

# ATS

*Your business our focus*

**MACHINE RELOCATION**

**MAINTENANCE**

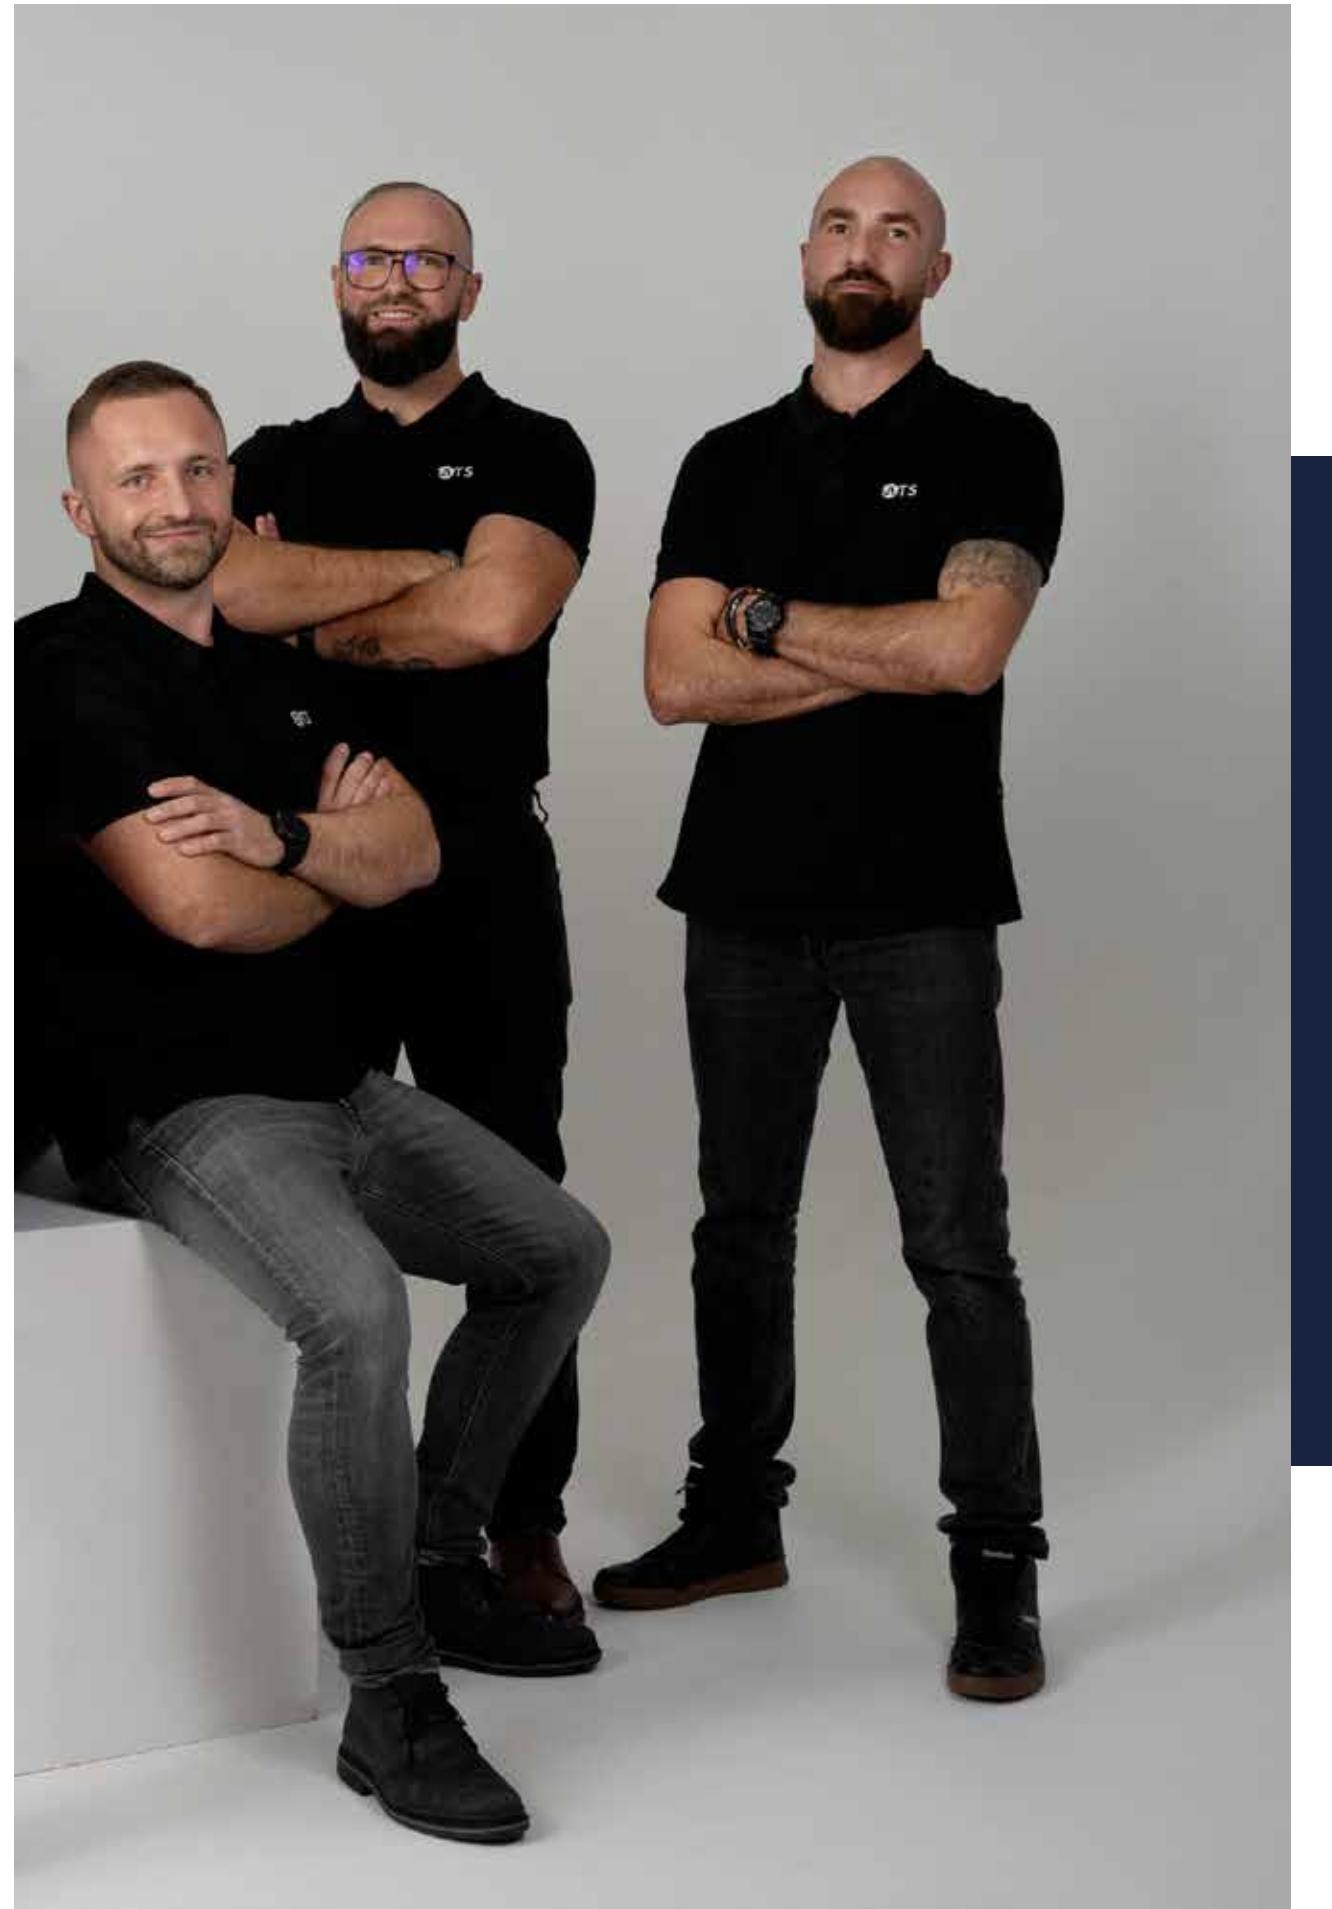

**i-CONSULTING**

**ENGINEERING**

# About us

**We are the LEADER** in the service, maintenance and relocation of industrial machinery on the Polish market. Our customers trust us because the quality of our services is our priority.

