## Structural steel and construction projects

SCM is a construction and steel processing company which has managed till 2020 wide range of structural projects in Baltic states and Scandinavian countries.

We have managed to turn into a major company with highly skilled experts. Thanks to being equipped with significant experience, our designers can offer customers the thoroughly considered and creative technical solutions in steel material costs.

SCM have been audited by Nuclear organisations for production and construction quality.

STEEL CONSTRUCTION MANAGEMENT

## SCM Company group structure

### SCM

STEEL CONSTRUCTION MANAGEMENT

1. Structural engineering
2. Building frame delivery and assembling
3. Overall structural works
  1. Concrete works
  2. Steel frame work
  3. Facades
  4. Roofing

### SCM

SUPPLY CHAIN MANAGEMENT

1. Outsourcing management
2. Subcontractor quality control
3. Auditing
4. Supervisin
5. Project management
6. Logistic solutions
7. Etc

### SFM

STEEL FABRICATION MANUFACTURING

1. Machinery engineering
2. Structural steel fabrication
3. Machine building steel fabrication
4. Serial production
5. Machinery assembling works

- Overall at this moment in Company group are working around 140 employer
- Under subcontracting 150 employer

- Group turnover in 2021 was around 30 m euro
- Because of allready signed contracts for 2022 our expected turnover will be around 35m euro.

- Engineering and construction work management office in Riga, Latvia
- Supply chain management office in Tallin, Estonia
- Steel construction factories in Jelgava, Daugavpils and Riga, Latvia
- Subcontractor chain in Baltics (around 40 stable every day working companies)
- Cooperation partners in Skandinavia – Norway, Finland, Denmark

## Products

Diversificated products:

Structural steel solutions:

Machinery:

## Diversificated markets:

### Norway:

1. Realized 15 structural projects
2. Realized 5 project from design till finall assembly

### Finland:

1. Realized over 50 structural projects according to Eurocode and national Annexes.
2. 24 projects realized from design till finall assembly.

### Denmark:

1. Realized more than 1 construction projects
2. Active 3 contracts, SDU Sund hospital, BFW Airport terminal

### Baltic states:

1. Realized more than 200 construction projects
2. Work with the biggest construction companies

## Certificates that SCM Latvia has:

### Construction and Production certificates:

- EN1090-1:2009/AC:2010 (Exc4) EN 1090-1 XC4 - Welded steel elements for load bearing applications
- VT MT testing certificate
- IWE Certificate
- EN ISO 3834-2:2005 - Welding process quality
- ISO 9606-1 - Welders certification
- ISO 45001:2018 - Occupational health and safety
- ISO 9001:2015 - Quality management
- ISO 14001:2015 - Environmental management

### Welding certificates:

- Welding certificates EN287
- Welding types – MIG/MAG, TIG

### Engineering software:

- Tekla
- AutoCad
- Bently Staad
- Robot

STEEL CONSTRUCTION MANAGEMENT

## SCM Services

### Engineering

- Designing wide range of steel construction buildings
- Steel construction adaptation for every country
- Existing structural project weight decreasing
- Redesigning existing projects
- Non standard structures on customers demand.

### Production

- Production of steel constructions
- Steel cutting, welding, processing
- Quality checking
- Surface treatment (Steelblasting, painting e.t.c)
- Packing

### Construction

- Project management by certified and highly experienced experts
- Steel construction erection and assembling
- Quality control, geodetic measurements
- Frame cladding
