

Who we are

TRANSCEND-XR unites 15 partners across 12 countries to improve quality of life and supportive care for young testicular cancer survivors.

What we are working on

We study survivor needs and co-create a VR intervention, testing it through pilot and randomised trials with health economic, process and ethics evaluations.

What's the one thing we need next

We need TRANSCEND-XR to remain accessible, affordable and relevant throughout survivors' journeys, during and beyond the project.

**5 years Mission Cancer:
Stronger Through Connection**