**We understand the price of your success.** It is dedication, hard work and constant commitment to what you are best at. Difficulties are no excuse and we help you avoid them.

Advanced Technical Services is a team of people who proudly operate in the technical services market. We offer **comprehensive support** for manufacturing plants. We come from the aerospace and automotive industries whose experience provides a solid foundation for our business.

# About us

## MISSION

Providing comprehensive solutions  
in the fields of technical support

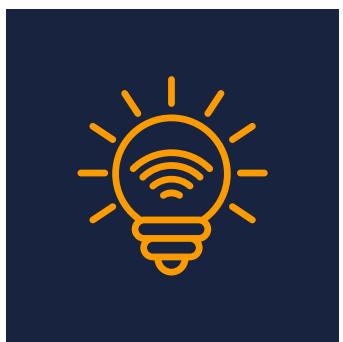

## VISION

Relocating and servicing  
machines for the best

## VALUES

Ethics, quality, and partnership

# Why us?

## Innovative solutions and professional approach

Working with us means benefiting from innovative solutions that we create specifically for the success of your business.

## Qualified team

Our employees are highly qualified mechanics, electricians, and automation specialists with many years of experience in the maintenance area.

## Industry experience and knowledge

We are a team of practitioners with many years of experience in the field of maintenance.

# Hybrid Maintenance®

ATS helps the largest manufacturing companies in Poland to maintain the highest efficiency and availability of their machinery. Our solutions are tailor-made for you. With our reliability, innovation, and experience, it is safe to say that we are number one in the maintenance industry!

## Our offer – Your advantage

- **Hybrid Maintenance®**  
(flexibility and cost optimisation in one model)
- **Comprehensive maintenance**  
(comprehensive service that allows you to focus on your company's strategic objectives)
- **Prevention and monitoring**  
(with condition monitoring, root cause analysis and preventive plans, we spot problems before they turn into failures)
- **Resource optimisation**  
(spare parts management, CMMS machines and KPI performance measurement)
- **Development and strategy**  
(TPM implementation, skills matrix development and advanced technical management programmes)
- **Emergency repairs**  
(rapid response, downtime reduced to a minimum)

Machinery Service and Maintenance Manager

## WOJCIECH DUDEK

*We are always prepared and leave nothing to chance. When things go well, people tend to think that little effort is required to achieve this. But this is only until a piece of the puzzle fails.*

**We are the leader in the field of**  
Maintenance

**Our employees are our calling card**  
Qualified technical staff

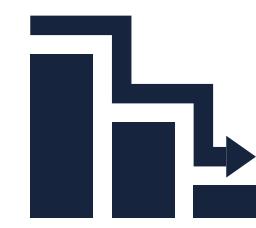

**Your business, our support**  
Many customers have put their trust in us – join us

# Hybrid Maintenance®

**Hybrid Maintenance is an innovative service launched by our company.**

It combines service and maintenance responsibilities. The model enables our customers to benefit from opportunities such as reduced inspection times and downtimes, optimal use of staff resources and financial savings. The process of establishing a relationship with customers consists in adapting to the nature of the production line and providing a high-quality service.

**Cost  
savings**

**Maximum availability  
of machines**

**Full expert  
support**

**Guarantee of work  
continuity**

**HYBRID

# Machine relocation

One of the core activities of ATS is the relocation of machinery, equipment, process lines, and manufacturing cells.

We also offer the implementation of projects for machine installations (various extraction/ventilation systems, electrical systems, IT systems, coolant and water systems, and compressed air systems) according to the customer's needs and requirements.

## Scope of services:

- Disassembly, assembly, and transport of industrial machinery (national and international).
- Loading, unloading and moving machinery in the plant Full-service.
- Connection and commissioning of equipment.
- Construction of foundations for machinery and production lines.

