

# Catalyst bins

Fleet of more than 2000 custom made bins suitable for safe handling and transportation of spent catalyst

## CATALYST BIN

- 2m<sup>3</sup> metal container for dry and wet catalyst
- UN/IMDG/ADR/IMCO-certified
- UN certified packing code 11A
- UN Packing group II and III
- Suitable for self-heating and pyrophoric spent catalyst

## SAFE IN USE

- Less handling on site movement as 1 catalyst bin = 11 drums
- Efficient storage; stackable empty and full
- 4 way pick up by forklift

## ECONOMIC AND ENVIRONMENTAL SAVING

- Easy loading - Time and cost reducing during turnaround
- No need to buy UN drums
- No pallets needed
- Save cost by fully utilizing space in trucks and 20'/40' containers and reduce the CO<sub>2</sub> footprint of the logistics chain

100% leaktight

# Catalyst bin Specifications

## Type: B-5000 Black

|                      |                                    |
|----------------------|------------------------------------|
| Capacity:            | 2000 litres                        |
| Tare:                | 550kg                              |
| Size mm:             | L x W x H 1122 x 1122 x 2115       |
| Material:            | Carbon steel 3mm                   |
| Fill opening top:    | 545mm x 160mm                      |
| Nitrogen connection: | Yes                                |
| Pick up:             | Four way by forklift               |
| Hoisting:            | No                                 |
| Max gross weight:    | 3250kg                             |
| Bottom unloader:     | No                                 |
| UN classification:   | UN11A (UN/IMDG/ADR/IMCO-Certified) |
| Packing group:       | II and III                         |

Easily open or close the bin from the side

### Special notice:

- Safe working and less time consuming because of our newly developed top opening slide gate
- Easily open or close the bin from the side
- No working at height = reduce the risk of falling
- Suitable for wet dumped catalyst, no bottom unloader, 100% leaktight!
- Special rates for bins that contain spent catalysts for metal recycling at Moxba and Metrex
