

ENVIRONMENTAL CONCEPTS EXCHANGE ASSOCIATION

SUSTAINABLE SOLUTIONS FOR YOUR ENVIRONMENT

ECEXA (Environmental Concepts Exchange Association) is an Austrian cluster network of internationally acknowledged companies and experts in the field of environmental management and technologies with its main purpose to promote the experience and know-how transfer regarding environmental protection and development.

- ▶ **ECEXA** offers the whole range of services in one hand -from consulting and engineering to turnkey projects. We advise national governments, provinces, municipalities, and companies in their strategy development. This expertise offered is based on long experience and competence provided by our member companies and their skilled experts.
- ▶ Our clients can benefit from our international contacts, our alliances and collaborations with renowned institutions, such as UNIDO and international financing institutions.
- ▶ Our close relationship with universities and scientific organisations guarantees the market latest state-of-the-art knowledge and the best technology currently available – in this respect Austria is in a leading position worldwide.

All our endeavours aim at offering sustainable but also cost-effective solutions for the protection and development of the environment based on standards already applied in the European Union. In particular, the focus is on developing and transition countries which are in urgent need for suitable solutions in view of their growing environmental problems.

ECEXA develops projects especially in the following sectors:

- Energy supply and cycle solutions - renewable energy by using wind, sun or recycled material (waste-to-energy, e.g. biogas, etc.)
- Water/wastewater and sewage sludge management - fully biological treatment including the exploration and regeneration of water wells
- Waste management (hazardous and non-hazardous waste) for municipal waste, industrial, chemical waste, as well as for medical waste.
- Turnkey projects for energy self-sufficient hospitals/clinics and in the tourism sector
- Remediation and fertilization of soil for agricultural purposes
- Education and training of local personnel in the tourism, medical, and environmental sector
- Our holistic approach of project development shall not only protect the environment but also shall combat poverty by creating jobs so to contribute for a better life of the population