*The number of production sites that have seen we are worth trusting is growing every day. We do not claim to be good at everything. We only focus on a few things – the things we are best at.*

# Our specialist

Machine Relocation Manager

## JANUSZ GARBACZ

*The number of production sites that have seen we are worth trusting is growing every day. We do not claim to be good at everything. We only focus on a few things – the things we are best at.*

### Knowledge and experience

Quality is our priority

### 100% of projects completed on time

Scheduling and management are the key to success

### Fair and clear rules

Win-Win cooperation with customers

# Innovative Hybrid Relocations®

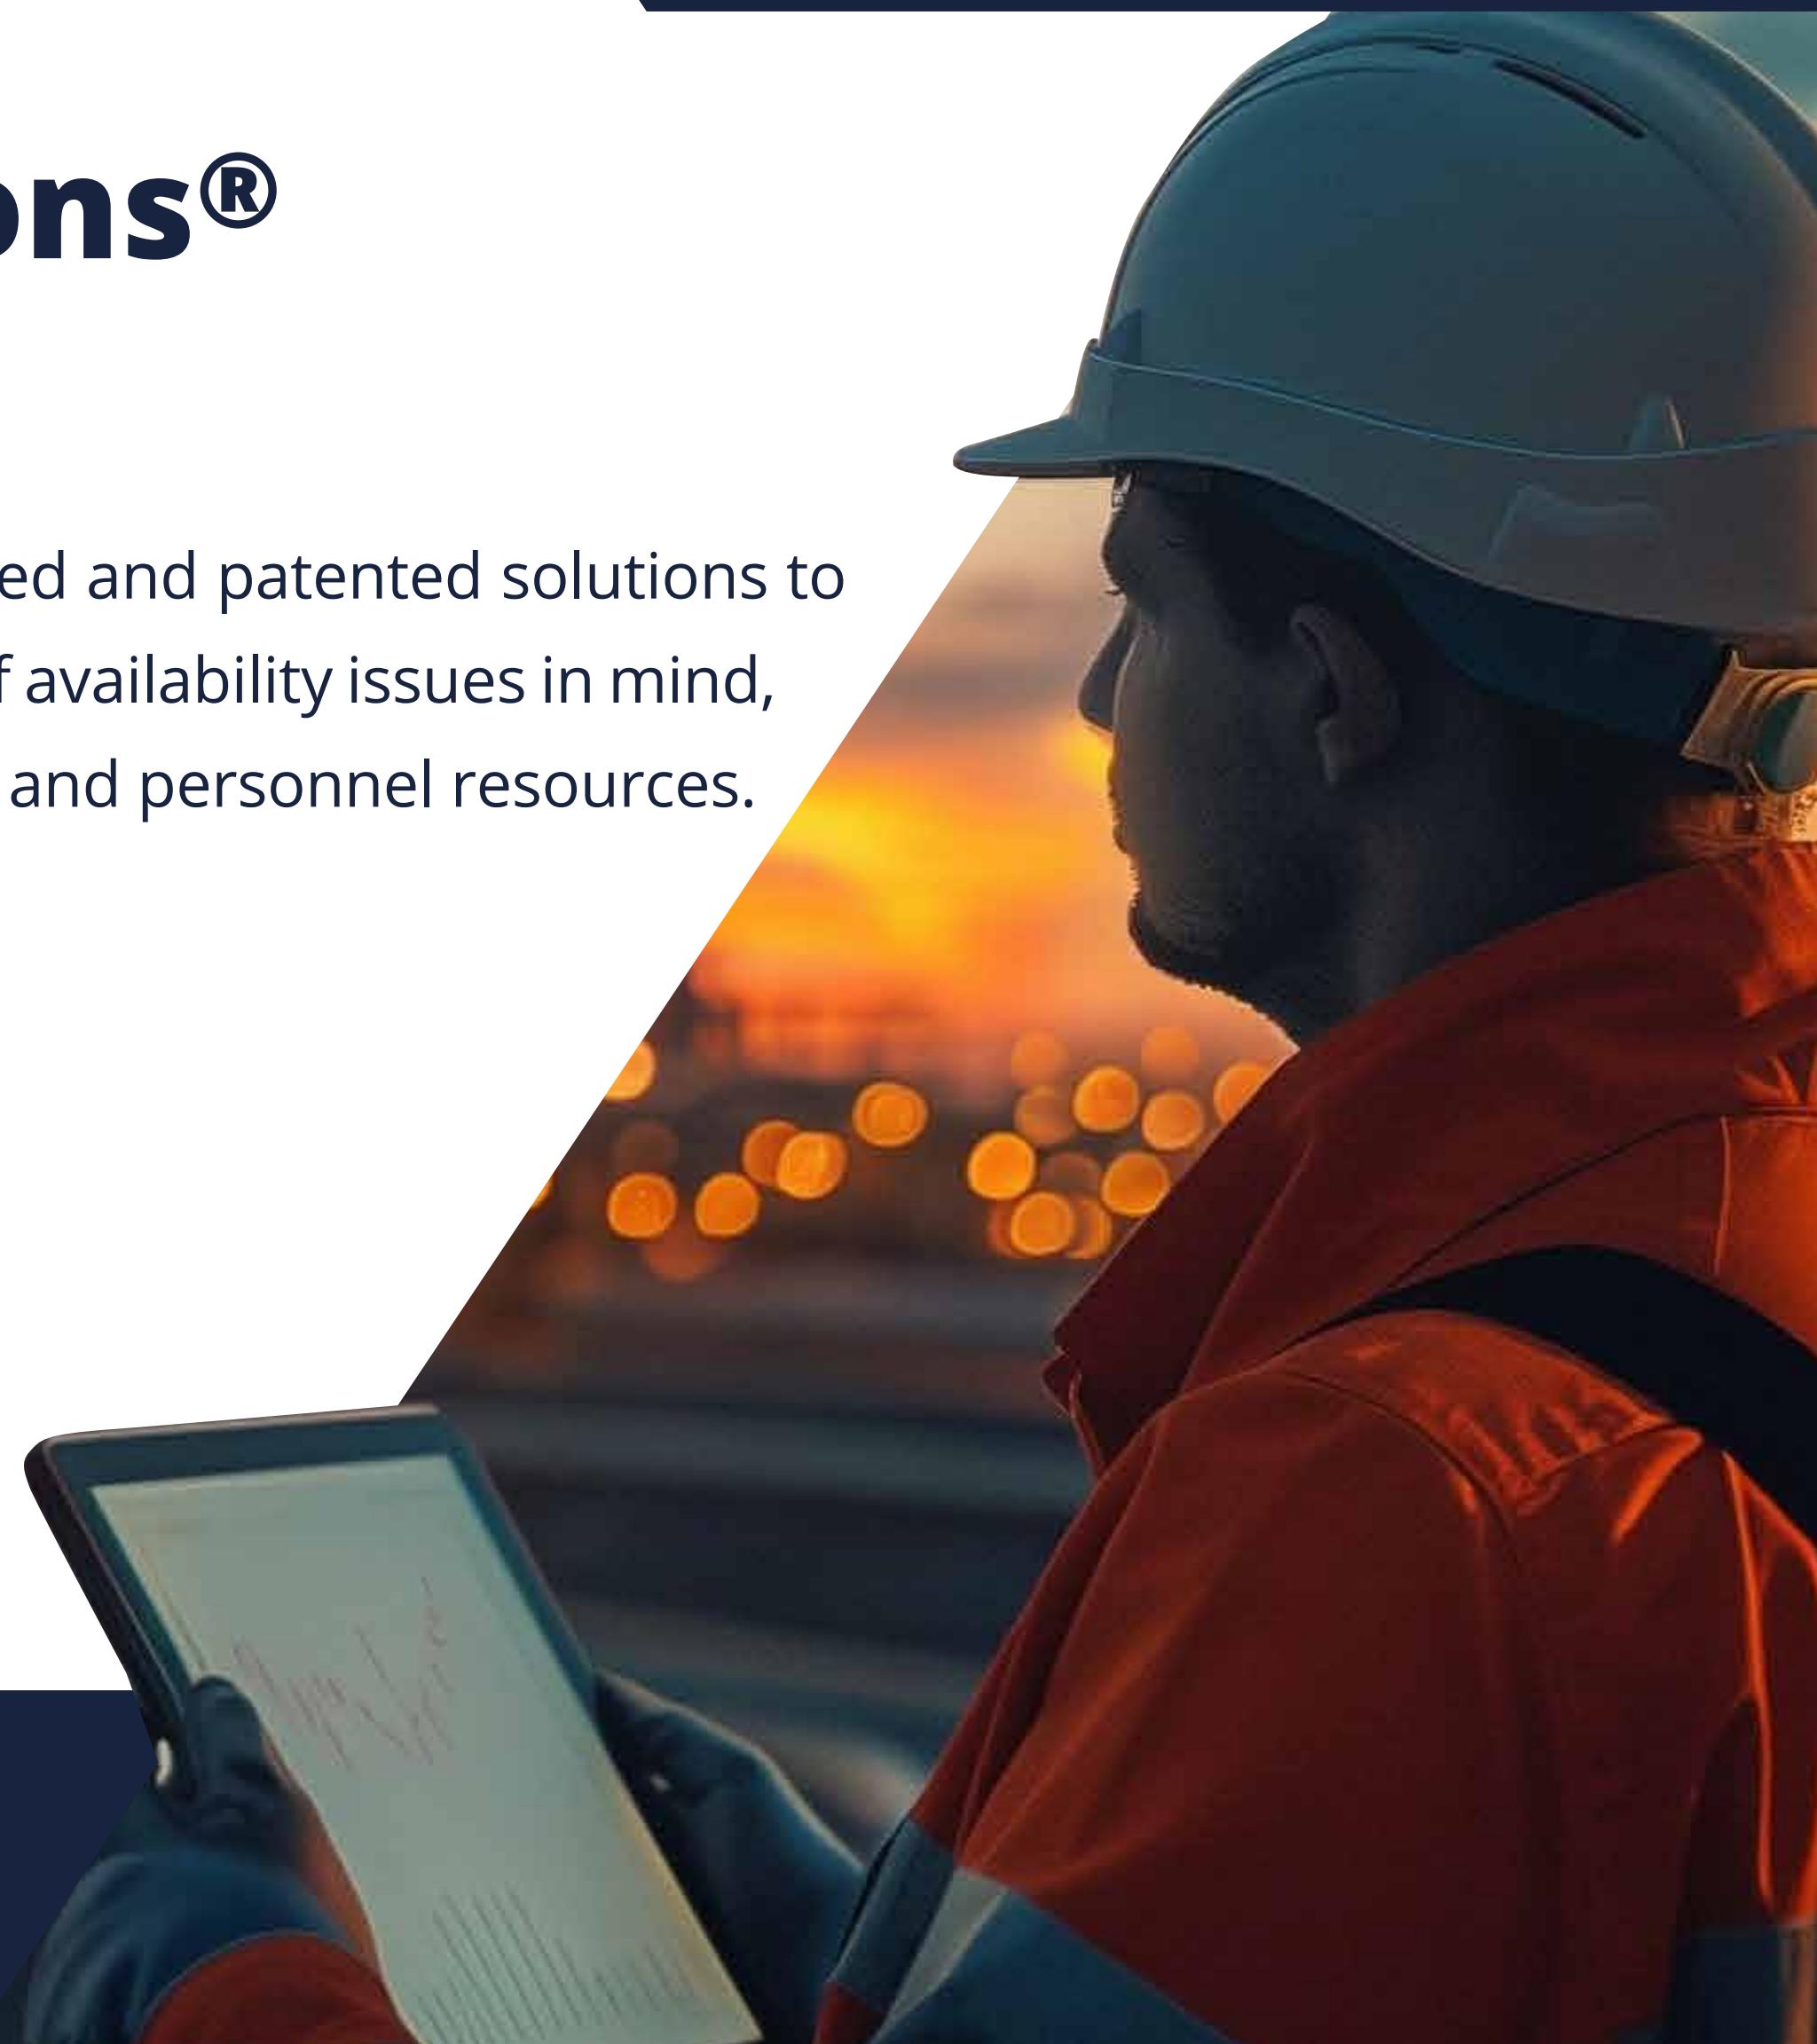

Solutions used for hybrid maintenance also work well for relocations. ATS has developed and patented solutions to increase the availability of workers for machine and equipment relocation. With the staff availability issues in mind, we have prepared a ready-made solution to optimise the use of all available technical and personnel resources.

