GERVASIO

A.L.D. di Gervasio Luigi & C. S.n.c. | Italy

SMART FACTORY 5.0

Technology Partnership Request

Industrial transformation project

A.L.D. GERVASIO is an Italian manufacturer of agricultural trailers and heavy-duty agricultural transport equipment with more than 120 years of manufacturing experience. We are developing a Smart Factory transformation programme to increase productivity, quality, traceability and digital integration across our production processes.

WHAT WE WANT TO BUILD

- Automated and robotic production cells
- Robotic / automated welding
- AI and machine vision for quality control
- MES / ERP and machine-data integration
- IoT, traceability and production monitoring
- Predictive maintenance and digital twins

PARTNERS WE ARE LOOKING FOR

Technology providers and system integrators with expertise in robotics, industrial automation, automated welding, artificial intelligence, machine vision, MES/ERP integration, IIoT, digital twins, production planning, traceability and advanced manufacturing.

Preferred cooperation: technology cooperation, joint development, engineering support, system integration and long-term industrial partnership.

APPLICATION ENVIRONMENT

The solutions will be applied to the production of agricultural trailers, slurry tankers, manure spreaders, bale platforms and related heavy-duty agricultural equipment. The project is currently in the planning / development stage and is open to scalable solutions suitable for progressive implementation.

Target outcome: a more automated, connected, efficient and competitive manufacturing system while preserving GERVASIO's product know-how and customization capability.

OPEN TO INTERNATIONAL TECHNOLOGY PARTNERS

We welcome meetings with technology companies, engineering firms, system integrators, research centres and industrial partners interested in co-developing or implementing advanced manufacturing solutions for the GERVASIO Smart Factory project.
