

Domat Control System: Building Automation That Works for You

💡 Smart Building Solutions Without Limits

We provide comprehensive building automation solutions that prioritize your needs – not ours. While others may lure you into vendor lock-in through proprietary ecosystems layered over open protocols, we offer true flexibility, transparent architecture, and long-term freedom of choice – without hidden fees.

♥ Why Industry Professionals Choose Domat

- ✓ **Expertise at Hand:** Our support is delivered directly by the engineers who design our hardware and software. When you call, you speak to someone who knows the system inside out.
- ✓ **Partner-Driven Innovation:** We value feedback from the field. When it makes sense for both sides, we're ready to develop new features or solutions based on real-world needs.
- ✓ **Protocol-Level Openness:** Native support for Modbus, BACnet, M-Bus, and DALI ensures seamless integration with existing infrastructure. We even offer converters for selected proprietary systems.
- ✓ **No Hidden Costs:** Zero software licensing fees, no per-point charges, no renewal traps – just straightforward, predictable pricing and a lower total cost of ownership.
- ✓ **Hardware Pricing Advantage:** Don't take our word for it – compare our price list with others. Our trusted partners benefit from individually tailored pricing policies that reflect long-term cooperation.

📁 Complete Ecosystem for Building Management Success

Our portfolio includes programmable controllers, sensors, HMI panels, and software solutions that work together seamlessly. Whether you're managing HVAC systems, energy monitoring and metering, lighting, shading, remote access or other building technologies, our solutions provide the reliability you demand.

For Partners & Integrators 🧑‍🔧

Become a Domat partner to enhance your offering with our solutions or as an OEM/white-label partners. Our flexible approach empowers you to create competitive, integrated building solutions based on your requirements without limitations.

For Facility Managers & Building Owners 🏠

Gain full control over your building's performance with intuitive interfaces and remote management capabilities. Our systems optimize energy and cost efficiency while ensuring comfort, reliability and scalability. Our tech is modular and future proof.

👏 Project Success Story

A multinational retail chain switched to Domat after experiencing expensive license renewals and service limitations with their previous vendor. Result: 22% energy savings through optimized HVAC control, 30% lower implementation costs, and the freedom to choose service providers based on quality and price.

Contact us today to discuss how Domat can meet your specific building automation needs.
