

Your Breath: Your Health

Exhaled Breath Condensate Samples with PBM-Hale™

Advance your research and clinical development with non-invasively collected, saliva-free samples of exhaled breath condensate. Samples are collected from both patient and control donors according to your study specifications.

What We Offer

- Access to ethically sourced Exhaled Breath Condensate samples from UK-based biobanks
- Samples collected using the PBM-Hale™ device under NHS REC approval
- Matched control and patient cohorts available
- Customisable collection protocols (single or longitudinal sampling)

Why PBM-Hale™

- Designed to eliminate salivary and ambient contamination
- Consistent, reproducible sampling for respiratory research
- Non-invasive and user-friendly
