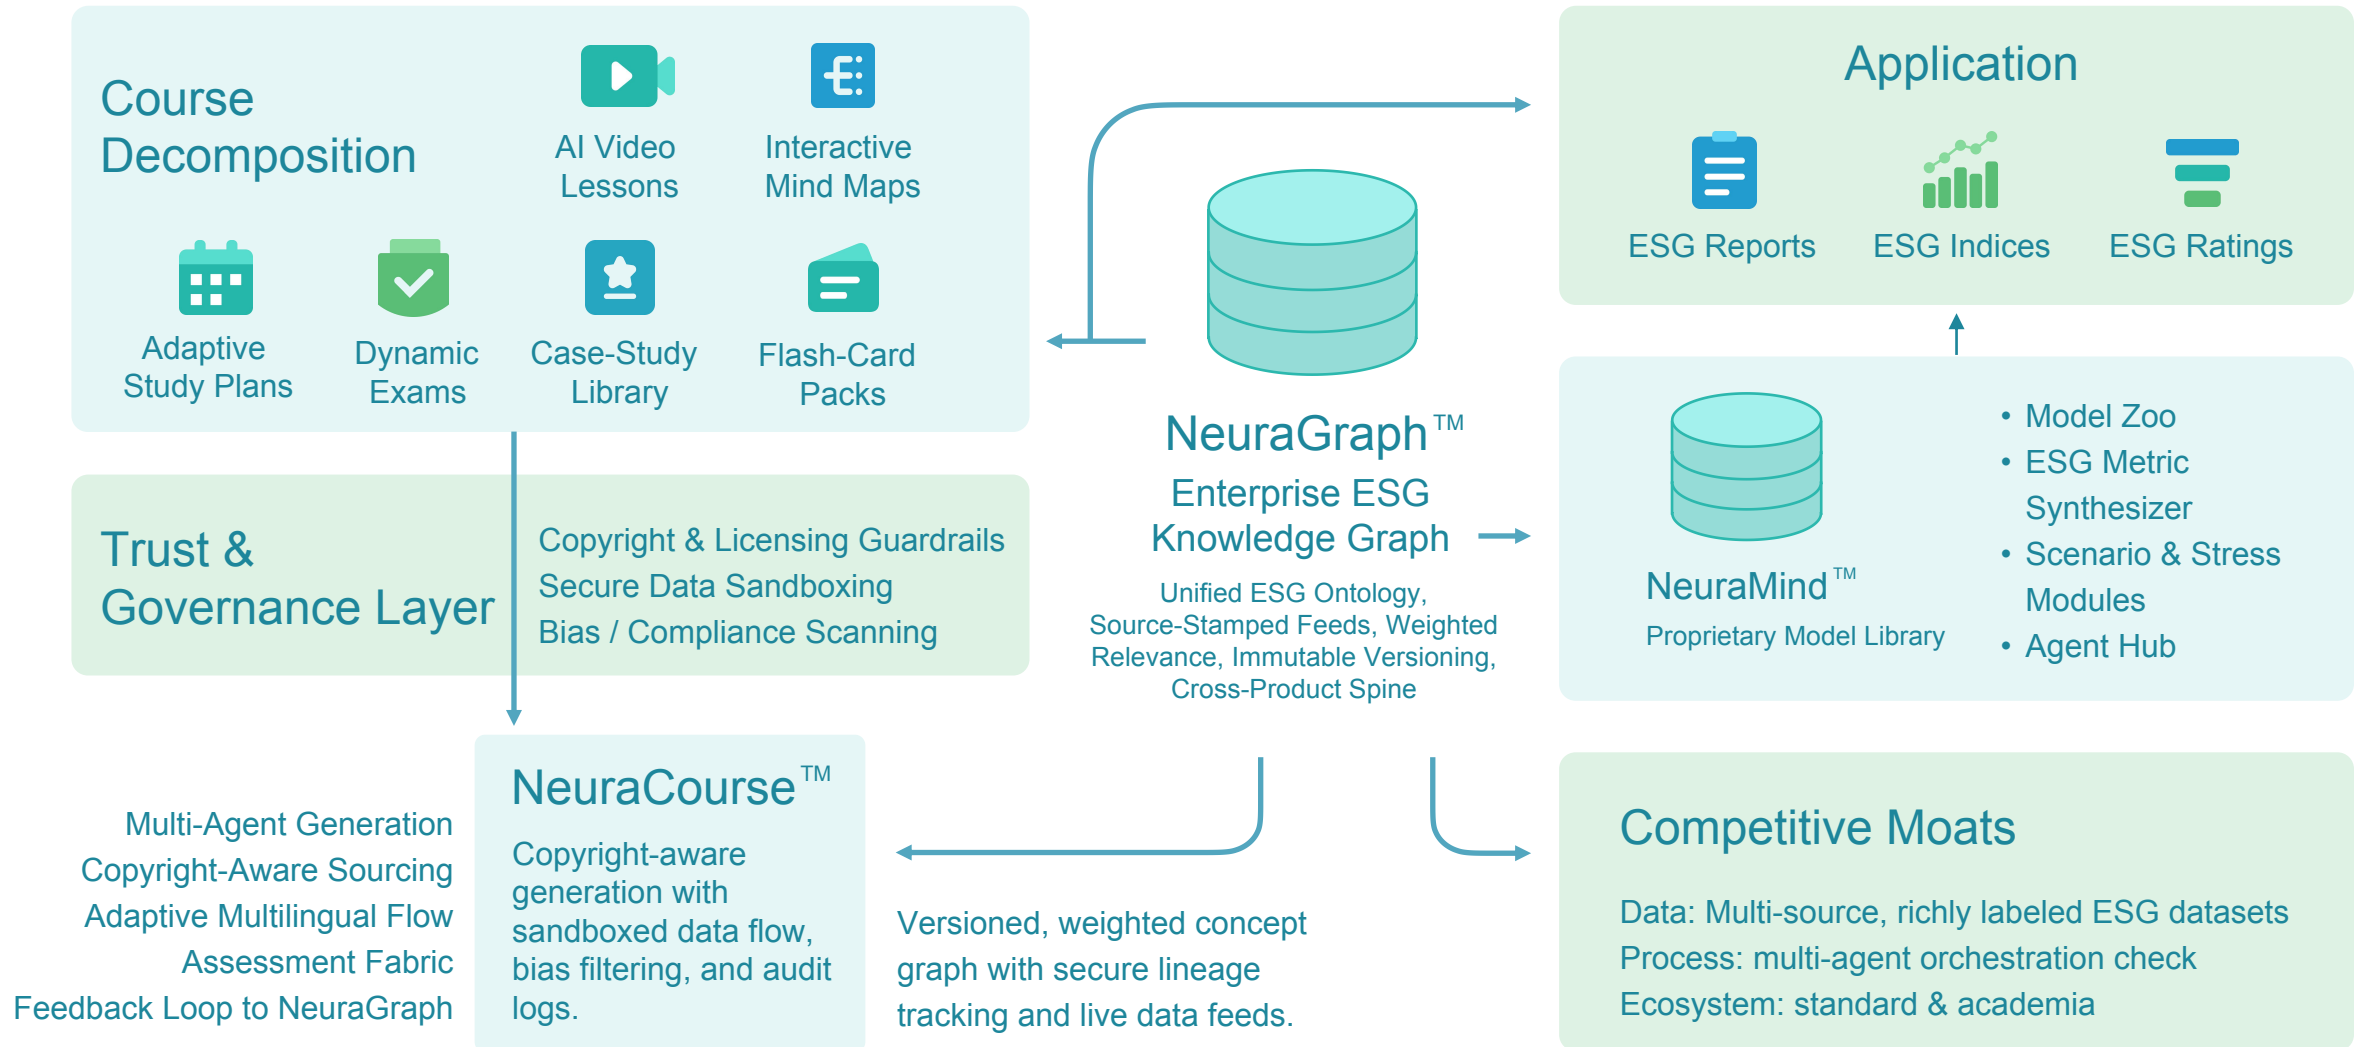

Presentation

NeuraGraph™ traceable KG ; NeuraMind™ model Zoo

Keep every claim traceable to its source, while real-time APIs