**The solution generates savings of about 30% of the contract value.**

**TRUST THE INDUSTRY LEADER**

**ATS is more than just a service**

# Engineering

## **Audits and adaptation of machinery to minimum requirements and CE standards**

Our technical audits are designed to assess the compliance of machines with applicable minimum requirements and CE standards. We carry out a thorough analysis of the technical condition of the machinery, identify any areas in need of modernisation and bring the equipment into line with EU regulations and safety standards.

## **Layout**

We offer a comprehensive layout design for production and storage halls. Our plans take into account the optimal arrangement of machinery and equipment to maximise operational efficiency and ergonomics of workstations, saving time and production costs.

## **Pipeline design and installation**

We specialise in the design and installation of a variety of pipelines for industry, including systems for compressed air, water, coolant and extraction. Our solutions are tailored to the specific needs of our customers, thus ensuring reliability and operational efficiency.

## **Electrical design and installation**

We carry out electrical projects and complex installations tailored to the nature of machinery and production lines. We provide a full service, from design to installation of power systems, industrial automation, and control systems, ensuring the highest safety standards.

## **Design and assembly of steel structures**

Our offer includes the design and assembly of steel structures necessary for the installation of machinery and production lines. With robust and safe design solutions, we respond to the individual needs of industrial plants.

## **Repair of spindles and electric spindles**

We perform repair and refurbishment for spindles and electric spindles to restore the full efficiency of the equipment and extend its service life. We carry out thorough diagnostics and repairs, using advanced technology and genuine spare parts.

## **Crane equipment service**

We offer servicing and maintenance of crane equipment, such as overhead cranes, hoists, and forklifts. Our services include regular maintenance, repairs, and modernisation, ensuring safe and reliable equipment operation.

## **Overhaul and modernisation of machinery**

We are involved in the overhaul and modernisation of industrial machinery that needs to be retrofitted or restored to full functionality. With our technical expertise and experience, we extend the life of equipment and increase its operational efficiency.

## **Measurement and alignment of machine geometry**

We make precise measurements and alignment of the geometry of machines, which is crucial for their proper operation and performance. With state-of-the-art measuring tools, we ensure the accuracy and stability of the machines at every stage of their operation.

**ENGINEERING**

## KRZYSZTOF BEDNARCZYK

*We understand the price of your success. It is dedication, hard work and constant commitment to what you are best at. Difficulties are no excuse and we help you avoid them.*

### Challenges and interesting projects

No limits and work full of passion

### Hundreds of quotations prepared

Give us a task that is impossible to do – this motivates us

### We do not take the easy way out

There is no success without hard work

# i-Consulting

**ATS**

Your key to success  
in modern manufacturing.

Contact us today and discover  
how we can improve your  
production together!

## **Technical consulting**

We carry out technology audits, optimise processes and implement state-of-the-art technologies, reducing costs and increasing operational efficiency.

## **Business consulting**

We support companies in the development of business strategies, optimisation of business models and process management, helping them to achieve a competitive advantage in the market.

## **Interim management**

We provide experienced managers for temporary projects to carry out restructuring, make changes, or improve the company's efficiency at key moments in its operations.

**i-CONSULTING**

# Our specialist

i-Consulting Department Manager  
**MICHał WENELSKI**

*I specialise in building business strategies and carrying out implementation and optimisation projects that enable companies to exceed their limitations.*

## Effectiveness

This is the result of a clearly defined objective and well-planned work.

## Partnership

Together with the team, I define the priority areas and then develop and implement solutions tailored to the nature of the organisation.

## Transformation

With a customer-oriented approach and fine-tuned tools and processes, I develop tailor-made solutions. I believe that nothing is impossible.
