

ALL YOUR

Construction Machinery

Ozkara Hydraulics Machine is a 41 year old family company who is a pioneer of hydraulic and construction machine sector in Turkey. We started as hydraulic repair center for heavy duty machines in 1975. Then we started to manufacture spare parts for machines and distribute some brands like Benati(sold to Fiat group) and Cukurova, Eurocomach, Faresin. Hydraulic department continue to import hydraulic pump, motors and their spare parts. We have also continue as repair and project center for Mobile Hydraulics according to needs of Turkish Market.

NEEDS UNDER

Hydraulic components for Heavy Construction Machinery

Ozkara hydraulic is one of biggest hydraulic supplier of Turkey. We are buying hydraulic components all over the world both OEM and supplier industries. We are trading these spare parts in local market and other countries. We have very large stock of spare parts from different brands. Beside brand new options, we have also hydraulic repair shop that we reconditioned hydraulic pumps and hydromotors. After this recondition, we have hydraulic testing unit that we do controls before sell it to our customers. Therefore we can supply remaid pumps and motors all over the world like they are brand new.

ONE ROOF

Manufacturing

We have a large production side in metal machining. We mostly manufacture gears, shafts, slewing bearings for contruction and heavy machinery industry. We are using both NC and CNC system in our production. We can design, draw and produce one piece to bulk manufacturing. Just let us know what you need and how many piece...

SPECIAL PRODUCTS FOR SPECIAL NEEDS

Railroad Construction

As our own production and design railroad attachment can be apply to any excavator up to 20 ton or loader or backhoe loader. With this system you can use your machine in both general applications and in rail road applications.

**With special attachment for railroads, you can make your hard job easy.
Here is one of our attachment “Sleeper Replacer” it can be used with any machine.**

Electrical Excavator

We can modify your traditional diesel excavator to electrical one. We can apply this system 1 ton – 5 ton excavators for now. With this adaptation, you can use machine as diesel or as electrical when it necessary. With this system closed area application, are more feasible like mining industry.