deliver trusted insight to investors, companies and regulators

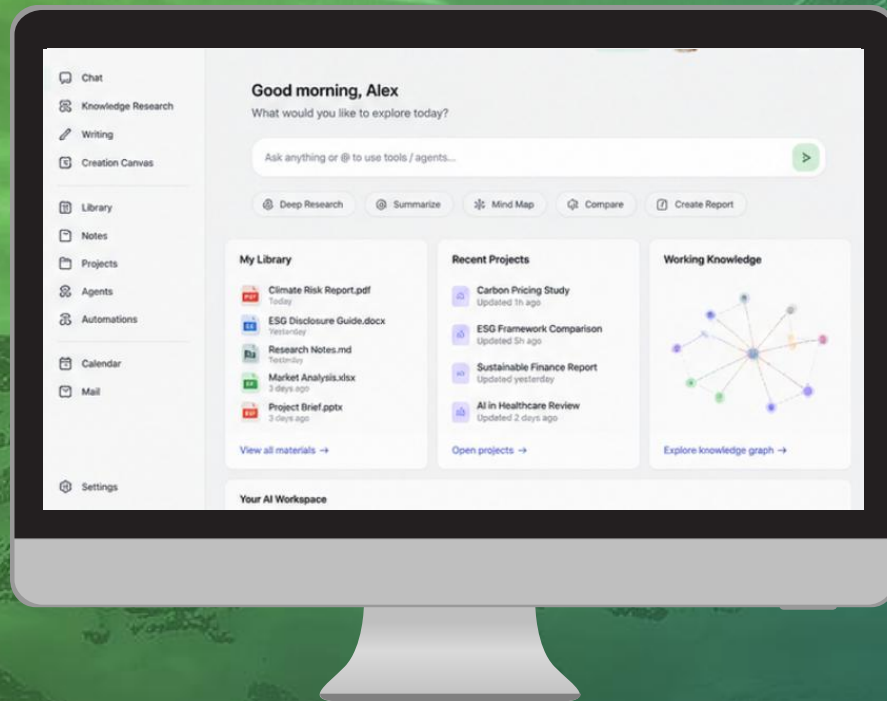

Management & Analytics

Neura Product Framework (ESG Application)

OntoScience Local-First **AI Workbench** for Knowledge Work

A personal AI workspace that turns your documents, notes and research into connected, traceable and interactive knowledge.

Built Around Your Knowledge:

Source Materials

PDFs · notes · web pages · screenshots repositories · connected apps

Working Knowledge

Read · ask · annotate · trace evidence organize ideas · make decisions

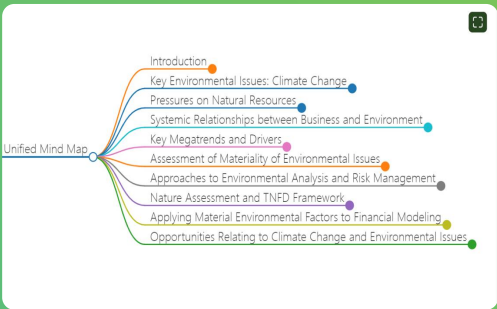

Deliverables

Reports · papers · plans · decks code · prototypes · creative outputs

From scattered materials to a living knowledge workspace.

ESG.Study

All-in-one platform for learning, practicing, and mastering
ESG — Empowering Your ESG Certification Journey

Which term describes alterations in weather patterns resulting from anthropogenic activities that modify atmospheric makeup, as opposed to fluctuations occurring naturally?

Single Choice

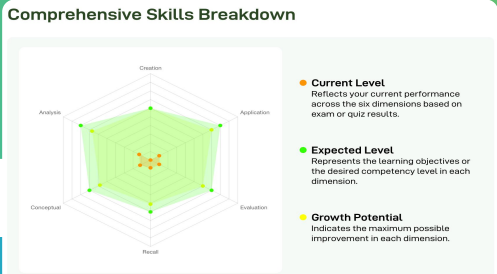

- ☒ A. Shifts in climate stemming from human-induced modifications to the composition of the atmosphere, separate from inherent natural variations
- ☐ B. Weather pattern transformations driven exclusively by solar radiation cycles and volcanic eruptions
- ☐ C. Temperature anomalies caused by oceanic current variations independent of industrial emissions

KEEP GOING!

AI Chat: See How Perfect

Next

AI Chat: Hi, feel free to ask me any questions. Why not option C? Option C is not correct because it describes a different phenomenon: temperature anomalies caused by oceanic current variations. That refers to natural climate variability, not changes directly from human activities. The key parts of the original question are: alterations in weather patterns, caused by anthropogenic activities. Enter your question

ReThink HK 2025

Empowering ESG Learning with AI

NeuraEdge showcased ESG.Study, our AI-powered learning platform, at Think HK 2025. As part of the Startup Pavilion, we connected with industry leaders, professionals, and students to demonstrate how our platform transforms ESG education through adaptive study plans, real-time AI tutoring, and verified practice exams.

InvestHK Client

NeuraEdge sees Hong Kong as a strategic base for global growth. The city's international connectivity, business environment, and position as a bridge between Mainland China and the world make it an ideal hub for our next stage of development.

Our relationship with Hong Kong is not only about where we are based. It is about using Hong Kong as a platform to connect with global clients, partners, institutions, and opportunities. As we continue to grow, we aim to build from Hong Kong and serve the world.

NeuraEdge Limited

DIGITAL TECHNOLOGIES & DATA INFRASTRUCTURE

FROM CHINA (CHINESE MAINLAND)

NeuraEdge is a Hong Kong-based artificial intelligence (AI) company that has built an AI-powered learning and certification platform. As a CFA Institute prep provider, the company delivers adaptive study plans, real-time tutoring, and practice exams mapped to leading credentials. Its platform transforms fragmented regulations, standards, and institutional content into verified, teachable concepts with page-level traceability.

Working with global professional bodies such as the CFA Institute and participating in environmental, social and governance (ESG) and sustainability events, including ReThink HK, NeuraEdge is launching pilot programmes that help organisations turn insight into operational outcomes. Built for multi-subject growth, its platform offers a cost-effective path from knowledge to capability for professionals, students, and corporate teams, with streamlined content authoring and credential alignment.

Enterprises also deploy the platform for internal training across compliance, onboarding, product knowledge, sales enablement, and leadership development. The users can ingest materials via application programming interfaces (APIs), tag and version them, assign role-based curricula, and track outcomes with proficiency analytics.
